Callaghan Sets May 3 Vote; Begins Drive With Attack

William Borders

LONDON, March 29 (NYT) — Prime Minister James Callaghan, whose government was defeated last night in the House of Commons, opened his re-election campaign today with a hard-hitting appeal for votes.

"It would do great harm if the country were suddenly to go into reverse on the range of policies that have brought us through so far," Mr. Callaghan said in a nationwide radio and television broadcast in which he also announced that the parliamentary elections would be held May 3.

Outlining the issues that are likely to dominate the five-week campaign, the prime minister also hailed the economic progress that he said had been made during 4½ years of Labor Party government, and he warned that the policies of the opposition Conservative Party, led by Margaret Thatcher, would constitute "a jerk in the entirely opposite direction."

Earlier, at the prime minister's request, Queen Elizabeth II formally ordered the dissolution of Parliament, as required by the unwritten British Constitution, following the government's defeat on the no-confidence motion, which it lost by just one vote — 311 to 310. The House is to be formally dissolved at the end of next week, after passing a budget.

The Callaghan government's budget was to have been presented Tuesday, and normally it would have been a major statement of policy. But now it will be simply an interim measure, to enable the government to raise taxes and pay the bills until after the election.

In the House of Commons today, there was what the speaker, George Thomas, reprimachfully called "the aura of the hustings," with shouting and cheering first by one side and then the other as Mr. Callaghan and Mrs. Thatcher took their places opposite each other on front benches. Politicking was on the mind of many of the speakers, including Mrs. Thatcher, who used the debate to announce that if the Conservatives took over the government, they would match a promise that Prime Minister Callaghan made yesterday to raise pensions for married couples by £8 (about $16) a week.

Because the public opinion polls give a comfortable lead to the Conservatives as they go into the election, the Labor government's defeat in the House was regarded as good news in the London financial district, and stock prices were up sharply, with the Financial Times index reaching a record level this morning, before falling back.

Following tradition, the prime minister began the day with a 30-minute visit to Queen Elizabeth at Buckingham Palace. The prime minister did not resign but he asked her to dissolve Parliament

To Prepare 'Last Stand' in North

Amin Said to Have Fled Kampala

DAR ES SALAAM, Tanzania, March 29 (UPI) — Ugandan President Idi Amin has fled Kampala ahead of an advancing Tanzanian invasion force and is heading into northern Uganda with a convoy of loyal troops, the Uganda National Liberation Front announced today.

It said that Ugandan guerrillas and supporting Tanzanian troops would occupy the capital soon and that they had the neighboring town of Entebbe "at their mercy."

The statement said that Marshal Amin had "left for the north" with a convoy of troops still loyal to him, apparently heading for his hometown of Arua. Diplomatic sources believe that he would make a "last stand" there against the invasion force.

Diplomatic reports said that for the last few weeks, Marshal Amin has been sending military supplies, weapons and "goodies" — such as whiskey — to Arua to make a final battle possible.

"Fascist Idi Amin has now decided to leave southern Uganda and go to northern Uganda," the front statement said. "He is moving toward the north with convoys of his mercenaries."

The statement added, "The liberation forces have overrun Mityana, Mpigi and are holding Entebbe at their mercy. Kampala would, and will, fall into our hands at our will. We are giving enough time for innocent citizens and foreigners to leave Kampala."

Western diplomats said that a column of Tanzanian troops and their Ugandan allies was seen northwest of Mpigi, 30 miles southwest of Kampala. A second column was reported 10 miles east of Mityana, 38 miles west of the capital.

Diplomatic sources said that the western and southern sections of Kampala were deserted and that some inhabitants are running in panic through the streets away from the approaching invasion force. Forward elements of the 4,000-man invasion forces were reported close to the capital.

Spitting Distance

"The Tanzanians are within spitting distance now of Kampala," a diplomat said. "They are close. They are very close." He added, "Idi Amin's position is very, very shaky. It looks as if nothing can save him."

The diplomatic sources said that Libya, which ealier this week delivered an ultimatum to Tanzania to halt the invasion of Uganda, had stepped up shipments of military hardware to Marshal Amin's army and had also sent in fresh troops. Libya had about 1,000 soldiers in Uganda and has sent in 500 more since Monday, the sources said. They added that the Libyans were also moving in artillery, light weapons and light armored cars.

The Libyan troops apparently landed at Gulu Airport in the north of the country as well as at Entebbe, they said.

The Libyan airlift was seen as a

Police in Rome stand near the body of Italo Schettini, a Christian Democrat killed by terrorists.

Move Could Lead to Defeat of Cabinet

Andreotti Refuses Rightist-Party Votes

By Henry Tanner

ROME, March 29 (NYT) — Premier Giulio Andreotti, presenting his new government to Parliament today, declared that he would resign if he could win parliamentary approval only with the votes of the National Democracy, a small party of the extreme right that once was part of the neo-Fascist movement.

This means that the government will be defeated in the vote of confidence Saturday or Sunday unless the Socialists, the country's third-ranking party, reverse their announced decision to vote against Mr. Andreotti. Bettino Craxi, the Socialist Party leader, reaffirmed his party's decision to cast a negative vote shortly before Mr. Andreotti spoke.

The premier has the support of his own Christian Democrats and of the two small parties that have joined them in the Cabinet, the Republicans and the Social Democrats. That is not enough for a majority.

Meanwhile, the Red Brigades terrorist organization today claimed responsibility for the fatal shooting of a Christian Democratic politician, Italo Schettini, in an early morning ambush in front of his office in Rome.

If Mr. Andreotti resigns, President Sandro Pertini, after a few days of consultations, is expected to dissolve Parliament and call elections within 70 days, the period prescribed by the constitution. This would open the way for elections on June 10, the date the member nations of the European Economic Community will vote for a European Parliament for the first time.

All major Italian parties except the Communists hope that they will benefit from the coincidence between the national and the European vote. The Socialists in particular hope that the psychological momentum of large numbers of votes cast for the powerful Socialist and Social Democratic parties in

Rhode Island Halts Drive to Annul ERA Vote

PROVIDENCE, R.I., March 29 (AP) — A committee of the Rhode Island House halted a drive today to rescind that state's ratification of the Equal Rights Amendment by tabling the proposal indefinitely.

ERA supporters cheered and applauded as the Judiciary Committee voted 13 to 2 to table the proposed reversal of ERA ratification. Rhode Island was among the first states to ratify ERA in 1972.

The amendment, which would outlaw discrimination based on sex, must be ratified by 38 states by June 30, 1982, to become part of the Constitution. The original deadline was this March 22, but was extended by an act of Congress.

The ERA has been approved by 35 states, but five have rescinded their approval. The validity of that move is still in question and the Justice Department has said it is up to Congress to decide.

Khomeini Urges Minorities to Vote With Shiites

Iran Reports 2 More Ethnic Rebellions

By Ronald Koven

TEHRAN, March 29 (WP) — Fresh rebellions broke out today in opposite corners of Iran, prompting Islamic revolutionary leader Ayatollah Ruhollah Khomeini to appeal to the Sunni Moslem ethnic minorities in the border regions to vote tomorrow and Saturday with the Shiite Moslem majority of the country for the establishment of an Islamic republic.

The Shiite leader spoke of the "disturbing news" from Gonbad-e Kavus, Zahedan and Ardbil — towns respectively in Turkmenistan in the northeast, Baluchistan in the southeast and Azerbaijan in the northwest.

Fighting has been going on in Gonbad-e Kavus for three days and has reportedly calmed down today, but Ayatollah Khomeini's statement about the other two towns was the first public news of outbreaks there.

Telephone links with the towns seemed to be cut, and it could not be determined exactly what was going on in those localities separated by the Shiite-populated Iranian heartland.

Political groups representing most of Iran's ethnic minorities have called for a boycott of the national referendum on the Islamic republic.

Not only is the explosive mixture of ethnic differences and religious sectarianism causing growing concern to the young revolutionary authorities, but rival attempts to organize forces of law and order at the service of competing political strains are raising the specter of war-lordism in a country where police and armed forces both are in disorganization.

The army has been put on a three-day alert for the referendum, but there was skepticism that it could do much in its present condition. Army forces are officially reported to have gone into action against Turkoman rebels in Gonbad-e Kavus and surrounding towns.

This news must be assessed in light of a statement by Adm. Ahmad Madani, the defense minister, to this reporter that an announcement last week that army reinforcements have been sent to deal with rebels in Kurdistan was just "pretending," to impress the Kurds.

Called U.S.-Inspired

Ayatollah Khomeini attributed the latest troubles variously to "the clergy . . . depriving our Sunni brothers of their rights," to "inspiration from America" and to elements pretending to be "leftists."

The Islamic revolutionary committees that sprang up to replace the prerevolutionary authorities in such outlying minority regions are led largely by Shiite religious men who have tended to represent the interests of the local Iranians in the provincial towns. This occurred because the Islamic movement that overthrew the shah was, first of all, a Shiite phenomenon.

In every case where the details of regional conflicts have become known, the fighting originated in minor incidents that would probably have been quickly settled in normal times. But tensions are apparently so high and the police so weak that the smallest problem in a province can turn into a separatist rebellion.

This was the case in Kurdistan, when fighting raged last week for days after a local Shiite leader of a revolutionary committee in the Iranian Kurdish capital of Sanandaj acted high-handedly, by all accounts, toward the Sunni Kurds. Appeasement measures included getting the offending mullah out of town.

The Kurds were promised strong control over their own affairs, a pledge that may have encouraged groups now in rebellion to challenge the weak central government. Its leaders nevertheless insist that the idea of regional autonomy or of

Accident Called One of Most Serious

Radiation Leakage Spreads From U.S. Nuclear Plant

From Wire Dispatches

HARRISBURG, Pa., March 29 — Power-plant officials said today that a radiation leak that began yesterday at the Three Mile Island nuclear station was continuing. Radiation had been detected, they said, as far as 20 miles from the island in what was described as one of the most serious such accidents in U.S. history.

Officials of the Metropolitan Edison Co., the owner and operator of the plant, said that minor levels of radiation had been measured this morning 2 to 3 miles away and that the leaks might not be stopped until tomorrow. They said that the radiation was escaping through a ventilation system and from a pump designed to remove water after it cools the reactor.

Although officials admitted that the accident was not a minor one, John Herbein, a Metropolitan Edison vice president for generation, said, "There is presently no danger to the public health or safety. We didn't injure anybody, we didn't overexpose anybody and we certainly didn't kill anybody." Mr. Herbein said that, of the 100 to 120 employees in the reactor area at the time of the accident, only 10 to 15 had to be decontaminated with showers.

The company said that it did not notify state officials of the accident until three hours after it had happened because no increase in radiation was noted until then. "Nothing critical failed, but it's a dirty problem that's going to take some time to clean up," said Charles Gallina, an investigator with the Nuclear Regulatory Commission.

Exposure Area

Mr. Gallina called it one of the worst nuclear accidents, saying that the problem was not the amount of radiation released but the wide area of exposure.

William Dornsife, a nuclear expert for the state Department of Environmental Resources, said that he expected to see traces of the radioactive isotope iodine 131 showing up in milk within a week. "We will be checking milk supplies and other materials to see what was picked up, and checking people," he said.

Plant officials said that, because of the large amount of radioactive water, it may be several days before workmen can enter the reactor building to assess the damage. As for what caused the accident, Walter Creitz, the president of Metropolitan Edison, said, "I'm not ruling out human error."

State officials said that they did not plan to evacuate any of the 15,000 persons living within a mile of the site.

Until now, a fire in March, 1975, in the control room of the Browns Ferry nuclear plant in Athens, Ala., had been considered this nation's most serious accident involving a nuclear reactor.

The worst nuclear accident occurred in the Soviet Union in late 1957 or early 1958, as reported by the CIA and two exiled Soviet scientists. That accident may have caused the death of hundreds of people, forced the evacuation of several towns and villages and spread radioactive material over 1,000 square miles.

Low-level radiation yesterday was detected in the air here as far as 16 miles away after an apparent valve failure resulted in excessive pressure being built up in the water used to cool the reactor core at Three Mile Island.

Mr. Herbein said that, at 7 this morning, investigators detected radiation levels at 5 to 7 millirems per hour as far as 2 to 3 miles miles from the plant. Individuals are exposed to up to 30 millirems during an X-ray examination.

Mr. Creitz said that his company did not know what equipment had been disabled or what precisely had caused the accident. "Anything that man makes will not operate

'Life Is One Big Gamble,' Woman Says

Plant-Area Residents Show Quiet Caution

By Bill Peterson

LONDONDERRY, Pa., March 29 (WP) — The huge, gray cooling towers of the Three Mile Island nuclear power plant loom over the well-clipped lawns of this tiny community like something from outer space.

For most of the last decade, they have been regarded as a mysterious blessing, an economic bonanza of sorts, for the people who live along the banks of the Susquehanna River. But, today, after one of the nation's most serious nuclear-power accidents, some people are beginning to ask themselves if the blessing has turned into a curse.

"I don't like it. I don't like it at all," said an elderly woman behind the counter at a store in Falmouth, who did not wish to be named. "It's almost enough to make me want to sell out and move."

Few people were that outspoken. The immediate reaction among most was one of quiet caution. A woman said that she had decided not to hang her laundry outside. An elderly man put off plowing his garden for a week. And the Londonderry Elementary School did not let the children go out for recess.

There was little real fear as a team of state police helicopters hovered over the area checking the radiation levels. "I'm more afraid of that highway out there and the crime that goes on around here than that plant across the river," said Mrs. James Engle.

"I don't worry about it," said Rita Connor, who lives half a mile away. "You see these lights burning in this house? As long as I want to keep them burning, there have to be plants like this some place."

"If you're going to go, you're going to go. Life is one big gamble," said Monica Drayer of Royalton Township. "That plant's as safe as anything else. I really don't think the government would let them do anything to endanger our health."

The only outrage expressed here yesterday was over the failure of the plant officials to notify nearby residents of the danger, which the officials said was confined to the plant site. Lt. Gov. William Scranton 3d called a news conference to demand an investigation into an apparent three-hour delay between the time of the accident and the time that state civil-defense authorities were notified of it.

Mayor Robert Reed of nearby

'Detrimental to the Peace Process'

Egypt Assails U.S. Assurances to Israel

By Jim Hoagland

WASHINGTON, March 29 (WP) — Egypt has denounced new U.S. security assurances to Israel as "exceedingly dangerous" to American interests in the Middle East and "detrimental to the peace process" inaugurated by the Egyptian-Israeli treaty signed here Monday.

The sharp protest and a separate warning that the assurances to Israel will damage U.S.-Egyptian cooperation for peace are contained in two letters sent by Egyptian Premier Mustapha Khalil this week to Secretary of State Cyrus Vance. The letters were made available to several reporters yesterday.

Signed two hours after the peace treaty, the U.S.-Israeli memorandum of understanding "will cast grave doubts about the real intention of the United States" and is "directed against Egypt," Mr. Khalil wrote. Egypt will refuse to recognize the agreement, which requires that both Egypt and Israel be consulted before U.S. action to counter a violation is taken.

No Affect on Pact Seen

U.S. officials said they did not expect the protest to affect the peace treaty, which will return the Sinai Peninsula to Egypt and establish full diplomatic and commercial relations between the two nations, which fought four wars in 30 years.

This view was bolstered by the disclosure by diplomatic sources that Egyptian President Anwar Sadat has agreed verbally to open land borders with Israel within two months. He agreed to this on Sunday night after Prime Minister Menachem Begin said Israel would give the northern Sinai coastal town of El Arish back to Egypt in two months.

While noting that the Egyptian opposition would not have any legal effect on the bilateral memorandum of understanding, U.S. officials acknowledged that Egyptian negotiators had been upset and surprised by some of the terms of the document, which was signed by Mr. Vance and Israeli Foreign Minister Moshe Dayan.

The State Department responded to queries about the two Khalil letters with a press statement noting "an expression of unhappiness" from Egypt, which the department contended was based on a misreading of the memorandum. The statement added that the United States was still ready to sign a similar document with Egypt.

The nine-point paper specifies that in the event of violations that threaten Israel's security, such as naval blockades, the United States "will be prepared to consider, on an urgent basis, such measures as the strengthening of the U.S. presence in the area, the providing of emergency supplies to Israel and the exercise of maritime right in order to put an end to the violation."

Sen. Howard Baker, R-Tenn.,

Close to 5% Pledge Made by Carter

U.S. Oil Consumption Registers Drop

By John M. Berry

WASHINGTON, March 29 (WP) — The United States is close to meeting President Carter's pledge to leaders of the world's industrial nations to cut U.S. oil consumption by 5-percent, according to a top administration energy official.

Although complaints are still being voiced about the U.S. appetite for oil, Deputy Energy Secretary John O'Leary acknowledged this week that consumption has dropped by from 700,000 to 830,000 barrels a day — about 4 percent of the normal amount.

Mr. Carter's pledge, in which most other industrial nations joined, was intended to counter foreign governments' criticism of U.S. consumption and to tell oil-exporting nations that the United States would cut down. The pledge was made after the loss of 6 million barrels a day of Iranian exports.

Neither the president's promise nor the reduction in demand succeeded in heading off much higher oil prices, which now appear to be the principal legacy of that disruption instead of the continued shortages that were feared.

Mr. O'Leary said the shortage resulting from the Iranian situation was only about 1.7 million barrels a day because other countries increased production. Now that Iran has resumed exports of 2.5 million barrels a day, worldwide supply and demand are back in balance, he said.

Mr. O'Leary's comment, in an interview, contrasts sharply with statements two weeks ago by Energy Secretary James Schlesinger, who castigated people in the United States for using oil at a record rate of 21 million barrels a day.

Mr. Schlesinger's deputy was hardly challenging his boss' position, but the apparent discrepancy underscores how hard it is to determine whether there is a shortage of oil, and if there is, how large it may be. Similarly, it highlights the lack of adequate statistics on U.S. demand.

Mr. O'Leary said that the oil savings come from three developments:

- Electric power is being generated using coal and nuclear plants in one part of the country and then transported to other parts — primarily on the East Coast — that would otherwise have to use oil to generate it locally. "We are saving about 250,000 barrels a day from wheeling power to the oil areas," Mr. O'Leary said.
- Some large industrial and utility oil users, such as Consolidated Edison Co. in New York, are

Eritreans Claim Base Destroyed

ROME, March 29 (UPI) — The Eritrean Liberation Front said today its soldiers had destroyed an Ethiopian military base on the main road between Asmara and Addis Ababa, killing hundreds of troops.

A spokesman said the fighting took place yesterday and that the base destroyed was between Adiquala and the Marab River.

He said the guerrillas destroyed three tanks and captured large quantities of weapons.

Saudi Arabia Resists Hardliners

Arabs Unable to Agree on Egypt Sanctions

By Thomas W. Lippman

BAGHDAD, March 29 (WP) — Arab foreign and economic ministers admitted today that they were unable to agree on what actions to take against Egypt for signing a peace treaty with Israel.

Dropping at least temporarily their attempt to put up a unified front, they recessed their meeting here to consult their governments and authorized Iraqi Foreign Minister Saadun Hamadi to make the split public.

In an unusually frank briefing for the press, Mr. Hamadi said that the ministers "could not agree" because one group of countries, led by Saudi Arabia, wanted to impose only the limited sanctions authorized by an Arab summit conference last November while others, including Iraq, sought a complete rupture of all diplomatic and economic ties to Egypt.

The conference, Mr. Hamadi said, was paralyzed because of the impasse on this key point. The participants were unable to take up other items on the agenda, including calls for measures against the United States for its role in sponsoring the Egyptian-Israeli peace treaty, because they could not resolve the first point.

Sadat Unscathed

Mr. Hamadi, as conference chairman, announced that the meeting was adjourned until tomorrow night, the final session. Barring a breakthrough when the meeting resumes, the effect is to leave Egyptian President Anwar Sadat unscathed.

The split also appears to have headed off the developing tactical alliance of Saudi Arabia, Syria and Iraq, who came here united in their opposition to the treaty but have disagreed over what to do about it.

According to the Saudi foreign minister, Prince Saud al-Faisal, the Saudis favor implementation of the relatively mild sanctions called for at the November summit and are merely taking a narrower view of what this conference is authorized to do than are the hardliners. But this amounts to a victory for the Egyptians, because in the Egyptian view, only the Saudis are able to do them any real damage.

Arms Purchases

Saudi Arabia is financing arms purchases for Egypt and also contributes economic aid. If the Saudis now decline to join the Arabs who are clamoring for an end to that assistance, the Egyptians are over a major hurdle in surviving the opposition to the treaty. The hardliners have criticized the Saudis for their apparent unwillingness to jeopardize their relations with the United States by turning against Egypt.

Chastised last night by Palestinian delegates, who were joined by Syria and Libya in a walkout over the conference's failure to impose tough sanctions on Egypt, the Saudis defended themselves today. Prince Saud told reporters that, while Saudi Arabia supports the Palestinian cause, this meeting was not authorized to go beyond the sanctions provided for at the November summit. These include the transfer of the Arab League headquarters out of Egypt and the imposition of the Arab trade boycott on Egyptians doing business with Israel.

"Anything else," he said, is "outside the stipulations of the Baghdad summit."

He said that while the ministers might recommend that the Arab countries take additional measures such as the breaking of diplomatic relations on an individual basis, even a unanimous call for such actions would not be binding because "relations between nations are the sovereign prerogative of every state."

Rejects Oil Embargo

He dismissed as an "empty bidding contest" a call by the Palestine Liberation Organization for an oil embargo against the United States, a proposal made last night by PLO leader Yasser Arafat that reportedly angered the Saudis because it asked for something there was no chance they could deliver and suggested they were not fully supporting the Palestinians if they did not go along.

Today, a PLO official went further by saying that "from today, we will not hesitate to take any action against America and against U.S. interests. There is nothing left to lose."

Mr. Hamadi said there was a "widespread feeling that the United States bears a good part of the responsibility for the result and the Arab world should take action against the United States in the fields of oil, trade and petrodollars." But he said no decision had been made on a call for sanctions.

Pro-West Saleh Would Head New Nation

2 Yemens Said to Agree on Unification

KUWAIT, March 29 (AP) — The presidents of Yemen and Southern Yemen, rival pro-West and Marxist neighbors, agreed today that unification is the only way to resolve the conflict between their two nations, a high-ranking Southern Yemeni official said.

The official, who asked not to be identified, said that a communique on the agreement was expected to be issued later today, and he predicted that a provisional government would be formed soon to supervise the merger. There was no immediate Yemeni confirmation of the report.

The agreement was reached at the third session of a reconciliation summit here after Abdel Fattah Ismail, president of Southern Yemen, proposed that President Ali Abdullah Saleh of Yemen become head of the proposed united Yemen, the Southern Yemeni official said.

'Remove Fears'

He said that the offer was a "gesture of good will designed to remove fears and suspicions on the part of the North Yemenis."

Mr. Saleh accepted the offer as "evidence of an end to differences and hindrances on the path to unity," the official said.

The Yemens, on the southern tip of the Arabian Peninsula, have sought to unite for more than a decade, since Southern Yemen gained independence from Britain.

The Arab states have fought border wars periodically, most recently last month, when the United States and Saudi Arabia moved to aid Yemen, and the Arab League finally arranged a cease-fire.

'New Strength'

The Southern Yemeni president was quoted today as assuring anti-Marxist Saudi Arabia that a united Yemen "will represent a new strength for all states in the region." Mr. Ismail warned, however, that "there will be no stability short of achieving unity," according to the official in the Southern Yemeni delegation.

The reported new agreement was expected to be strained severely by the deep ideological gap between the two governments.

Mr. Saleh came to power in Yemen July 17 after his predecessor, Ahmed al-Ghashmi, was assassinated when a booby-trapped attache case carried by a Southern Yemeni presidential envoy blew up.

Two days later, President Salem Roboya Ali of Southern Yemen, who was blamed by Yemen for the killing, was overthrown and executed in the bloody coup that brought Mr. Ismail to power.

Ismail Accused

Mr. Ismail subsequently was accused by Yemen of masterminding the al-Ghashmi assassination as a pretext for eliminating Mr. Ali. Just before the assassination, Mr. Ali and Mr. al-Ghashmi were arranging to meet to review past merger attempts.

In the fighting that broke out Feb. 23, the United States sent arms to Yemen and promised to increase military aid from $100 million to $380 million.

According to Arab press reports, Soviet military advisers and Cuban troops were airlifted from Ethiopia to Southern Yemen.

Callaghan Sets May 3 Vote, Attacks Tories in Opening

(Continued from Page 1)

and told her the date on which he would like the new election.

The ritual reflected the special function of the modern British monarchs — "to reign, but not to rule." Thus, here is the way the official announcement from 10 Downing Street described what happened:

"The prime minister has today asked her majesty the queen to proclaim the dissolution of Parliament. Her majesty has been graciously pleased to signify that she will comply with this request."

During a pep talk to Labor Party members of Parliament, Mr. Callaghan said today he would "deeply deplore" any personal attacks on Mrs. Thatcher during the forthcoming campaign. But in his broadcast, although not mentioning her by name, he sought to remind listeners of some of the charges they have heard against her style.

For example, alluding to the widely held view that the Conservative leader would confront the trade unions and get along with them even less well than the Labor government has, Mr. Callaghan said: "How can we insure peace in industry and avoid the disruption that we've seen? I believe that cooperation and partnership — not confrontation — will serve us best."

Fear of Risk

"The question you will have to consider and decide on," he told the voters, "is whether we risk tearing everything up by the roots, scrapping the programs that assist firms on which a million jobs depend, slashing spending that's needed for families and hospitals and schools. The answer surely must be, no."

Playing to widespread public resentment over Britain's membership in the European Economic Community, which the Conservatives generally support much more than the Labor Party does, the prime minister said: "I'm quite convinced that we shall be able to make progress at ending some of the foolish and expensive aspects of the Common Market agricultural policy in the next Parliament."

Conceding, as the Conservatives say, that unemployment and inflation are "overriding issues," the prime minister said he would be able to do more to correct them, with the help of a promised new economic strength from Britain's move toward self-sufficiency in oil.

"What we want," he concluded, "is a society in which there is fairness, in which there is justice, in which there is fair play — a society where need, not greed, determines our approach."

Sadat in Bonn For Talks With Scheel, Schmidt

BONN, March 29 (UPI) — President Anwar Sadat of Egypt conferred today with President Walter Scheel of West Germany, then flew to Gymnich Castle for an afternoon's rest.

Mr. Sadat landed at Bonn airport at the end of an overnight flight from Washington, where he signed a peace treaty with Israel.

A helicopter carried him to Mr. Scheel's official residence, where he was received with full military honors. The two chiefs of state met for about 45 minutes, then Mr. Sadat reboarded his helicopter for the short flight to Gymnich Castle.

Chancellor Helmut Schmidt also was to meet Mr. Sadat. The Egyptian leader and his wife are to leave Bonn Saturday morning.

Begin Returns Home

TEL AVIV, March 29 (Reuters) — Prime Minister Menachem Begin returned today from the United States.

Egypt Mission to Quit Jordan

CAIRO, March 29 (Reuters) — Egypt is withdrawing its diplomatic mission from Jordan, the Middle East News Agency said today.

Jordan informed Egypt yesterday of its decision to recall the Jordanian ambassador from Cairo.

Schmidt Urges End to Limit on Pursuing Nazis

BONN, March 29 (Reuters) — Chancellor Helmut Schmidt called on the West German parliament today to provide for the continued prosecution of Nazi war criminals.

Speaking in a Bundestag debate on whether to scrap the statute of limitations preventing investigations into Nazi crimes from next year, the chancellor said, "The deliberate destruction of human life cannot be undone by the passage of time."

A vote on the issue is expected in June.

Most of Mr. Schmidt's Social Democrats, some Free Democrats (liberals) and about 30 opposition Christian Democrats want to scrap the statute of limitations to enable suspected Nazi criminals to be pursued until the end of their lives.

The majority of the Christian Democrats and Bavaria's right-wing Christian Social Union oppose changes in the law, saying too much time has gone by to allow fair trials.

Two USAF Fliers Killed

MILDENHALL, England, March 29 (UPI) — Two U.S. Air Force fliers were killed last night in the crash of their RF-4C Phantom-2 at Kirkcudbright in southwest Scotland, the Air Force said today.

Associated Press

Residents of Goldsboro, Pa., go about their business after the accident at the nuclear power plant, shown in the background.

Residents of Plant Area React With Quiet Caution

(Continued from Page 1)

Middletown complained that he had not heard about the accident, which occurred at 4 a.m., until 8:15 a.m. "We have 11,000 people living right in the shadow of those cooling towers," he said. Local officials "have their own Geiger counters, and they are out there trying to figure out if there's trouble."

The $1-billion reactor plant is built on a small island, about 10 miles southeast of Harrisburg.

Most nearby residents knew few details of what happened yesterday at the plant, except that a "general emergency" had been declared at the site after some problems had occurred in the reactor's cooling system, and that a slight amount of radioactive material had leaked into the air.

But residents did know that a circus atmosphere had descended on their region. A man boasted that he had been interviewed by five local television stations, a network crew, Newsweek magazine and the New York Daily News.

Rita Connor, who lives on a hill overlooking the plant, spent the early afternoon on the telephone assuring her mother and sister in New York that "we haven't been blown to bits." Her 10-year-old son, Mike, tried to persuade her to let him set up a stand to sell soft drinks and hot dogs to passersby. She refused.

Many people were reluctant to talk about the plant because they have close friends or relatives working there. Others asked that their names not be printed.

"I have mixed emotions about the plant," Holly Garnish said in her home directly across the river from the plant. "I'm angry when something happens like today, but I've learned to live with it." She added, "Really, it was very depressed around this area until they started building Three Mile Island. It's meant so many jobs for so many people that I can't help but think that it's been good for the area."

As she spoke, a woman walked in. She was obviously unnerved. She said that her husband had worked at the plant for 10 years, but that she never had paid much attention to what the doomsayers had to say about nuclear power. "I always hated to think what might happen," she added hesitantly. "So I didn't."

Welder at Plant

Her husband, a welder, encouraged the attitude. He said that the money was good — $18 or $20 an hour on overtime — and that Metropolitan Edison, the company that runs the plant, seemed to know what it was doing. She said that he would add jokingly, "I've already lost all my hair and I'm sterile (he has had a vasectomy). What else can they do to me?"

But yesterday the woman was worried. "There was some trouble at the plant," her husband had told her when he returned home at 7 a.m.. He then fell asleep. Later, she heard what had happened during his shift. The woman, like many people here, said that she was going to do some soul-searching. "Now that it is down to the real nitty-gritty, I want to know more about what goes on in there," she said.

But first, she said, her husband had invited her last night to "The China Syndrome," a recent film about the cover-up of a near-catastrophe involving the failure of a cooling mechanism at a nuclear power plant.

Radiation Spreads From U.S. A-Plant

(Continued from Page 1)

perfectly," he said. "A piece of equipment failed."

In the meantime, Sen. Gary Hart, D-Colo., who chaired the Senate Subcommittee on Nuclear Regulation, said today that the plant had been shut four times "for various kinds of malfunctions or failures to meet regulations" since it started operating in December.

Human Error

During a network television interview, he said that he had been briefed last night by investigators from the Nuclear Regulatory Commission who told him that human error may have contributed to the accident.

Crews of 70 men wearing hard hats and protective clothing today were mopping up the radioactive water in an unprotected auxiliary building next to the reactor. The crews were changed every hour to prevent fatigue and avoid overexposure to radiation. The reactor would be shut for at least several days, authorities said.

The $1-billion plant is owned by General Public Utilities, an energy consortium in which Metropolitan Edison Co. has a one-half share. Each day that the plant remains closed could cost Metropolitan Edison nearly $1 million depending on how much electricity it must buy from other power firms.

Radiation was released when radioactive water was diverted to the auxiliary building, where clean water normally is cooled. Plant officials vented steam from the building without knowing that it came from radioactive water. The wind spread the particles away from the site.

Mr. Gallina said that the investigators would study why a valve feeding to a water pump closed when it should have stayed open. Babcock & Wilcox Co., the manufacturer of the water pump, denied that there had been a valve failure.

Lieutenant Governor

"The (utility) company told us that it was a failure of a valve due to the emergency cooling-down system," Lt. Gov. William Scranton 3d said. "We have to take their word at this time for today's purposes. But this will be investigated, no doubt about it."

The greatest levels of radiation were measured in the 280-acre site, located on an island in the middle of the Susquehanna River, 16 miles south of the state capital and 40 miles north of the Maryland border. Federal officials measured the hottest spot on the site at 70 millirems, twice the amount received in a chest X-ray.

Specially equipped helicopters measured 0.33 millirems in the air over Harrisburg. On the ground at the airport, about two miles from the plant, readings showed 12 millirems, the nuclear commission said.

When the valve failed, the reactor automatically shut down within a minute. Alarms lit up in the control tower, a siren sounded and 60 workers went to safety points. Officials declared a "general emergency," locked a chain-link gate leading to the plant and notified federal officials.

The plant is known as a pressurized light-water reactor. The core heats water under pressure to heat other water. That turns to steam and runs a turbine, producing electricity. The core and its uranium rods are housed in a dome-shaped building with reinforced concrete walls that are four feet thick.

U.S. Consumption of Oil Shows Significant Drop

(Continued from Page 1)

switching to natural gas under special rules making gas available to them. These switches have cut oil consumption by between 150,000 and 180,000 barrels a day already, according to Energy Department estimates.

• Most oil companies are making available to their wholesale customers only 85 to 95 percent of the gasoline and home heating oil they bought in a comparable month last year. This has meant shorter hours for gasoline-station operations and some closings. Mr. O'Leary said that this action cut demand by 300,000 to 400,000 barrels a day this month.

Mr. O'Leary predicted that it will not be necessary to use any of the possible mandatory conservation measures, including gasoline rationing, to reach the promised 5-percent reduction.

The three types of savings already occurring, plus voluntary decisions to keep thermostats in nonresidential buildings higher in summer and lower in winter, and better enforcement of the 55-mph speed limit, will allow the United States to meet its goal, he said.

Moreover, this week's 9-percent increase in oil prices by the Organization of Petroleum Exporting Countries "may have the effect of drying up world demand to some degree," Mr. O'Leary said.

Keeping world supply and demand in balance will require a "rock-steady Iran," Mr. O'Leary cautioned. And, he added, "We have a debit to work off of more than 100 million barrels" in terms of stocks used during the Iranian shutoff.

He said statistics indicating the record-high demand that Mr. Schlesinger complained about do not conclusively show that use was actually that high. "All of our demand data are 'apparent-consumption' data," he said. "We have no actual consumption data."

What the statistics show is what the experts call "disappearance from primary stocks" — basically, changes in the level of crude oil and refined-product supplies in pipelines, at refineries or at company distribution plants. No one knows what is happening to the amount of gasoline in the tanks filling stations, much less to the amount in each car's gas tank. There also is no information about the amount of oil most industrial users have on hand.

Many oil-industry officials believe the surge in demand shown in the official data really indicates only that many oil users, including individual car owners, have been filling their tanks out of fear of shortages. Thus, the demand peak is only "apparent," in their opinion.

Mr. O'Leary, however, thinks that much of the increase in the demand for gasoline, at least, is quite real. "The disappearance of gasoline is hard to explain in terms of stocking alone," he said. "I think we are driving more."

Mr. O'Leary had only praise for the way that the oil companies have managed inventories during the Iranian shortage, including their continued use of cutbacks in supplies to wholesale customers now that Iranian exports have resumed.

"I think they are doing precisely the right thing," he said. "We have to get through the summer driving season and build up stocks of middle-distillate heating oil or there will be a human-need problem in the winter.

"A little prudence in March, April and May, a little discomfort now, is necessary," he said.

2 More Iran Rebellions

(Continued from Page 1)

creating a federation of states is simply out of the question.

Government concern over the Sunni-Shiite split has become increasingly obvious. With Premier Mehdi Bazargan at the other end of the telephone line, Defense Minister Madani was overheard this week in his office discussing a visit the next day to Baluchistan. Mr. Madani told the premier that he would certainly address an appeal "to our Sunni brothers" when he got there.

The government also displayed concern today that the national turnout in the referendum may be embarrassingly light. In a move to counteract that, the voting period was extended from one to two days.

The Cabinet spokesman, Deputy Premier Abbas Amir Entezam, said at a press conference that he expects only about 12 million people to vote out of a total on the voting rolls of nearly 19 million. It was not clear whether the number he gave for the electorate includes 16- and 17-year-olds, who have been extended the right to vote, officially because of the important role that the young people played in the struggle against the shah's regime.

U.S. Memo Denounced

(Continued from Page 1)

voiced concern about the possibility of U.S. military moves to enforce the treaty. In a speech, he said, "We are taking steps into the unknown in these momentous days, and we all want to play as constructive a role as possible within the limits of prudent policy."

Although Mr. Sadat has frequently expressed the desire for increased U.S. military support for his own government, the military provisions in the memorandum attracted Mr. Khalil's sharpest criticism. "It gives the United States the right to impose a military presence in the region for reasons agreed between Israel and the United States, a matter which we cannot accept."

Egypt's Good Faith

Saying that it may strengthen Mr. Sadat's Arab critics, Mr. Khalil predicted that the agreement will "certainly drive other Arab countries to take a harder position against the peace process, and would give added reasons for them not to participate in that process. . .It will also have adverse effects in Egypt for the United States."

The letters, written Saturday and Sunday as Mr. Vance and Mr. Dayan negotiated the final clauses of the memorandum, also express indignation that Egypt's good faith in signing the treaty was being questioned. Mr. Khalil complained that the Carter administration, which had expressly agreed to be "a full partner" with Mr. Sadat in the peace effort, was now moving to be "an arbiter" of the agreement.

"The government of Egypt will not recognize the legality of the memorandum and considers it null and void," the second letter concludes.

U.S. officials continued to stress their view that the memorandum of understanding does not commit the United States more deeply than does a similar document that then Secretary of State Henry Kissinger gave Israel to underwrite the 1975 Sinai disengagement agreement.

In his final day in Washington, Mr. Sadat met separately with Defense Secretary Harold Brown, to seek arms, and David Rockefeller, head of the Chase Manhattan Bank and one of the nation's most influential financial leaders.

A Pentagon official said that the administration is negotiating the sale of F-4 Phantom fighter-bombers to Egypt, which has asked for the more advanced F-16.

Fiji Hurricane Kills 31

SUVA, Fiji, March 29 (AP) — Thirty-one persons are listed as dead after a hurricane in southwestern Fiji yesterday, police said today. Twenty-one died in the village of Vuhia on the island of Ono, a favorite calling place for cruising foreign yachtsmen.

Shah Said Set to Quit Morocco, Possibly for Refuge in Bahamas

WASHINGTON, March 29 (NYT) — Shah Mohammed Reza Pahlavi reportedly will leave Morocco soon for another place of refuge. There were unconfirmed reports that he was soon to fly to the Bahamas, perhaps by the end of the week.

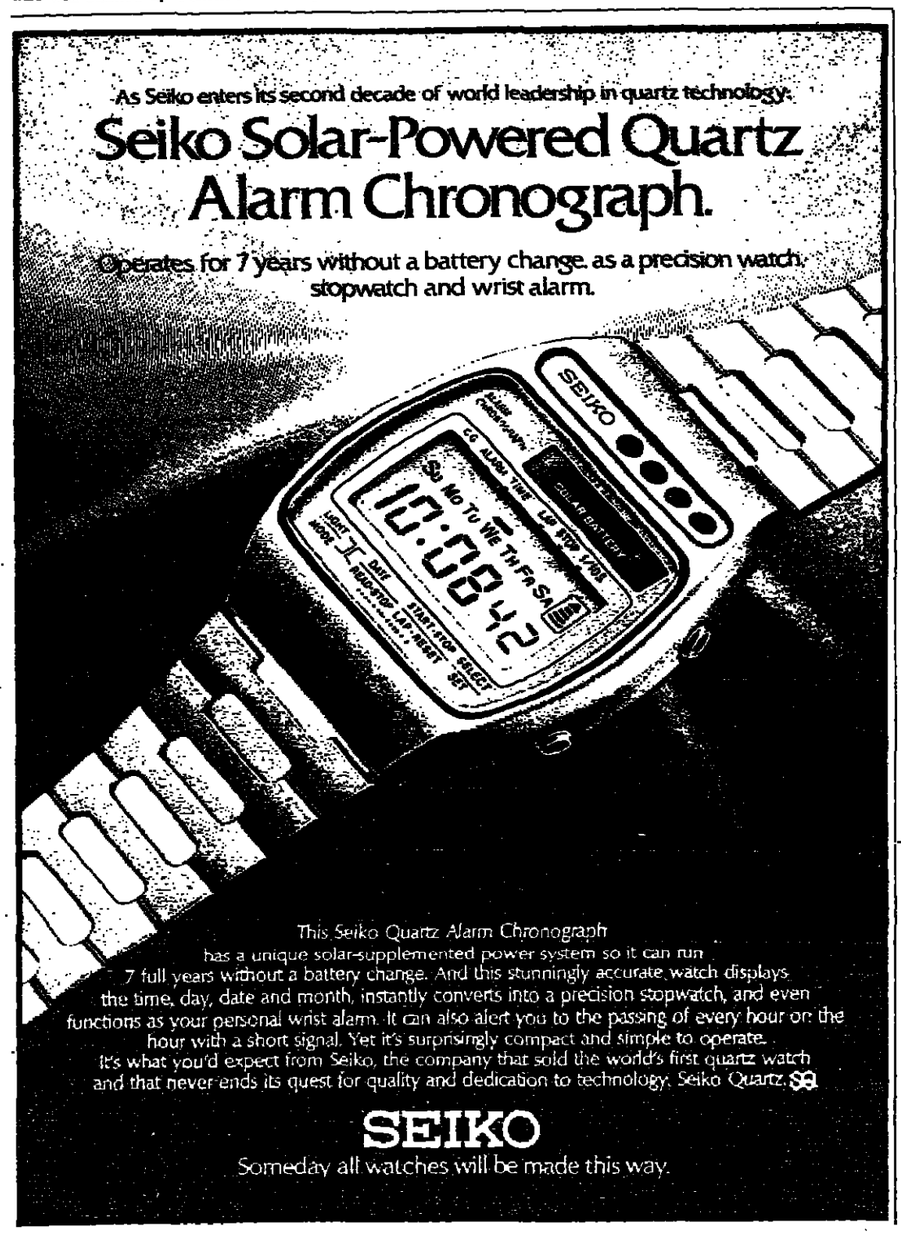
Administration officials said last night that the shah, who went into exile in January, had been strongly urged not to go to the United States for security and other reasons. But the officials strongly denied that the shah had been refused permission to enter the United States.

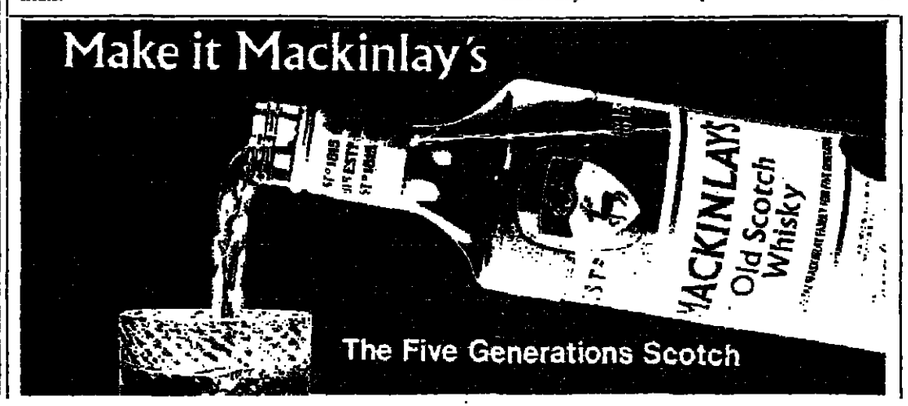
The shah, who was still officially chief of state when he left Iran, is regarded as a private citizen now.

Because of this, U.S. diplomats in Morocco advised the shah's aides that if he went to the United States, he would not only face grave security problems because of the many Iranians there who oppose him, but would also be subject to civil court cases and subpoenas from various legal bodies.

The Moroccan government has been uncomfortable with the shah's long stay, which put it at odds with the new Iranian regime. He has been in Morocco since Jan. 22, after a brief stay in Egypt.

Administration officials said that they worked on the shah's behalf to find him another refuge.





Associated Press

FIRE VICTIM — A man is rescued by firefighters from an early morning fire yesterday at Copley Plaza Hotel in Boston. He was among more than 150 persons injured in almost simultaneous fires at the Copley Plaza and at the Boston Sheraton Hotel. The fires drove more than 1,800 guests from their rooms. Officials said both fires were set by arsonists.

International Flights Would Be Hardest Hit

Oil-Price Hike Seen Raising Air Fares

By Richard Wickin

NEW YORK, March 29 (NYT) — International airline fares are expected to climb 5 percent or more as a result of the sharply rising costs of jet fuel, industry sources said yesterday.

Basic decisions on worldwide increases are likely to be made by this weekend at a special meeting of the International Air Transport Association, which began yesterday in Geneva. The increases probably will be applied beginning in late May or June and may vary from area to area, the sources said.

Domestic fares also are expected to be affected by the latest increase in fuel prices, but not as severely as international fares, because imported crude oil makes up less than half the supply needed for domestic uses.

The transport association's meeting was called a month ago, before Tuesday's decision by oil-producing nations to increase the basic price of crude by 9 percent and to allow surcharges by individual members. The price rise will simply mean that the fuel surcharge that the association members had been contemplating will be higher than planned. "This simply will accelerate and exacerbate the situation," said an airline spokesman.

Discount Fares

Another anticipated effect of the increase in fuel prices will be to water down the deep-discount bargains that have helped produce a startling growth in air traffic in the last two years.

Don Lloyd-Jones, a senior vice president of American Airlines, said that the gap between full-fare economy tickets and bargain fares was likely to be narrowed. He said also that airlines probably would cut the number of seats per flight allocated for discount fares.

Several officials said that bargain hunters would find it wise to plan their trips early and to buy their summer-holiday tickets now, while the currently advertised fares are available.

Last week, before the price increase by the oil cartel, TWA said that it soon would ask the Civil Aeronautics Board in Washington for a 7-percent increase in trans-Atlantic fares to cover rising fuel costs. But it specified that, while the increase would be for flights starting May 1, tickets bought before April 15 would be priced at the former levels.

The proposed increase, for example, would bring the cost of a super-Apex advance-purchase excursion ticket between New York and London to $459 round trip in the June-August peak season. It would be $363 until April 30 and $384 between April 30 and June 1.

Pan Am announced yesterday that it planned to request a 4-percent fuel-related increase on both North Atlantic and trans-Pacific tickets sold after April 30 for flights starting June 1.

A.B. Magary, a Pan Am vice president, said that this was the first time that special safeguards on ticket costs were being offered international travelers on flights originating in the United States.

The international airline group that is meeting in Geneva has found its power to set international fares undercut in the last two or three years by the campaign of the U.S. government for free-market competition and by the withdrawal of several carriers from the fare-making bodies.

If there is no consensus at the meeting for new fare levels in particular travel zones, individual airlines are expected to file for fare increases on their own. It would then be up to governments to approve or disapprove. The consensus is that, in view of the heavy pressure of fuel costs, government approval of significant fare rises could hardly be withheld.

U.S. airlines originally had forecast that fuel costs, which constituted 20 percent of a carrier's costs, would climb 10 to 12 percent this year. But now, according to Daniel Henkin, vice president of the Air Transport Association, the trade group of U.S. scheduled airlines, the increase this year is likely to be in the 15- to 20-percent range. That would mean that fuel would make up about 23 percent of costs, he said.

In 1973, before the oil producers started the sharp upward price push, fuel constituted 12 percent of an airline's costs.

Air France Prices to Rise

PARIS, March 29 (AP) — Air France, the French state-owned airline, said today that it will increase fares to compensate for the oil-price rise announced earlier this week by the oil-producing nations.

Director-General Gilbert Perol said that he hoped the fare increases would be put into effect as early as May 1. He indicated that the increases might be modified for excursion fares, where the price of fuel is a proportionally larger factor than in regular fares, so that excursion passengers would not be unduly penalized.

Mr. Perol said that the company's fuel bill this year had been estimated at about 1.6 billion francs (about $380 million).

Treaty Boosts Carter in Poll But He Rates Low on Economy

NEW YORK, March 29 (NYT) — Public approval of President Carter improved because of his success in negotiating a peace treaty between Israel and Egypt, according to the latest New York Times-CBS News poll, but his gain appeared fragile and menaced by overwhelming disapproval of his handling of the economy.

Mr. Carter's public standing rose from 37 percent last month to 42 percent this week, only the second time since the polling series began in April, 1977, that his popularity increased. It jumped 10 points after the Camp David summit last September, the talks that set the stage for this week's treaty signing.

But he failed to achieve a breakthrough in one key area where his advisers and supporters expected to see significant improvement: the public's perception of him as a strong leader. Thirty-eight percent agreed with that characterization, almost exactly as many as did so when that question was last asked in the January Times-CBS poll.

That failure to gain was accompanied by a major setback. Public approval of Mr. Carter's handling of the economy dropped to a record low of 18 percent. That rating had stayed level, at 28 percent, from last June until January, and it had appeared to bottom out.

There was even discouraging news for the administration on the Middle East itself in the survey of 1,221 voting-age U.S. citizens, although two-thirds of those interviewed agreed that Mr. Carter's efforts had been necessary to achieve a treaty. Only one respondent in five supported the proposed increases in aid and arms for Egypt and Israel, and only one in three favored "selling our oil to Israel if they can't buy it elsewhere."

Rebels Release U.S. Missionary Held for 3 Weeks in Philippines

MANILA, March 29 (Reuters) — Moslem rebels in the southern Philippines have freed a U.S. missionary whom they kidnapped nearly three weeks ago after the Libyan ambassador here intervened on his behalf.

The Rev. Lloyd Van Vactor was released last night just outside Marawi, 525 miles south of Manila, after a three-hour meeting between the rebels and Ambassador Mustafa Dreiza.

Rev. Van Vactor was kidnapped in Marawi on March 9 by the rebels who threatened to kill him if a ransom of 500,000 pesos ($68,000) was not paid. He had worked for the United Church of Christ for 27 years in Marawi.

It was not known if the ransom was paid to the rebels, who want self-government in Moslem areas of the predominantly Christian Philippines.

Pope Sees Mobutu

VATICAN CITY, March 29 (AP) — Pope John Paul II met today with President Mobutu Sese Seko of Zaire.

Senate Delays Members' Income Limit

$50-a-Day Congress Tax Break Pushed

By Ward Sinclair and Robert G. Kaiser

WASHINGTON, March 29 (WP) — The financial burden of holding elective office — keeping two homes, buying lunch, drinks, flowers and the like — has prompted Congress to consider voting its members a $50-a-day income tax deduction. But that was only the half of it yesterday on Capitol Hill.

As a House Ways and Means subcommittee took up a bill to boost legislators' tax exemptions, the Senate was reaffirming its earlier suspension of a strict limitation on outside income.

By a 54-to-44 roll-call vote on which 18 senators switched their opposition of two years ago, the Senate suspended at least until 1983 a yearly limit of $8,625 on outside income.

The Senate vote and the House move to give U.S. and state legislators additional tax advantages seem almost certain to stir more controversy over the way Congress deals with its own finances.

Lobbyist's Criticism

Fred Wertheimer, vice president of Common Cause, the lobbying group that had pushed for strict Senate income limits, said: "In a period when the American people are being asked to make many sacrifices, the U.S. Senate has said, 'No sacrifices for us.' "

But the theme being struck in the Senate yesterday — and indirectly, at Ways and Means — was voiced by Sen. Ted Stevens, R-Alaska, who asked, "Do we have to become financial eunuchs to come to the Senate?"

One answer was offered by Rep. Dan Rostenkowski, D-Ill., who, with other House members, is pushing a bill to allow members of Congress to qualify for a $50-a-day deduction about 270 days a year, thus reducing their taxable income approximately $14,000 annually.

$3,000 Deduction Now

Members of Congress qualify automatically for a $3,000 deduction from their $57,500 annual salaries — a benefit designed to help offset the cost of maintaining residences here and at home, plus other expenses of office.

The Rostenkowski bill would let U.S. legislators deduct $50 a day for each day that Congress is in session, including weekends and days of committee hearings when neither chamber is meeting.

He estimated that the deduction would apply between 260 and 270 days a year, costing the Treasury about $2.5 million annually in lost tax revenue — an average of around $4,600 for each of the 535 members of the House and the Senate.

After a brief hearing of the subcommittee he chairs, Rep. Rostenkowski said that the bill will be voted on next week and then sent to the full Ways and Means Committee for consideration.

He said, however, that he would go along with a suggestion made by Donald Lubick, assistant Treasury secretary, that the deduction be limited to $9,000 a year — that is, $50 for 180 days.

'Sensitive Issue'

Rep. Rostenkowski said that the subject of legislators' deductions is a "sensitive issue," and Mr. Lubick agreed, but he said that there is no question of the legitimacy of allowing legislators to deduct part of their living expenses away from home as a business cost.

Mr. Lubick said that if the $3,000 deduction had kept up with inflation since it was adopted in 1952, it would be about $8,000 now. He said that the 180-day limit on a $50-a-day deduction — the $9,000 maximum — would be a fair figure to settle on.

"We are constantly criticized in the press for doing something for ourselves," Rep. Rostenkowski said, but he added that he thought the public would be understanding about the legislators' needs.

"I'm sure the Treasury proposal will be acceptable," he said, "but there will be many questions. I like the 180-day split — you make it easier for a member . . . he has no records to keep [for itemization]."

Rep. Ken Holland, D-S.C., a subcommittee member, said that the legislators' major expense is maintaining two residences. "It's a political necessity to have a home in your district — it's a hell of an issue if you don't," he told Mr. Lubick.

U.S. Intensifying Probes Of War Criminal Suspects

By Warren Brown

WASHINGTON, March 29 (WP) — The Justice Department announced yesterday that it is intensifying its efforts to investigate and prosecute suspected Nazi war criminals living in the United States.

The announcement marked a significant victory for Rep. Elizabeth Holtzman, D-N.Y., who for five years has been urging the government to beef up its war criminal investigations.

It was largely at Rep. Holtzman's insistence that the Carter administration, in July, 1977, established a special litigation unit in the U.S. Immigration and Naturalization Service on suspected war criminals. But Rep. Holtzman, chairman of the House subcommittee on immigration, refugees and international law, has accused the administration of underfunding the unit and otherwise giving low priority to finding persons "charged with horrendous crimes against humanity."

Associate Attorney General Michael Egan, who has responsibility for INS matters, acknowledged before Rep. Holtzman's subcommittee yesterday that the government has not done all it could to push Nazi war criminal investigations. He said that the government is taking five major steps to improve its performance.

They are:

- Appropriating the full $2,052,000 that Congress authorized for the special litigation unit's operation in the current fiscal-year (the Justice Department had given the unit only $900,000 of the authorized amount).
- Requesting an additional $2,052,000 for the Nazi war criminal unit for fiscal 1980.
- Transferring the special litigation unit from INS to the Justice Department's criminal division.
- Adding 15 investigators to the special litigation unit, which only has two investigators.
- Hiring an administrative officer for the unit to help alleviate bureaucratic problems.

Mr. Egan said that the special litigation unit is being transferred out of INS to place it under the direct supervision of the Justice Department. The unit "has not worked out as we had hoped" it would at INS, he said.

Rep. Holtzman said that she is "gratified that the [Justice] Department is committed to fully funding and staffing the special litigation unit and to removing the bureaucratic obstacles that have hindered its effectiveness."

Introducing British Airways Club Class...

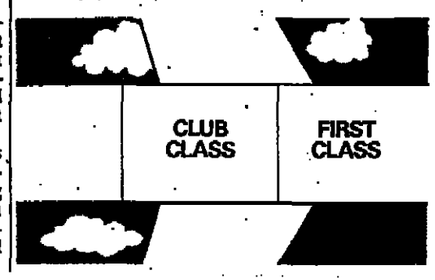
...and a great deal more for our full-fare passengers to 9 US cities.

When you pay full fare to fly the Atlantic you're entitled to extra special care and attention.

British Airways new Club Class with Elizabethan service makes sure you get it. You pay the same as you've always paid, but get a great deal more. Here are just some of the ways we take more care of full fare paying passengers on our direct flights from London to the 9 major cities of the USA.

Elizabethan Service -only British Airways has it.

As a full fare paying passenger, you'll sit in the Club Class Cabin, just behind First Class, and enjoy our exclusive Elizabethan service.



Just as cabin crew are assigned exclusively to the First Class Cabin, so you will enjoy extra attentive service from crew whose sole job is to look after Club Class passengers. From the moment they show you to your seat to the moment of touch down their only concern will be to take more care of you.

Drinks are free in the Club.

Our Club bar is open almost all the time you're in the air. And everything we've got, except Champagne, you can have for the asking! You can have a drink whenever you feel like one at no extra cost. It saves all that bother of fumbling for change or finding the right currency.

Eat as well as Queen Elizabeth I did.

Now all airline food isn't the same. As part of our Elizabethan service you can choose a menu based on authentic Tudor–16th century–recipes. Four centuries ago England's royal courtiers feasted off the fat of the land–now you can eat, in the air, every bit as well as they did.

And to wash it down enjoy authentic Mead or your choice of the finest wines. It's just another way to treat our Club Class passengers royally.

Queen Elizabeth I (1558-1603)

Queen Elizabeth I, the Virgin Queen, ruled England for nearly 50 years of the turbulent 16th century. During her reign England grew from being an obscure off-shore island, to being one of the major power centres in Europe. Here was the age of Sir Francis Drake, Sir Walter Raleigh and the young Shakespeare.

Now enjoy the film-free.

There's no better way to while away a flight than by watching a first release film or by listening to your kind of music. Our Club Class cabin passengers can do either at no extra cost –in the Club Cabin headsets are *free*.

Or you can try your hand at the fiendish puzzles you'll find in our special Elizabethan Brainteaser book.

Club Class to no less than 9 US cities.

British Airways fly direct from London to more cities in the USA than anybody else. With us you can feel pampered, privileged and special all the way to: Boston, Chicago, Detroit, Miami, Los Angeles, New York, Philadelphia, San Francisco and Washington.

British Airways new Club Class with Elizabethan service is designed to give you a great deal more without costing you any more. Your travel agent or British Airways office has all the details...so the next time you pay full fare to fly to the U.S., come with us and get the special treatment you deserve.

British airways
We'll take more care of you

To Get Multimillion-Dollar U.S. Contracts

Furniture Firm Reportedly Bribed GSA Inspectors

By Ronald Kessler

WASHINGTON, March 29 (WP) — Art Metal-USA Inc., which sells $25 million worth of office furniture a year to the General Services Administration, has been paying bribes to GSA inspectors so they will certify that the furniture meets government standards, a former Art Metal employee has acknowledged.

Statements from the employee have been obtained by the Senate Governmental Affairs Federal Spending subcommittee. The panel has been trying to determine why Art Metal has consistently received multimillion-dollar GSA contracts despite repeated, formal complaints about the substandard quality of the company's metal furniture.

The subcommittee has found evidence that Art Metal has been siphoning off $100,000 to $200,000 a year in cash in the last several years from its operations and hiding the payment in its books, according to government sources.

After obtaining the new evidence, investigators for the subcommittee, headed by Sen. Lawton Chiles, D-Fla., confronted a former Art Metal employee, who had worked in Art Metal's comptroller's office. He said that some of the money was used to bribe GSA employees and that he played a role in handling the cash, the sources said.

He named at least two GSA inspectors who allegedly were recipients of the money, according to the sources.

Largest Supplier

Art Metal, the government's largest supplier of metal office furniture, has repeatedly been the subject of complaints from government agencies that its products arrive with tops peeling off, rusty or peeling finishes, and drawers and locks that do not work. GSA officials have maintained that the furniture meets government standards and GSA must buy from Art Metal because it invariably submits the lowest, and frequently the only, bid.

Because Art Metal's contracts require high-level approvals within GSA, the subcommittee's findings are regarded by those investigating GSA as one of the most significant developments in continuing GSA investigations.

"The presumption is that the evidence obtained so far will lead to higher-ups in the agency," an investigator said. "It's the break we've been looking for."

Concealing cash payments in a company's books could be a violation of tax laws, securities laws, and a 1977 criminal law that requires firms to keep accurate financial records.

Officials of Art Metal, a Newark company whose stock is publicly traded, did not return telephone calls made by a reporter over the past several days. Touche Ross & Co., which issued a favorble report on Art Metal's book for the firm's 1977 fiscal year, said it could not comment on the subcommittee's findings.

Last fall, GSA's internal investigators had technicians examine some of Art Metal's products. They reported that they did not meet the GSA specifications that other bidders were required to follow.

'Innuendoes, Rumors'

Subsequently, Philip Kurens, Art Metal's president, was asked to appear before a hearing of the Chiles subcommittee. Mr. Kurens said Art Metal had been maligned by "*innuendoes, rumors and half-truths*" in the press.

He invited Sen. Chiles to visit Art Metal's plant and inspect its books. Sen. Chiles accepted the offer and assigned Peter Roman, who has headed the subcommittee's investigations into the GSA scandals, to form a special task force.

The task force visited Art Metal's plant and looked at its books. Last December, the subcommittee subpoenaed the financial records of Art Metal and Spiegel Trucking Co., a Harrison, N.J., company that delivers some of Art Metal's products to GSA.

The subcommittee's auditors found that $100,000 to $200,000 a year in checks written to Spiegel by Art Metal never ended up at that firm. The investigators found no evidence that Spiegel had ever billed Art Metal for the services allegedly paid for, according to sources. Instead, the auditors determined that the checks had been cashed rather than deposited in a bank account.

In its 1977 fiscal year, Art Metal reported a profit after taxes of only $75,187 on revenues of $ 31.5 million. Of those revenues, $25.5 million came from GSA. The company has not paid dividends to stockholders for a number of years.

Nightclub Fire Kills 15 in Philippines

MANILA, March 29 (UPI) — Fifteen persons died as a fire destroyed Manila's Casanova nightclub early today, police said.

Most of the victims, police said, were women working in an upstairs massage parlor that did not have a fire exit.

Stolen Canvases, Found in U.S., Revert to France

NEW YORK, March 29 (AP) — After a three-year search by French police, Scotland Yard and agents of the U.S. Customs Service, $300,000 worth of stolen paintings were returned yesterday to the French government.

"We are extremely grateful for this marvelous international cooperation," said Gerard de La Villesbrunne, French consul general, after he received 25 works of art from Edward Coyne, regional director of investigations at the U.S. Customs Service.

The works, mostly 19th-century watercolors and drawings, will be sent to Paris and eventually back to their owners, a Paris-based gallery and a private collector.

They were recovered after they apparently had been sold to various galleries in the United States, which investigators declined to name. One was found in Chicago, another in Philadelphia, the rest in several New York galleries.

15 Hurt in Montana In Train Derailment

HAVRE, Montana, March 29 (AP) — Fifteen persons were hospitalized yesterday after an Amtrak train was derailed about 14 miles east of here, officials said today. None of the injuries was described as serious.

Nine cars of Amtrak's Empire Builder train, en route from Seattle to Chicago, was derailed. Railway officials said the train carried 60 passengers and a crew of about 30. The cause of the derailment was not known, but authorities said that a heavy snowfall in the area may have contributed.

French Soldier Dies in Lebanon

TEL AVIV, Israel (UPI) — A French soldier with the UN force in Lebanon was killed today in a skirmish between the UN troops and Christian militiamen. Another French soldier was wounded in the battle.

A UN spokesman said that the militiamen fired about 1,000 machine-gun rounds and five anti-tank shells on the headquarters of the UN Interim Force in Lebanon at Nacqura on the Mediterranean coast, just north of the Israeli border.

The spokesman said, "The French returned the fire, but on a much lower scale." He said that the clash followed an argument between UN officers and leaders of the Christian militia.

Associated Press

Hustler magazine owner Larry Flynt arrives at the courthouse in Atlanta for closing arguments in his obscenity trial.

U.S. Magazine Owner Convicted On Georgia Obscenity Charges

ATLANTA, March 29 (UPI) — Hustler magazine owner Larry Flynt was convicted yesterday on 11 obscenity charges and was sentenced to a year in prison and fined $27,500.

The jury of four women and two men deliberated for nearly 10 hours before finding Mr. Flynt guilty on the 11 misdemeanor charges. Judge Nick Lambros said that he would suspend the prison sentence on the condition that Flynt pay the fine and keep his magazines, Hustler and Chic, out of Georgia.

Mr. Flynt's lawyer, Herald Fahringer, immediately appealed and posted a $27,500 appeal bond.

Mr. Flynt said after the trial that Hustler and his other publications would continue to be sold in Georgia despite Judge Lambros' order. "I'm not saying future isssues will be obscene," Mr. Flynt said, adding that he did not expect a drastic change in format.

Mr. Flynt, who calls himself a "born-again" Christian, is appealing a 1977 conviction in Ohio, where he was sentenced to 7 to 25 years in prison for engaging in organized crime and pandering to obscenity in connection with the publication of Hustler. Mr. Flynt and Hustler magazine also were fined a total of $21,000 in that trial.

"I got off easier this time than the last time I was in Georgia. I've got something to smile about," said Mr. Flynt, who was partially paralyzed when he was shot last year by a sniper during a break in a similar trial in nearby Gwinnett County. A mistrial was declared in that case.

Mr. Flynt charged after the trial that there had been "collusion" between the prosecutors and Judge Lambros, and said that the jury did not represent Fulton County. A fair decision cannot be reached "anytime you wind up with a jury above the average reading age that doesn't read the magazine," Mr. Flynt said.

Opposition in U.S. House Likely

Senate Backs Observers For Rhodesian Elections

By Robert G. Kaiser

WASHINGTON, March 29 (WP) — The Senate yesterday voted 67-22 to send a team of observers to next month's elections in Rhodesia, an action that some senators felt would bolster Ian Smith's regime, and others hoped would eventually help undo it.

The resolution to send the observers was opposed by Sens. Edward Kennedy and Paul Tsongas, the two democrats from Massachusetts, as well as other liberals. It was sponsored by S. I. Hayakawa, R- Calif., and George McGovern, D-S.D. Sen. Hayakawa supports Mr. Smith's white-dominated Rhodesian government and its proposed internal settlement that would lead to black participation in the government. But Sen. McGovern opposes both Mr. Smith's rule and the settlement.

Pro-Smith sentiment is strong in the Senate, and backers of his government led by Jesse Helms, R-N.C., hope that they can win a vote to lift longstanding economic sanctions against Rhodesia in the near future.

Sen. Helms, his aides and like-minded senators and staff members were jubilant yesterday at the news that James Callaghan's Labor government had fallen in London. They consider that Conservative Margaret Thatcher is a likely winner in the British elections, which would give them — and Mr. Smith — an important new source of sympathy and possible support.

Group of 25-50 Experts

The idea of sending 25 to 50 observers to Rhodesia faces serious opposition in the House, and may not reach the floor there. Without House action the idea would die.

However, an aide to Sen. Helms said that several "tax exempt organizations" were prepared to finance a mission by unnamed observers to Rhodesia if Congress failed to do so.

The pro-Rhodesian senators evidently hope that the observers would find that Rhodesia's elections were fair and free, considering the environment of civil war in which they are to be conducted, and considering the fact that some black nationalist groups are boycotting them.

If this were the finding, these senators are prepared to argue that Rhodesia has fulfilled conditions set last summer by Congress for the lifting of sanctions. The United States has a ban on trade and other dealings with the Smith regime in conformity with UN resolutions.

But Sen. McGovern regards the mission of observers as the best way to head off the lifting of sanctions, according to an informed source. He is said to believe that Senate sentiment for lifting sanctions is very strong, and that only a report from experts showing that the Rhodesian election was far from free and unfettered could prevent a Senate vote to lift them.

Sen. Helms is trying to pressure the House to act favorably on the observer mission by threatening to seek to lift sanctions in the Senate at once if the House fails to act. Whether this threat will be effective is uncertain. The House would still have to agree to the lifting of sanctions.

The resolution approved by the Senate calls for spending $250,000 for an observer team and security assistance for it.

Critics questioned whether any such team could operate effectively in Rhodesia since so much of the country is now insecure, with airplanes being shot down and guerrillas controlling large pieces of territory.

Sen. Tsongas also argued that the black nationalist guerrillas appear to be winning the civil war in Rhodesia, are determined to interfere with the elections, and are destined to prevail in the long run whatever the United States does.

Sen. Kennedy noted that no other government is sending observers (a situation that could change if the Conservatives come to power in time in Britain), and that the UN Security Council has asked members to stay away. Sen. Kennedy said that there was "every reason to believe" that black Rhodesians would have rejected the constitution on which these elections are based, had they been given a chance to vote on it, which they were not.

Announcement Delayed

SALISBURY, Rhodesia, March 29 (Reuters) — Rhodesia today postponed announcement of the exact dates of the elections for security reasons.

A spokesman said full dates, which were due to be released tomorrow, will not be published until April 6.

The official date set when the elections were postponed from Dec. 31 was April 20. But informed sources said that they expected the voting to be staggered over a week to aid the security forces.

Amin Said Going North

(Continued from Page 1)

last-minute effort to save Marshal Amin's eight-year dictatorship in which an estimated 300,000 persons were killed by supporters of his regime or simply disappeared, according to an independent judicial report.

In ground action, explosions were reportedly heard in Kampala, with firing, including "some tank fire" on the outskirts. There also was heavy firing during part of the day at Entebbe, the site of Marshal Amin's statehouse.

Highway Attacked

Exile sources said that the Tanzanians had also attacked and possibly cut the main highway linking Entebbe and Kampala, but this was not confirmed. The Tanzanians were reported to be meeting virtually no resistance from forces loyal to Marshal Amin.

Kampala residents said the main highway between the capital and the Entebbe International Airport was jammed with troops and civilians trying to flee both places.

Wives and children of UN employees in Kampala were to begin evacuating Kampala to escape the pincer attack by the invaders.

Tanzanian officials several days ago said that they might delay the military advance on Kampala for days or even weeks for "political considerations," but they may have decided to step up their schedule because of Libya's threat of intervention.

Convict Flees Jail and Wife

SAN QUENTIN, Calif., March 29 (UPI) — A prisoner having a conjugal visit with his wife in the family visiting quarters of San Quentin Prison escaped — leaving his wife behind.

A prison spokesman said convicted robber Michael Grant, 29, was nowhere to be found at the morning check yesterday. His wife said she last saw him at 1 a.m., just before she went to sleep.

Schmidt Sets Latin Trip

BONN, March 29 (AP) — Chancellor Helmut Schmidt plans to leave Tuesday on a 10-day tour of Brazil, Peru and the Dominican Republic.

Andreotti Refuses Votes Of Extreme-Right Party

(Continued from Page 1)

France and West Germany, respectively, will affect the Italian voters. The Christian Democrats also calculate that a large centrist vote in other countries will help them.

The European election may reflect unfavorably on the Italian Communists to the extent that the idea of European unity and Western values has long been interpreted as being anti-Communist. Also, the Italian Communists are much more powerful in Italy than the other European Communist parties are in their nations.

National Democracy

Italian politicians maintain that, for that reason, other European Communists may benefit from a large Communist vote in Italy but not vice versa. The Senate is expected to vote on Mr. Andreotti's government Saturday night or Sunday. If the premier is defeated there, the chamber will not have to vote.

The National Democracy, the party whose vote Mr. Andreotti refused, has 9 seats in the 315-member Senate and 18 in the 630-member Chamber of Deputies. On paper, at least, this could make the difference in either house. The members of the National Democracy split from the Italian Social Movement, which is generally described as neo-Fascist, in a leadership quarrel about three years ago.

Mr. Scheftini, the man assassinated today, was a member of the Rome regional government and the manager of a real-estate firm. A few months ago, he was involved in a quarrel with tenants whose eviction he had obtained from the courts. The tenants staged street demonstrations against him.

The Red Brigades and affiliated terrorist organizations often have chosen victims that had been involved in social disputes. An anonymous caller identifying himself as a member of the Red Brigades claimed responsibility for the killing in a call to the Italian state radio and television network. The killers, including a woman, escaped.

Some Psychiatric Drugs May Damage Fetal Brains

By Harold M. Schmeck Jr.

NEW YORK (NYT) — Some drugs taken by pregnant women as treatment for serious mental illness might cause permanent changes in the brains of their children, according to scientists who have conducted experiments on animals.

The broad class of drugs involved in the studies has been in use in the United States since the mid-1950s, and there may be millions of Americans alive today who were exposed to them before birth.

In most cases, the drugs are taken by those under treatment for serious mental illness. But at least one of them, Compazine, is also taken by normal women who suffer from serious and persistent nausea during pregnancy.

Unlike most unintentional drug effects, the changes caused by these substances might be beneficial in many cases, said the senior member of the research team, Dr. Arnold Friedhoff of the department of psychiatry at New York University School of Medicine.

"This is the first fetal drug effect that I know of in which there is the possibility of some benefit instead of harm," he said. The hypothetical benefit, which the scientist believes should be studied, is that some drugs given in pregnancy to a psychotic mother might reduce the risk of her child becoming mentally ill.

Important Drugs

The research involves drugs of a type that includes most of the important ones used in treating psychosis, among them, chlorpromazine and haloperidol.

Dr. Friedhoff and his colleagues consider the experimental results both intriguing and potentially important because of the light they may shed on brain development and function and on the actions of drugs.

All suspected risks and benefits are hypothetical now, he emphasized, because so little is known about the effects of the major antipsychotic drugs in pregnancy.

A report of the new research appears in the March 16 issue of Science, the weekly journal of the American Association for the Advancement of Science. The report is by Dr. Helen Rosengarten, with Dr. Friedhoff as co-author.

Studying the effects of major anti-psychotic drugs on the brains of rats, the scientists observed in earlier research changes that gradually reverted to normal when the drug use was discontinued.

Commonly Used Drug

They had been giving adult rats the commonly used anti-psychotic drug, haloperidol, which blocks the use by the brain cells of dopamine, one of the more important chemical transmitters of signals from nerve cell to nerve cell.

Dopamine is known to have a major influence on the proper control of physical movements. The nerve signal transmitter is also thought to be a factor in higher mental activity. Things that influence the chemical's use in the brain are therefore of great potential importance.

Many scientists suspect that some excess in the brain's production or use of dopamine is a key factor in schizophrenia, the most widespread and devastating form of major mental illness. The specific nature of this suggested chemical abnormality is unknown. Such antipsychotic drugs as chlorpromazine and haloperidol seem to work by decreasing that activity, Dr. Friedhoff said.

However, the shaking palsy called Parkinson's Disease appears to reflect too little dopamine action. Drug treatment that ameliorates the Parkinson patient's uncontrollable shaking appears to do so by increasing dopamine signaling in the brain.

The experiments in adult rats showed that the dopamine-blocking drug treatment caused a rebound phenomenon in the animals' brain cells. Faced with a shortage of dopamine, the cells that needed the chemical responded by generating extra receptors on their surfaces to grab whatever dopamine was available.

Receptors, as the name implies, are structures on cell surfaces that recognize and make contact with a particular chemical among the myriad to which the cell is exposed. The effect is much like a key fitting into a lock to turn on an important process in the cell. The receptor is the lock: The chemical — dopamine in this case — is the key.

An obvious and unanswered question was what would happen to dopamine receptors in the presumably more plastic brain of a fetus exposed to the same kind of drug. To find the answer the scientists gave haloperidol to pregnant rats, then studied the rat pups.

"To our surprise," Dr. Friedhoff recalls, "rather than getting an increase we got a very severe decrement in the number of receptors." Even more interesting, a relative deficiency in dopamine receptors persisted into the animals' adulthood. Furthermore, studies of the animals' behavior showed they were affected by the difference.

"If the child is born to a schizophrenic mother the possibility is at least worth considering that the drug effect might reduce the risk of schizophrenia," said Dr. Friedhoff.

But the use of such a drug by normal women to cope with persistent nausea during pregnancy might carry a possible risk of Parkinson's Disease for the baby. Considering that Parkinson Disease usually does not develop before middle age, such effects would probably not have occurred by now. Dr. Friedhoff said.

United Press International

WRATH OF THE SEA — Workers clean up the ruins of a granite sea wall at Saint Malo in northwestern France after a violent storm yesterday churned a raging sea against it. Several houses were demolished and the streets flooded at high tide, but no injuries were reported.

Obituaries

Yahya Petra, Malaysia's Elected King

KUALA LUMPUR, Malaysia, March 29 (AP) — The elected king of Malaysia, Sultan Yahya Tuanku Petra, 62, died of a heart attack today at the national palace, Prime Minister Datuk Hussein bin Onn announced.

The deputy king, Sultan Ahmad Shah, 48, automatically becomes the acting king.

The king had been reported in good health, only slightly troubled by arthritis. The prime minister said that seven days of mourning have been declared. The king's body will be flown to the capital of his home state, Kota Bahru, where burial services will be held Saturday.

The king in Malaysia is a constitutional head of government. He does not have any political power. He is chosen for a term of five years from among the rulers of the nine states in the Malaysia Peninsula. Yahya Petra was the sixth king of Malaysia under the system that was put into effect after independence from Britain in 1957. He was elected and installed Sept. 21, 1975.

John F. Fitzgerald

BOSTON, March 29 (UPI) — John F. Fitzgerald, 82, the uncle and godfather of President Kennedy, died yesterday at New England Deaconness Hospital after a long illness.

Mr. Fitzgerald was the son of the Boston politician, John (Honey Fitz) Fitzgerald, and brother of Rose Kennedy, the president's mother. Mr. Fitzgerald served in the Navy in World War I and was a graduate of Georgetown University in Washington.

U.S. Voting Probes Delay Houston, Dallas Elections

HOUSTON, March 29 (NYT) — As an unusual consequence of efforts to enforce the Voting Rights Act, municipal elections in Houston and Dallas have been suspended.

Houston had planned to hold a tax-limitation referendum on April 7, and Dallas had planned to elect a mayor and city council on the same day. Both elections have been called off by court order while the U.S. courts and the Justice Department try to decide whether the two cities are violating the Voting Rights Act.

Both cities could be required to revamp their systems for electing city councilmen to give greater power to members of minority groups.

In the meantime, Houston's fiscal posture has become unclear. And in Dallas, the future of candidates for city office has been thrown into confusion. There is also concern in Dallas that the city government will be reluctant to deal with important long-term issues until the situation is resolved.

Although the issue in each city involves essentially the voting rights of blacks and Mexican-Americans, the two situations spring from different causes.

In Houston, the question before the Justice Department is whether the city diluted the voting strength of minority groups by annexing six areas adjacent to the city in 1977. More than 70,000 persons live in the six areas, which are overwhelmingly white and middle class.

Under the Voting Rights Act, Texas is one of several states where any change that affects voting must be reviewed by the Justice Department or the U.S. courts.

U.S. Military To Use Soy to Beef Up Budget

WASHINGTON, March 29 (UPI) — The Defense Department hopes to save $6.2 million a year in military eating expenses by using soy to extend hamburger and ground-beef recipes.

The department's Food Planning board approved, starting this summer, the use of a 20-percent soy-extended product in ground beef. Officials estimated that this would save the military about 22 cents a pound in ground-beef costs.

"Considering that the Department of Defense procures approximately 28 million pounds of bulk ground beef annually," an announcement said, "this action could reduce the annual food bill by $6.2 million," without any loss in nutritional value.

Asked if the soy extender would also be used in the Pentagon's executive dining rooms, a spokesman said, "it tastes that way now."

Swiss Develop Typhoid Vaccine

BERN, March 29 (AP) — Swiss researchers reported today that they have successfully tested a new, highly efficient oral vaccine against typhoid fever.

The Swiss Serum and Vaccine Institute said that the vaccine was developed during the past 10 years by genetic modification of the typhoid bacillus.

It said that clinical tests in several countries, including a one-year field test in an endemic region in the Middle East, proved the "outstanding protective effect" of the vaccine. In the field test, none of those vaccinated contracted typhoid, while there were numerous cases among the nonvaccinated control group, an announcement said.

Strike for Self-Rule Held in S. Belgium

LIEGE, Belgium, March 29 (Reuters) — Government offices and industry in Wallonia, the southern half of Belgium, were paralyzed today by a one-day strike in support of a shorter working week and self-rule for the area.

In Liege, major manufacturing plants were shut and public offices closed. Most buses and trams were idle in nearby Namur. The strike was called by the French-speaking wings of the Catholic Union Confederation and the General Labor Federation to demand fulfillment of long-delayed plans to divide Belgium into three semi-autonomous regions, Wallonia, Flanders and Brussels.

South African Speaker Tarred And Feathered

PRETORIA, South Africa, March 29 (Reuters) — A Pretoria University professor was tarred and feathered last night as he attempted to deliver a lecture at a theological conference.

Floors van Jaarsveld was scheduled to talk on the significance of the Day of the Covenant — the annual commemoration by Afrikaaners of the defeat of the Zulus at the Battle of Blood River. He had planned to say that observation of the day should not be forced on all races.

As he began to speak, about 35 men, thought to be members of the conservative Afrikaans Resistance Movement, marched onto the dais. Mr. van Jaarsveld said at first he thought that they were press photographers and smiled at them. The men then surrounded him and ripped off his jacket. Tar was flung over his face, chest and feet. "A shower of feathers followed," he said.

His attackers then left. He attempted to continue his lecture but finally gave up. Police have charged the men with assault.

Greece Bans Genocide Film

ATHENS, March 29 (AP) — A Greek film similar in intention to the "Holocaust" series on Nazi extermination of the Jews, but depicting Turkish genocide of Greeks and Armenians, has been banned by the Greek government to avoid further disturbing relations with Turkey.

A spokesman for Foreign Minister George Rallis confirmed yesterday accusations by the film's producer, Nikos Koundouros, that the government prevented its distribution to avoid arousing public feeling against Turkey and hindering a peaceful settlement of differences.

The spokesman said that Foreign Ministry officials saw the film in a closed session and decided that it did not correspond to today's situation or feelings. He added that the objections to the film are in line with the Greek policy of avoiding provocations.

Western Economic Talks

PARIS, March 29 (UPI) — The world's major non-Communist industrial powers — the United States, Britain, France, West Germany, Canada, Italy and Japan — will hold an economic summit meeting June 28 and 29 in Tokyo, it was announced here today.

Guerrillas Attack Nicaraguan Posts

MANAGUA, March 29 (UPI) — Leftist guerrillas attacked several National Guard patrols and positions in three Managua neighborhoods last night, authorities reported.

At least 40 deaths from clashes between the National Guard and the guerrillas have been reported in scattered fighting throughout the country since Saturday.

Russians Call Him a Mental Case

Embassy Visitor Said to Die After Blast

From Wire Dispatches

MOSCOW, March 29 — A Soviet citizen who apparently blew himself up in the U.S. Embassy as Soviet security forces attacked him last night, had been held for six months in a Moscow psychiatric hospital last year after threatening a murder, Soviet sources said today.

The sources identified the man as Yuri Vlasenko, a Ukrainian born in 1950. U.S. sources said that he was badly burned when he left in an ambulance last night. Today, a Soviet medical source said that he had died.

It was believed that Mr. Vlasenko was related to a Soviet employee of the embassy, and entered it in the company of consular official Robert Pringle. Observers said that the embassy was now expected to review its policy of meeting Soviet citizens outside the embassy grounds.

U.S. sources described Mr. Vlasenko as "obviously unbalanced." He was "very calm — kind of strange," a witness recalled. Mr. Vlasenko reportedly had said that he was a Soviet merchant seaman, that he hated Soviet President Leonid Brezhnev, and he wanted to "set an example for the dissidents."

When told that he would need Soviet exit permission before he could go to the United States, he threatened to explode a bomb strapped to his waist, and insisted on staying at the embassy until emigration was arranged.

He had arrived at 2:30 p.m. The decision to call in Soviet help was made about half an hour later, sources said. Ambassador Malcolm Toon justified the decision on the grounds that Mr. Vlasenko appeared to be mentally ill, was endangering U.S. lives and property, and was a Soviet citizen.

A Soviet negotiator arrived at 4:30 p.m. and tried to talk the man into leaving. Soviet security forces later fired tear gas, and then at least one gunshot through a window shortly before 11 p.m. At this point, in Mr. Toon's words, Mr. Vlasenko "blew himself up."

The bomb caused no known structural damage to the consular section, which was littered today with shattered glass. U.S. Marines stood guard amid a strong smell of tear gas. Employees were moved to other offices for several days.

Naples to Get EEC Assistance

BRUSSELS, March 29 (Reuters) — Naples will become the focus of a European Economic Community pilot plan to bring together national, local and international aid for poorer regions of the EEC, Regional Affairs Commissioner Antonio Giolitti said.

He said that Naples would receive between 1.2 trillion and 1.5 trillion lire ($1.4 billion and $1.8 billion) in EEC loans and grants during the next five years. Naples Mayor Maurizio Valenzi said that the money would go toward redevelopment plans in the city and the surrounding Campania region.

Housing is a major priority he said. Overcrowding and poor sanitation have been cited as chief causes of Naples' high infant mortality rate. Mr. Giolitti also said that a large part of the money would be used in restructuring a nationalized steel plant at Bagnoli outside the city.

Oil Sludge Nearing Coast of Sweden

HELSINKI, March 29 (AP) — Easterly winds were pushing oil-saturated sludge toward the Swedish coast in the northern Baltic, the Finnish Maritime Board reported today.

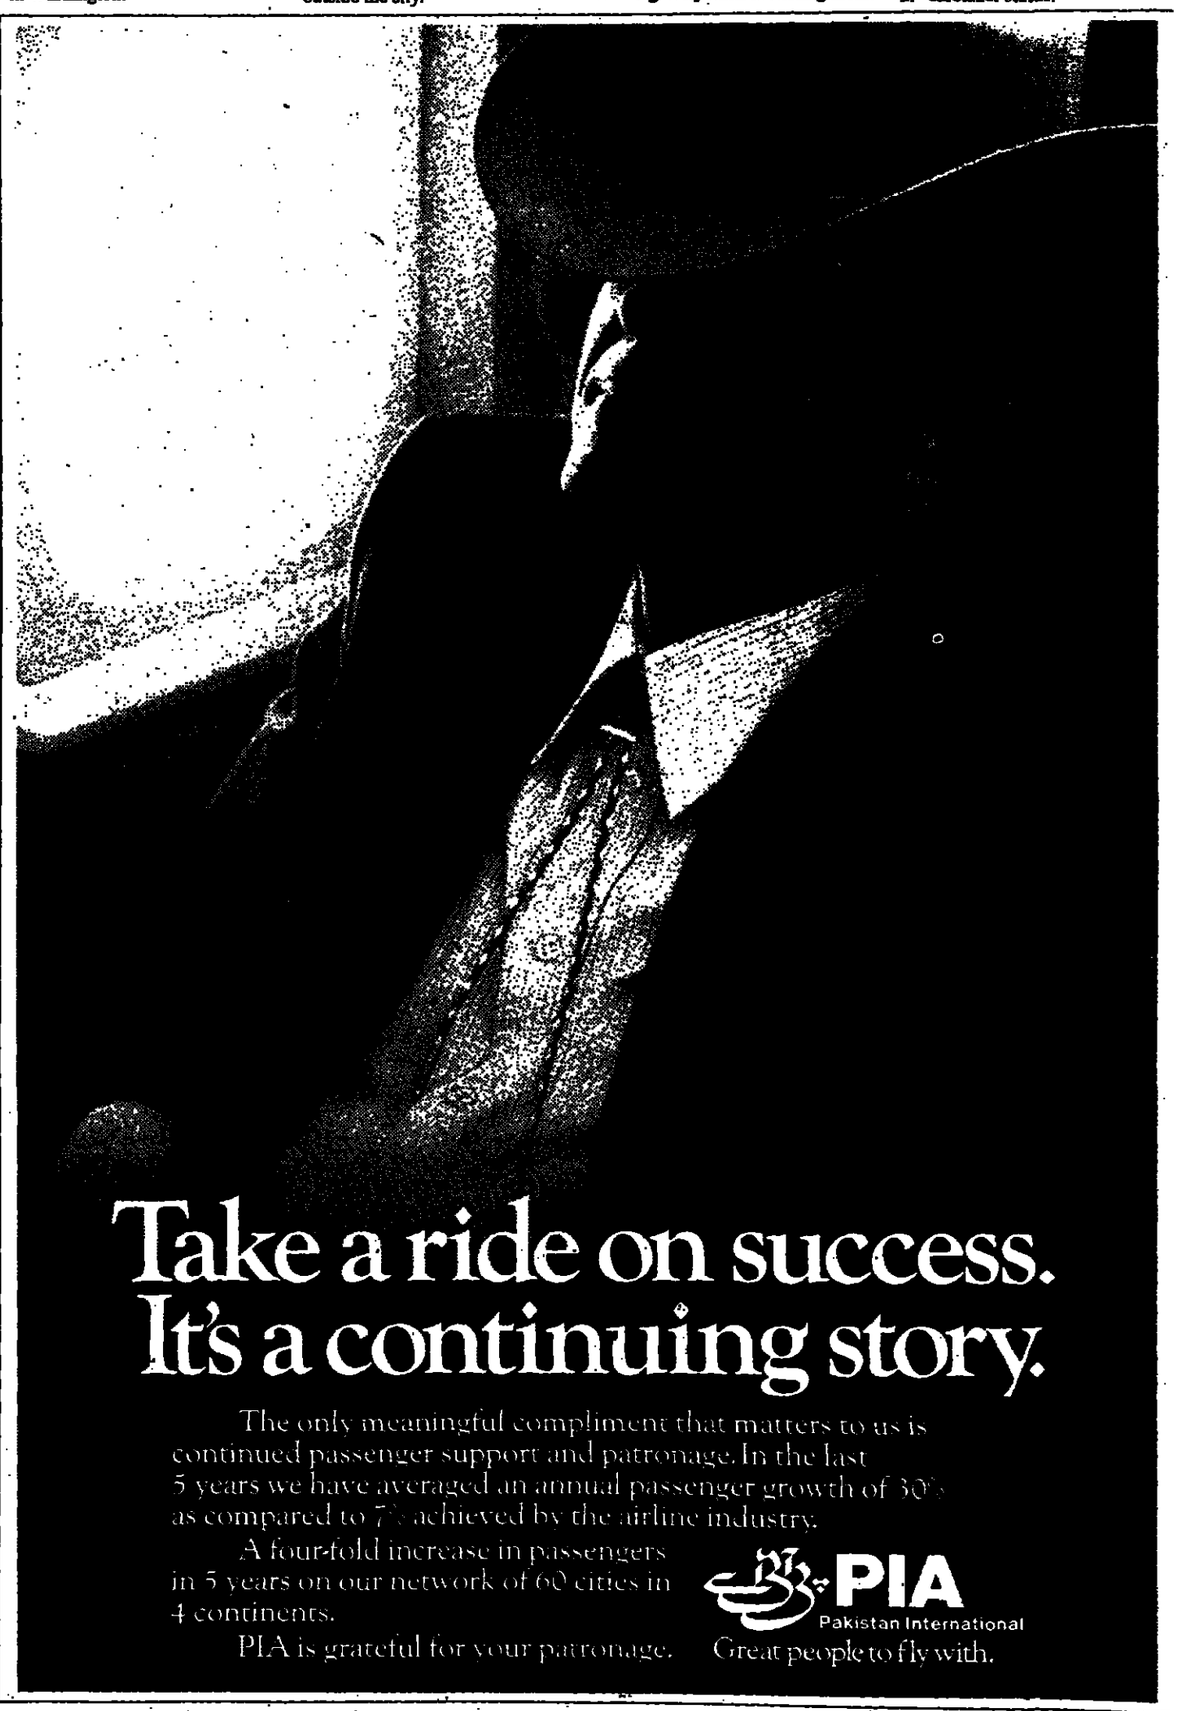
The oil slick, presumably originating from a Soviet tanker that ran aground off Lithuania last month, was threatening the Aaland Archipelago and hundreds of thousands of migrating water fowl just starting to fly back to nesting areas.

Pentagon Plans To Shut Ft. Dix

WASHINGTON, March 29 (NYT) — The Defense Department said yesterday that it would "deactivate" Fort Dix in New Jersey, eliminate 3,200 civilian and military jobs there and transfer more than 6,000 recruits to bases in other parts of the country.

The disclosure of the Pentagon's plans came on the eve of a long-awaited announcement by the Defense Department to undertake a range of nationwide "realignments" designed to save $250 million.

At present, Fort Dix is primarily a facility for basic training. As such, its personnel numbers more than 12,000, half of them recruits in training. The Pentagon move would strip the base of its recruits, along with about 2,400 military and 800 civilian personnel. Remaining would be 3,000 personnel to handle reserve activities and keep the base in "caretaker status."



Take a ride on success. It's a continuing story.

The only meaningful compliment that matters to us is continued passenger support and patronage. In the last 5 years we have averaged an annual passenger growth of 30% as compared to 7% achieved by the airline industry.

A four-fold increase in passengers in 5 years on our network of 60 cities in 4 continents.

PIA is grateful for your patronage.

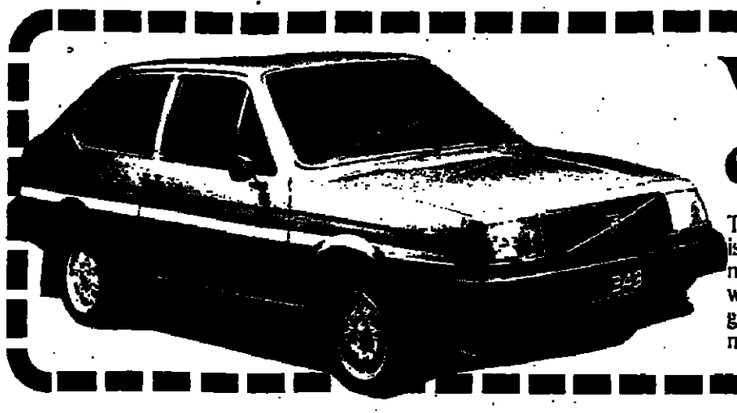
Great people to fly with.



Volvo's little green giant could be yours at a unique price!

This spring-fresh version of the amazingly roomy Volvo 343 is specially designed for the season! In metallic green with matching two tone stripes it really stands out. So does the wealth of extra equipment which comes as standard. And its genuine Volvo qualities: the safety and reliability, the value for money and the true driving pleasure!

If you are travelling or living abroad for a longer period you may qualify for a special offer. This means that Volvo's little green giant can be yours at a unique and very favourable price! For further information, just send us the coupon or contact your nearest Volvo dealer!

To Volvo Car Corporation, Tourist & Diplomat Sales, S-405 08 Göteborg, Sweden.
Please send me more information on ☐ Volvo Tourist & Diplomat Sales ☐ Volvo 343.

Mr. Callaghan's Fall

Prime Minister James Callaghan has lost his gamble. Last summer he decided not to hold autumn elections, in hope that his Labor Party's fortunes might improve over the winter. But it has been a wretched winter for the British, endless months of strikes and rising dissension. Then Mr. Callaghan decided against a spring election in the hope that something might turn up over the summer. But he presided over a minority government, sustained in power only through a succession of fragile deals with the political fragments that have begun to be an important part of British parliamentary life. Now the last of the deals has collapsed. The Callaghan government has been brought down — by a margin of one vote — and the country goes into an election that the opposition Conservative Party will very probably win.

In that case Margaret Thatcher will become prime minister. The prospect for any great movement of national reconciliation does not seem, on the whole, very bright. Mrs. Thatcher's supporters defend her by saying that in office she would not prove so rigid and doctrinaire as she might appear at present. That's a thin sort of reassurance.

The crucial test of Mrs. Thatcher's skill will be her relations with the labor unions. The large achievement of Mr. Callaghan's tenure was the successful series of voluntary wage agreements into which he drew the unions. From an inflation rate of nearly 30 percent four years ago, those agreements had brought the country down to a rate of 7 percent last autumn by the time they began to become unraveled.

Over the past couple of years, the Callaghan government's preoccupation with inflation and its eroding strength have led it to shunt aside other pressing issues. The unhappiest example is Northern Ireland, where terrorist campaigns continue. No one has yet found the common ground between the Catholic and the Protestant communities there; all the political initiatives of the past decade have collapsed. Losing faith in constitutional reform, the Callaghan government relied increasingly, by default on the police and the troops to deal with the terrorists. But the terrorism continues and, inevitably, the evidence of police brutality is increasing. It would be pleasant to think that Mrs. Thatcher might bring another approach to the ancient divisions of Northern Ireland. But if she has anything in mind, she's keeping it to herself.

Britain, divided and perplexed by its own accumulated troubles, seems to have turned inward. The art of government there has come upon a slack period, as it does occasionally in all countries. As in other arts, when rewards decline, the breadth of inspiration and the quality of performance can be expected to suffer. This kind of decline is not likely to be permanent. But neither is it likely to be reversed in the months immediately ahead.

THE WASHINGTON POST.

An 'Eventual Alliance'?

To Israeli Prime Minister Begin, the U.S.-Israeli "memorandum of agreement," listing U.S. undertakings accepted in connection with the peace treaty between Egypt and Israel, is a "beautiful document." So far unpublished, it evidently is a kind of U.S. safety net under the treaty, committing the United States essentially to consider certain steps, including military ones, if the treaty is violated. If the memorandum was indeed required — as we are inclined to believe it was — to bring Israel to the signing, then any comments about it must necessarily be subdued. The memorandum, we note, did not keep Egypt from signing the peace treaty, as unhappy as Cairo now turns out to be.

But the memorandum does give concern. As Egypt officially reads it, its unstated premise is that Egypt is not entirely trustworthy. The Egyptians complain that the memorandum "could be construed as an eventual alliance between the United States and Egypt." At the least, it raises the question of whether the United States has committed itself to examine the question of violations (Egyptian violations) partly through Israeli eyes. Egypt asks whether, in light of the memorandum, the United States "could be accused of collaboration with Israel to create such circumstances that would lead to U.S. military presence in the area," and whether the document might "pave the way for other alliances to be formed in the area to counter the one whose seeds could be found in the proposed memorandum."

This administration, like its predecessor, has always known that one result of trying to bring peace to the Mideast would be the enlargening of the U.S. role in the area in order to steady and broaden that peace. We think the United States has no other responsible choice. Yet U.S. officials have been reluctant to talk much out loud about this prospect, and the upshot is that not many Americans are fully ready to cope with the new role. Everyone realizes it will cost more money; that is the easy part. The tough part lies in political assurances of the sort that the president seems in this memorandum to have given.

We do not say there is no good reason, or no good explanation, for the new memorandum. On the contrary, we think it offers assurances essential to Israel's embrace of the peace treaty. But the assurances will have diminished value, and the president will have bought himself a pack of trouble, if he does not promptly spell out what he has in mind. Most Americans, we believe, are eager to do what is necessary to make the new peace treaty work and to bring other Mideast parties into it. The hint in the new memorandum, however, is that Mr. Carter may have compromised future U.S. freedom of action — without informing the U.S. people. In fact, there is a sense in which it may have been virtually impossible to give the Israelis, and for that matter the Egyptians, the various commitments they needed to sign a treaty without compromising U.S. flexiblity in some measure. But that needs to be talked out too.

THE WASHINGTON POST.

Who Gets the Oil Money?

OPEC's decision to raise oil prices by only 9 percent has been widely interpreted as a victory for a U.S. friend, Saudi Arabia. With such friends, who needs enemies?

To be sure, the new minimum price of $14.55 a barrel is far less than the $18 sought by some exporters. But under the formula agreed upon at Geneva, each member of the cartel is free to add a surcharge of whatever the market will bear. Thus, unless the United States takes immediate measures to increase domestic oil production and reduce consumption, U.S. oil policy will continue to be made in Tehran and Riyadh.

With current world consumption of petroleum very close to the current capacity to pump it, the slightest production restraint by just a few exporters is all that is needed to make a big price surcharge stick. The price hawks within OPEC — Iran, Iraq, Libya and Algeria — all say they will withhold the necessary amounts of oil to hold up the price.

Saudi Arabia, possessing the greatest production flexibility, could frustrate their plan by increasing its exports. But the Saudis appear reluctant to take an active role in keeping oil prices down. Hence, if the importing nations are to recapture any price leverage over the oil cartel, they must reduce imports by 5 to 10 percent, a critical 2 to 4 million barrels per day that spell the difference between tight and ample world oil supplies.

Of all the ways the United States could do its part in paring imports, the decontrol of domestic oil prices by presidential order would be the simplest. Allowing the average price of U.S. crude to increase from $9 a barrel to the world price would encourage conservation and stimulate production. It would also, of course, transfer vast sums — perhaps $14 billion a year — from consumers to oil companies. But Congress could, and should, repair this inequity by taxing away part of the added profit and returning the money to the public as an income-tax rebate.

The battle for cheap energy was lost years ago. The only thing we are free to decide now is whether we give the money to OPEC or to domestic oil companies. If we let OPEC reap the profits, we depress the dollar and provide the funds that, among other things, arm the radical Moslem states. But if we pay more to domestic producers, at least we get half of it back in income taxes plus royalties for the lease of government oil land. And we would recover even more if Congress puts a tax on windfall oil profits.

Sheikh Ali Khalifa al-Sabah, the oil minister of Kuwait, believes that "the whole world should feel grateful" for OPEC's restraint. Unless we act decisively now, we shall have recurring opportunities for such gratitude in the coming years.

Seventy-Five Years Ago
March 30, 1904

PARIS — The proposed canal at Panama has attracted much comment in the American press. The Cincinnatti Enquirer, opposed to the canal, stated: "The shortest time that has been guessed at for finishing the Panama Canal is five years. Let nobody be deceived. It will require nearly that long to get the commission organized and the stationary purchased." The Pittsburg Gazette, more favorable, stated: "That the ratification of our treaty with Panama would put an end to any attempts by Colombia to overthrow Panama by force has been shown by the dispersal of the Colombia army."

Fifty Years Ago
March 30, 1929

CALCUTTA — Rumors are current along the Indo-Afghan border that the Soviet Union is planning to invade Afghanistan. Soviet troops are reported to be concentrated along the northern frontier of Afghanistan, and Afghan subjects have been forbidden to enter the Soviet Union by the Soviet authorities. Caravan leaders arriving at Peshawar report that all persons caught attempting to cross the border are being arrested and imprisoned. This last is believed to be intended to keep the Soviet plans secret until the spring thaws open up mountain invasion passes.

Moscow Draws Ire of West Scientists

By Leopold Unger

BRUSSELS — Prof. Logounov, the rector of Moscow University, made himself perfectly clear: "Mrs. Irina Brailovski has never worked on any project remotely connected to state secrets."

He made this declaration to a visiting U.S. scientist. It was a declaration that filled Mrs. Brailovski and her husband, Victor, with joy: they had been trying to obtain permission to leave the Soviet Union for seven years and for seven years they had been told that they could not leave because they held state secrets.

Mr. and Mrs. Brailovski, two Jewish scientific researchers, immediately went to see Deputy Interior Minister Boris Choumiline to inform him of Prof. Logounov's declaration.

In Writing

"I am fully aware of what the professor has said," Mr. Choumiline told the couple. "but I must have it in writing."

The next day, Mrs. Brailovski got in touch with the professor, who, told of the minister's request, replied: "If the minister wants my declaration in writing, he must ask for it officially. . ."

"Impossible," Mr. Choumiline answered when apprised of the rector's desire. "If Prof. Logounov really would like to send us his written declaration, he has all the means to do so available to him without requiring an official demand."

The Brailovski case has become a *cause celebre*. And the Logounov-Choumiline routine turns out to be more drama than comedy and a drama that had comedy and a drama that had been presented in various forms to a long series of captive audience. The Brailovskis are now, naturally, out of work, and the victims of incessant harassment, as are other Soviet foes of the regime or Jews who would like to emigrate. Further, the Brailovskis are also "guilty" of having organized seminars where the untouchables of Soviet science, condemned to mental atrophy by the regime, may maintain contact with their specialties.

Their apartment, where the seminars take place, is under the constant surveillance of the police and regularly is subjected to thorough searches. The last of these was particularly thorough: It lasted three days.

There are thousands, many less well-known than the Brailovskis, who in the Soviet Union await the end of repression and the authorization to flee. And yet, despite the harassment, their lot is comparably better than that of other scientists who oppose the regime and to whom the KGB is particularly attentive.

Two major trials took place last summer: That of Yuri Orlov, 55, a member of the Armenian Academy of Science, chairman of the Helsinki monitoring group in Moscow, who was sentenced to 12 years in a labor camp; and that of mathematician Anatoli Shcharansky, 31, who belonged to both the Helsinki group and the Movement for the Emigration of Jews. He received a 13-year labor-camp term.

The two trials were condemned in the West and drew special fire from scientific circles.

"We would like our Soviet colleagues to understand that they have overstepped the limits of what can be tolerated," declared Prof. Laurent Schwartz of the Polytechnic Institute of Paris and a member of the Institute of France. "A boycott is our ultimate weapon."

400 Frenchmen Act

Nearly 400 French physicists signed a document pledging "to suspend our personal scientific cooperation with the Soviet Union." This led Academan J. Ivanov, the director of the Physicotechnical Institute of Kharkov, to write each one of them individually to explain that Orlov was sentenced "for a common law crime." The Soviet scientist added that he hoped that the anti-Soviet "slander being disseminated in the West would have no effect on the existing good relations which contribute to increasing the knowledge of the laws of nature. . ."

Prof. Ivanov was wrong, for the French scientists stuck to their position. "No matter how important we may consider progress in research into the laws of nature, it can in no way take precedence over the elementary problems of the rights of man," they replied.

At the same time, in the United States more than 2,400 researchers have announced that they will curb or sever their cooperation with Soviet scientists until Orlov and Shcharansky are freed.

The U.S. scientists made public two declarations. One was signed by 1,750 among them and pledged "to cancel all personal participation in cooperation with the Soviet Union until the two prisoners are released." The other declaration, signed by 660 researchers, declared its opposition to any increase of cooperation with the Soviet Union and stated that the signers would boycott all international conferences or congresses within the Soviet Union. At the same time, they promised to do everything in their power to prevent the transfer of sophisticated U.S. scientific knowledge and techniques to the Soviet Union.

Backs Boycott

"The Moscow trials have convinced us that Prof. Schwartz is right," said a Western scientist who up to now had been cool to the idea of reducing scientific contacts with the East. "A boycott is our ultimate efficient weapon."

A Belgian scientist said that it had become impossible for Westerners "to support the idea of boycotting a sporting event in Chile or Argentina on the pretext that the stadiums had been used as concentration camps or were located near a prison where torture is commonplace and at the same time refuse to support a boycott of a scientific congress in Moscow which excludes a number of scientists or researchers because they are Jews or dissidents. Furthermore, if needed, the Soviet Academy of Sciences is located near the headquarters of the KGB, where Orlov and Shcharansky were held before being sent to the Gulag. And it seems to me that scientists should assume as much of a share of the moral responsibility for what is going on in the world as athletes do. . . if not more."

For this reason, Prof. Paul Cranefield, of Rockefeller University, in New York City, and Prof. Silvio Weidmann, of the University of Bern, turned down invitations to the international symposium on comparative electrocardiography, organized by the Soviet Academy of Sciences. Prof. Weidmann explained his refusal with a letter to the academy, which said in part: "You will certainly appreciate that I cannot participate in a congress held in your country while one of my most eminent Soviet colleagues — and further, a personal friend — is detained in a labor camp."

A Link

Prof. Weidmann's colleague is Serguei Kovalyov, a member of the Soviet Human Rights Committee since 1969, and a co-founder of the Soviet chapter of Amnesty International. He was arrested in December, 1974, and sentenced for "agitation and anti-Soviet propaganda" to seven years in the Gulag and three years of internal exile.

After the sentencing, 55 heart specialists from nine Western European countries addressed a petition to Soviet President Leonid Brezhnev, asking him "to devote all his attention to the case of Mr. Kovalyov, as his continued internment can only further threaten the existing scientific contacts between the West and the Soviet Union."

Pressure Group

A link between human rights and cooperation would exclude the vast majority of nations on earth, where rights are unknown, from the scientific community. Yet the Soviet Union is a special case in itself. A fully developed country for which scientific exchange is a necessity, the Soviet Union could be severely affected by a scientific boycott. Furthermore, and unlike the situation in less-developed countries, the influence of the Soviet scientific community cannot be ignored.

Scientists, researchers and intellecutals form an authentic pressure group. During the last meeting of the Academy of Sciences, the venerable academicians showed no hesitation in rejecting the candidacy of Sergei Trapeznikov on the ground of "scientific insufficiency" of his historical research. This was done despite the fact that Mr. Trapeznikov is a member of the Central Committee of the Communist Party and chief of the committee's powerful Scientific Section.

This caste of scientists, which would be the first to suffer from an international boycott, could exert a moderating influence on the Kremlin.

These scientists may have an opportunity next week to show their true mettle when the French Academy of Sciences receives its newly elected foreign associate members. Among these will be Victor Ambartsoumian, an astrophysicist, member of the Soviet Academy of Sciences and president of the Armenian Academy of Sciences, as well as a former president of the International Union of Astronomy.

He is the very same Prof. Ambartsoumian who in the past assailed Soviet dissidents in general and Prof. Orlov, a member of the Armenian Academy of Sciences, in particular. He also had unpleasant things to say about foreign scientists, particularly those in France, who tried to help their colleagues who are persecuted in the Soviet Union.

A committee of physicists organized in France after the Orlov and Shcharansky trials has protested to the French Academy over the arrival of Prof. Ambartsoumian. They said in a letter:

"Mr. Ambartsoumian has used his position to further harass his Soviet colleagues — those whom we have been defending — and to proffer lies and insults concerning French scientists. . . If you were to remain silent in these circumstances, your failure to act would be a blow to the imprisoned Soviet scientists, to their families and to all our colleagues who support them. A number of us have not forgotten that the academy refused to react when three of your colleagues were arrested by the Gestapo in October, 1940. . ."

Solidarity Test

Scientists from various nations, alerted by this letter, have made it known that they would consider the type of welcome given to Prof. Ambartsoumian as a test of the solidarity of Western scientists with their persecuted Soviet colleagues. It is now up to the Soviet academy to have the dignity to avert a boycott.

Speaking of the French physicians' initiative and that of the 2,400 U.S. scientists, a Western intellectual declared: "Never before has the scientific world reacted in so unified a way. There is no precedent, neither under Hitler nor under Stalin. . ."

But never before has the role of the scientist been so important, so significant on the world scene.

On Saving Wage-Price Guidelines

By Joseph Kraft

WASHINGTON — Are the voluntary wage-price guidelines worth saving? That is the master question as negotiations for a new contract with the Teamsters head toward a deadline this Sunday.

My strong impression is that losing the guidelines at this time would materially increase the risks of more inflation and a steep recession. So it makes sense for the government to approach the bargaining deadline in a spirit of nonconfrontation.

The renewal of the Teamster contract, that expires tomorrow, has been almost universally proclaimed as the "key test" ever since the guidelines were announced in October. For the Teamsters are the most visible of the unions.

They are not only very big (2.3 million members). They are also so bad that when you mention Teamsters people think gangsters. Since the rubber workers, electrical workers and auto workers are all due for new contracts later in the year, the theory was that any chance of maintaining wage restraint turned on the Teamster bargain.

However, events, as so often happens in economic affairs these days, have cast doubt on the theory. Contrary to most expectations, the economy enjoyed a sudden spurt (gross national product up 6.9 percent) during the last quarter of last year.

Inflation, which ran at 9 percent last year, has been running even higher in the first two months of this year. The latest profit figures, moreover, show a pattern of big increases (15 percent on the average). With inflation and profits running so high, it became very hard — indeed, well-nigh impossible — for Teamster officials to bring back to their men a contract which fell below the wage guidelines.

That difficulty in turn underlines the special character of the Teamsters as distinct from other unions. Unlike a strike by electrical workers, rubber workers or even auto workers, a trucking strike could cripple the economy. The trucking industry, unlike the auto, rubber and electrical companies, has no stomach for fighting the union. So if, as seems likely, inflation tapered off later in the year, economic conditions would make it possible to squeeze out of the other workers more restraint than the Teamster contracts showed.

In these conditions, the Teamsters have been signaling that they wanted a deal that would bring them within the guidelines while making some allowance for special conditions. To be sure, they surfaced an opening bid for an increase that cashed out at well over 20 percent. But they also pointed at all kinds of arrangements — for health benefits, for pensions, for cost-of-living adjustments — where the increase above the guidelines might be camouflaged if not entirely hidden.

So far President Carter's chief inflation fighter, Alfred Kahn, has not responded to these signals. On the contrary he has threatened the Teamsters with the one thing they fear worse than prosecution — deregulation of the industry. He has hinted that if they struck a Taft-Hartley injunction might be in the works.

Given the lack of fight in the trucking companies, a certain show of toughness is required from the government. If the settlement came out at, say, 19 percent there would be no hiding anything and the guidelines would just go bust anyway.

But if the Teamsters are in the 10 percent range, as I believe, then the administration needs to find some flexibility for accommodation — some way to meet Teamster demands and stretch regulations so the settlement is held to fall within the guidelines. If this is not done, if an all-out confrontation develops, then the guidelines will come under the kind of pressure they cannot sustain.

For almost everybody already assumes that the voluntary system will have to give way to compulsory controls. Additional trouble for the voluntary system will cause companies to go for big price increases before the fall of the ax of mandatory controls. So inflation will go through the roof.

In fact, the administration has neither the authority nor the mechanism in place for direct controls. To curtail inflation, it would have to rely entirely on monetary restriction. But applying the monetary brakes hard is the best recipe for a steep recession.

Imperfect as they are, in other words, the voluntary guidelines are worth saving. Even if that means meeting the Teamsters halfway, the price is not too high. As a cabinet officer said to Mr. Kahn at a Washington dinner last week: "Don't play chicken, when you're apt to end up s the chicken."

Letters

Wrong A-Lessons

Re "Breeders and Bombs: The Wrong Lessons" by Albert Wohlstetter (IHT, March 20):

Regrettably, the conclusions in this article are based on premises giving a distorted picture of nuclear power as a source of energy. The matter has to be seen in its right perspective.

Firstly, the historical record shows no direct correlation between the development of nuclear power and the proliferation of nuclear weapons. There has been no case where a country has used a commercial nuclear power plant for the production of nuclear explosives: During the decade 1945-1954, three countries (Britain, the United States, the Soviet Union) developed nuclear explosives; in the next decade, 1955-1964, another two countries (France and China), and in the third decade, between 1965 and 1974, one country (India).

The rate of proliferation slowed down at the same time that nuclear technology and the use of commercial nuclear power was spreading. To illustrate this, during the last two decades, the world's nuclear generating capacity grew from 5 megawatts in one country to 100,000 megawatts in 19 countries by the end of 1977. It should be indisputably clear from these figures that, over the years, there has been no relationship between the expansion of nuclear power and the development of nuclear explosives.

In fact, the two technologies, although sharing many basic principles, have diverged. The fundamental requirement for preventing proliferation is adherence to the Nuclear Nonproliferation Treaty or the acceptance of full-scale safeguards. The 104 non-nuclear weapon states, who are parties to the NPT, have forsworn any intention to develop nuclear explosives and the safeguards they have accepted provide assurance that their commitement to nonproliferation is being fully observed.

Secondly, for the majority of the developing countries, oil remains a viable major source of energy, of utmost importance possibly for the remainder of this century, and for both developing countries and industrialized countries an invaluable source for the petro-chemical industry. For each additional nuclear plant in an industrialized country, more oil is left over for these purposes. It should be realized that a big nuclear power plant saves not less than 1.5 million tons of oil per year.

Thirdly, the industrialized countries will also suffer if the promise of nuclear power continues to be frustrated. They are already facing many problems in finding alternative sources of energy supply. It is for this reason that many of them perceive the development of breeder reactors as indispensable for meeting their energy needs in the next century. This is a factor that would help in due time to release the world's uranium resources also for use by the developing countries in the form of natural uranium or slightly enriched uranium reactors.

Fourthly, present estimates of reasonably assured and estimated additional resources are below 5 million tons. Requirements of the lowest projected nuclear power programs based on proven commercial reactor types would be about 10 million tons by the year 2025, according to the latest estimates.

The introduction of breeders in the first quarter of the 21st century would substantially alleviate the situation (by 25 percent) but the major contribution of breeders would come later, when breeders could account for a larger part of nuclear electricity production, and manual requirements of uranium would then be decreased by a factor of 10. As regards the possibility of commercial introduction of breeders, one can only judge by facts: the BN 600 in the Soviet Unionis scheduled to go on line this year or at the beginning of 1980, and Super Phenix in France is due to be operational in 1983.

Finally, it is regrettable that one hears so little about vertical proliferation of nuclear weapons and the real danger to mankind from the ever-increasing nuclear arsenals. It would be more constructive at this stage to concentrate on nuclear disarmament rather than on overestimated hypothetical dangers of commercial nuclear power plants.

CARRIAGE TRADE — The new coach museum at the chateau of Vaux-le-Vicomte, near Paris, includes 15 different horse-drawn carriages and equipment, most of them from the 1860s and '70s and several newly restored. The horses and period-costumed people are wax. The museum was inaugurated this week by Count Patrice de Vogue, the chateau's owner.

Theater in Paris

Another Day for 'Around the World in 80 Days'

By Thomas Quinn Curtiss

PARIS, March 29 (IHT) — Jules Verne's "Le Tour du Monde en 80 Jours" has been around the world many times and in many forms during the last 100 years. At the Comedie des Champs-Elysees we have it now in a version translated from the Czech and presented in the manner of an intimate revue.

In 1874 the prophetic Verne, foreseeing its box-office future, dramatized his novel himself for the Theatre de la Porte Saint-Martin. Afterward it was transformed into a gigantic spectacle at the Chatelet which proved so popular that it was revived annually for 70 years, usually at Christmas. Few Parisian children of three generations missed exposure to the Chatelet's scenic wonders and it is affectionately remembered as a holiday treat.

It was inevitable that the cinema should appropriate it and there have been innumerable film editions, the most recent and largest being Mike Todd's all-star movie for the wide screen. The venerable material has been submitted to every known theatrical experiment and has withstood them all. It has been reduced to a one-man show in a Helsinki cabaret and it has been the theme for a three-ring circus, but whatever metamorphosis has been visited upon it none has robbed it of its enduring appeal.

Pavel Kohout, its latest adaptor, is known abroad for his play, "Poor Assassin," an interesting paraphrase of an Andreyev drama in which a deluded actor tries to be Nietzsche's superman in real life. It enjoyed success in New York and Paris, but Kohout's writings did not pass muster with the Soviet censors of Prague. Though once a Communist spokesman, he was tried for unorthodox opinions and served a sentence for offending. There was considerable foreign protest and he was set free and was even granted permission to go to France for the premiere here of his new work.

It — like "Poor Assassin" — is a paraphrase. Taking the main events of Verne's novel, Kohout has reshuffled them into something resembling a miniature musical comedy. It makes the world tour with streamlined decor and a cast of 11, all but the three principals doubling in many roles. Though abbreviated, it traces the outline of the famous story, taking Phileas Fogg, his aide, Passepartout, and the pursuing detective, Fix, around the globe in record time to win a London club bet.

To lend the familiar happenings some novelty, perspective and parodying humor, Fogg is Verne himself contemplating his narrative strategy with his traveling companion. Added, too, are a few cracks at capitalism, a necessary requirement in contemporary Czechoslovakia, and in San Francisco a black bootblack receives rough handling to stress racism in the United States. The decorum of the prototype English gentleman is mocked, but, unless memory fails, there was a hint of this in the original, and in moments of stress "Rule Britannia" is loudly sung.

Kohout has been assisted by Jacques Ziller, who has translated his text into French, and Philippe Bruneau, who has designed the scenic production. Jacques Rosny has directed it so the whole is in a lively mood.

The company enters into the spirit of the jest with happy zest. Daniel Ceccaldi is the adventurous Fogg — and Verne as well — Roger Pierre, a favorite comic of music-hall and television, contributes a jolly Passepartout; Jean-Pierre Darras is a tricky and often tricked heavy as the persistent sleuth, and Ariele Seminoff is both the rescued damsel of an Indian temple, always anxious for permanent attachment to some protective male, and a raging suffragette of Trafalgar Square soaphox. With amusing cafe-theater innovations Fogg's daring journey whirls again before us to general delight.

* * *

"Victor Hugo," Cocteau once declared, "was a madman who thought he was Victor Hugo."

In primitive times madmen were consigned to the dark and this may explain why Hugo's "Ruy Blas" is being performed at the Comedie Francaise as though it were taking place in a 17th-century dungeon. The baroque gloom is appropriate at the start with the weaving of the slumber theme, but the general blackout is such that spotlights are needed at times for identification of the characters.

The mise-en-scene was first in the hands of Robert Hossein who directed a vigorous presentation of Hugo's "Hernani" at the Comedie Francaise four seasons ago and who devised a Palais des Sports spectacle from "Notre Dame de Paris" earlier this year. After differences with the management, Hossein abandoned the project, which was taken over by Jacques Destoop. Pictorially its half-lights and spectral visions are in harmony with the brooding drama, but their constant employment imposes an oppressive monotony. Even the Madrid palace's great hall seems to be suffering a candle shortage.

Some forceful acting illuminates the surroundings: Francois Beaulieu's eloquent Ruy Blas, Alain Pralon's blustering Don Cesar, Genevieve Casile's gentle queen and Michel Etcheverry's sinister Don Salluste. They and the noble verse carry the evening, as they must, for "Ruy Blas" stripped of its lyrical grandeur — and of those who can recite it to profound effect — is such an extravagant 19th-century melodrama that it has been retired from foreign repertories. Though often out of sight at the Francaise it remains strong theater.

Fashion

Milan: A Matter of Honing Up Italian Style

By Hebe Dorsey

MILAN, March 29 (IHT) — Except for Fendi and Armani there was no fashion miracle in Milan this season.

One of the reasons is that Italian designers have never been very comfortable with winter styles. Summer, where they have a tradition of sun and sand, is more their beat.

Another is that this is a transition period when their main concern was softening the edges of last season's bold, and often aggressive, military look. So it was more a question of honing up a look rather than trying to upset the fashion apart.

Fortunately, Fendi saved the day and ran off with flying colors. That fur collection is the magic combination of the Fendi sisters' technique and Karl Lagerfeld's talent. The results yesterday were exceptional and provided the only real fireworks of the Milan shows.

From the brightly striped Mongolian jackets to the quilted furs in such colors as coral, ice blue or bronze, there was solid applause.

Lagerfeld applied the same shaped silhouette he invented for Chloe last season but, in fur, the results are even more spectacular, as in the short, belted broadtail jacket, its collar and peplums finished with fox.

Lagerfeld, who flew in by private jet to organize the 48-mannequin show, said he achieved that shape by putting the fur on a foam base — "which has the added advantage of acting as an insulant and making the furs that much warmer." His reversible jackets — fur on one side, quilted satin on the other — were cut narrow stripes held together by satin bows, "to get an airy, light feeling," he said.

Other Trends

Other trends included Persian lamb worked out in patterns resembling French formal gardens, tulle scarves sprinkled with fur pompons, huge pussycat bows of quilted satin or ice blue fur on otherwise serious coats, and a general reewheeling use of so called unimportant furs including ivory mole.

But outside of Armani, who now has the strongest signature in Italy, Missoni, whose name is associated with a product, and Ferre, who made a forceful if overserious collection, the rest of Italian collections were a patchwork rather than one strong, solid look. Among the recurrent themes: suits everywhere; the revival of the three-quarter coat; more pants than expected; no boots; quilting; sexy wraparound dresses; soft-looking fabrics including brushed wools, mohair, angora, suede velvet and satin and more satin; colored hose; colored gloves; tight belts verging on cummerbunds; superb leather including a lot of reversible sheepskin; discotheque glitter clothes including satin jumpsuits and a strong whiff of the '50s.

What is left of last season's strong look are broad but not aggressive shoulders, small waists and narrow hips with skirts up to the knees.

Of all the Milan designers, Armani, who just won the Neiman-Marcus award, is the one whose name can now rival the best in Paris. Steady success has not gone to his head and each new collection is a step above the last one. Armani is primarily a tailor but his clothes have been considerably softened this time. His memorable one-button, draped suit, is fastened either dead center or, even better, to the side.

Ferre's soft suit; Armani's draped suit; Krizia's sleeping-bag coat.

While his skirts were very short, Armani said that this was only for the runway. He plans to make them longer for the average customer. "The back of the knee is not exactly a pretty sight," he said.

A draped wool suit might sound bulky but Armani succeeds in dodging it by using a very fine silky tweed that had some mink threads worked into it. He liked slim, often softly wraparound skirts, but never cupping the derriere, which he finds both "vulgar and demode."

A designer who made his mark with the unstructured blazer, he goes on with a new, three-button one that is shorter and looser than his last one. He often puts it over very wide, full pants that stop over the ankles and are so soft and flowing they look more like long skirts. "I like the contrast between that strict blazer and those soft pants," he said.

Armani's one-button, long-lapelled coat was also a beauty that turned out to be exceedingly sexy when he made it out of fur in his first fur collection.

Despite a trend toward strong, electric colors, Armani stuck to his familiar, understated gamut with all shades of wood, from pale pine to deep, warm mahogany.

Commercial

Missoni was back on the scene with a strong commercial collection that will put the firm once more on the best-seller list. Taj and Rosita Missoni are pros who have achieved the near-impossible — to put shape and structure into woollies. Their neat little suits, soft and yet close to the body, are about as cued-in as you can get.

They started with the base, which is still wool but not the soft, foamy type they used in the past. Now, all their knit clothes have a firmer, flatter texture and some are made even more so with quilting backed with vinyl. While they avoided padding, as you can tell because their clothes are completely reversible, they have made broader shoulders with little tricks such as quilted shoulder pleats.

In color and texture, the Missonis were also at the top of their form. Their newest shaded patterns looked like giant stained glass windows in colors that ranged from parma to forest green.

Gianfranco Ferre, who is making a bigger impact on Italian fashion each season, brings a strict, uncompromising, understated approach to an often flamboyant scene. In a collection based on impeccably tailored, yet soft suits, his best moments were the gray flannel suits and the black and white houndstooth ones, topped by bright red jackets. Ferre has also added a line of loungewear of gray satin, gray lace and angora topcoats that is sure to have a great deal of impact on at-home entertaining. The clothes are being made in a lingerie factory recently acquired by his financial backer, Franco Mattioli.

Ferre has also been asked by the Vuitton luggage firm to act as a consultant for their new line, which is being designed by a group of Italian architects, including Gae Aulenti.

In Trouble

Gianni Versace was in trouble and that is sad because Versace is a gifted designer who has made giant strides in his 10-year, $10-million career. The trouble is that he is covering too much ground, designing four collections when one should be more than enough. He also made a recent tie-up with Charles of the Ritz, which, combined with the fact that he also did costumes for a film called "Gigolo," explains why he was lost in Hollywood nostalgia.

But Versace is aware of his problems and said that as soon as he can get himself free of his contracts, which should be this year, he plans to regroup and show a single collection under his own name.

Mariuccia Mandelli, who designs the Krizia collection, has something that is often lacking in Italian collections — a sense of humor. With a twinkle in her eye, she has delivered some of the best suits in Milan, notably the gray flannel ones, topped by three-quarter, ivory beaver coats decorated with quilted Art Deco roses.

Mila Schon was more than ever herself, which is the best thing that can happen both to her and her customers. No rat race here. All she has to do is keep changing a bit here, a bit there and she ends up all right. It is when she tries to be trendy that she gets into trouble.

Her collection is more like a family affair that goes right to the heart of such faithful supporters as Martha, Bergdorf Goodman and, from Geneva, Anita Smaga. They were not disappointed this time. Miss Schon had a most accomplished collection with all her favorite themes updated with corduroy, Peruvian stripes, V-neck sweaters and three-quarter coats.

Andre Laug, who has been Miss Schon's most ardent follower, also has a collection of strong suits that should go over big with women who grew up with couture. Making few waves, Balestra did well with excellent evening dresses, including the blue satin peacock one with sequined bolero. Albini, once one of the great names of Italian fashion, floundered this time except for a somewhat interesting velvet and plaid suit. Basile is made by a group of some 12 designers, which explains the resulting hodge-podge that included both passable suits and tacky dresses.

Sharps and Flats

LONDON — Tina Turner is at the Hammersmith Odeon March 30 at 7 p.m.; John Denver at the Wembley Arena April 1-4; Graham Parker and The Rumour at Hammersmith Odeon April 2-3 and Elton John at the Theatre Royal-Drury Lane April 2-7. The Scott Hamilton quartet and the Stan Tracey quartet open at Ronnie Scott's on April 2 for two weeks.

ON TOUR — Nana Mouskouri, winding up her swing through Britain, is in Bournemouth March 31 at the Winter Gardens; in Bristol the following night at Colston Hall; in Southampton April 2 at the Gaumont; Portsmouth April 3 at Guild Hall and Brighton April 4 at the Dome.

BRUSSELS — Cat Anderson is at Pol's March 30 and 31, helping to celebrate the club's 19th year.

PARIS — Lou Reed will be at the Pavillon de Paris April 2 at 8 p.m.; Colette Renard at the Olympia April 2-4 at 9 p.m.; Whitesnake at the Stadium-Totem April 3 at 8; Rhoda Scott every night at the Club St.-Germain, as are Sugar Blue at La Chapelle des Lombards and Georges Arvanitas, Michel Roques and Pierre Michelot at Le Petit Opportun. Cat Anderson will be at the Hotel Meridien during April. The rock group Wino will give a concert at the Maison Pour Tous in suburban Courbevoie April 5 at 8 p.m.

MONTE CARLO — A gala, "There's No Business Like Show Business", honoring Irving Berlin and his music, will be given at the Sporting Club March 30-April 26.

Thad Jones and Mel Lewis have split after a 14-year association that began in New York with their all-star big band of top studio jazzmen playing one-night stands at the Village Vanguard. The reason for the breakup appears to be Jones' increasing involvement with commitments to compose and conduct, leaving him little time for band engagements. The orchestra, however, has not disbanded and, with Lewis leading, will continue its appearances and recording dates, possibly with Buddy De Franco up front.

— FRANK VAN BRAKLE

Nigeria Will Impose $4 Surcharge on Oil

By Anthony J. Parisi

NEW YORK, March 29 (NYT) — Nigeria, a major oil producer, has joined Algeria and Libya by imposing substantial surcharges on crude oil beyond the 9-percent increase announced by the Organization of Petroleum Exporting Countries on Tuesday.

Nigeria posted a surcharge of about $4 a barrel, the same surcharge announced Tuesday by the two other African nations, oil buyers in New York said yesterday.

[A Phillips Petroleum spokesman confirmed today Nigeria will add a surchage of $4 a barrel, AP-Dow Jones reported.]

These increases dwarf the surcharges of $1.20 a barrel that were announced by several other nations immediately after the OPEC meeting in Geneva, at which the cartel's members authorized surcharges of any magnitude the market could absorb. The rises mean the price of practically all African oil exports will go up to the level of $18.50 a barrel, about 27 percent over the official figure set by OPEC two days ago.

Together, Nigeria, Algeria and Libya produce nearly six million barrels a day, most of it extremely high-quality crude oil. They account for almost a fifth of OPEC's total output and are important suppliers to Europe and the United States.

OPEC Production

January output by member countries in millions of barrels a day

Saudi Arabia	10.1
Iraq	3.1
Kuwait	2.6
Iran*	2.5
Venezuela	2.4
Nigeria	2.4
Libya	2.2
United Arab Emirates	1.9
Indonesia	1.6
Algeria	1.3
Qatar	0.5
Ecuador	0.2
Gabon	0.2
TOTAL	31.0

*Recent estimate. January output was 700,000 barrels a day.

Source: Department of Energy

The New York Times

Above $18 a Barrel

They often compete for market shares by undercutting one another's prices, however, and buyers had been hoping to see some of that price-cutting yesterday after Algeria and Libya said on Tuesday that they would add a $4 surcharge to the new OPEC price of $14.546.

"But we're pretty certain that Libya has gone to $18.30," said one insider, "and Nigeria has definitely gone to $18.50." These prices are to take effect Sunday, when Algerian oil will start selling for $18.55 a barrel.

The action of these three key oil producers also multiplies the chance that another round of unofficial increases, similar to, but worse than, those that began in mid-February may soon spread, touching off yet another big wave of energy price increases.

According to Petroleum Intelligence Weekly, an oil-trade newsletter, the Algerians had been charging a premium of $1.47 for their oil and Nigeria had been charging $1.48.

So far, the three big African producers are the only ones that have reportedly posted new surcharges of anything near $4 a barrel. Several other producers have said they would add only $1.20 a barrel to the official price, and a few have announced none. Saudi Arabia and the United Arab Emirates have ruled out any surcharges.

Were the $4 surcharge to become universal, it would mean that petroleum products would cost an additional 10 cents a gallon in countries that do not produce any of their own oil. In the United States, where roughly a third of all the crude oil consumed is under price controls, gasoline and other products would rise about 7 cents a gallon.

Mexico Raising Prices

MEXICO CITY, March 29 (Reuters) — Mexico will raise the price of its crude oil by more than OPEC's increase announced this week effective Sunday but is still discussing prices with customers, Petroleos Mexicanos director Jorge Diaz Serrano said today.

Mexico, which is expected to increase its production to 1.8 million barrels a day by the end of the year, traditionally prices its oil higher than world levels.

UBAF Set On Credit For China

PARIS, March 29 (IHT) — China's long-awaited foray into the international loan market got underway today with Union de Banques Arabes et Francaises (UBAF) inviting banks to participate in a $500 million loan for 3½ years.

However, executives at other institutions were convinced that UBAF must have confused the Chinese intent to do business with actual approval to proceed. Nonetheless, UBAF, a consortium of Arab and French banks based here, is satisfied that its letter signed by the chairman of the Bank of China authorizes the bank to proceed with the loan.

Participation in the loan is being restricted to other Arab institutions, initially those which accompanied UBAF on a visit to Peking some weeks ago — Libyan Arab Foreign Bank, Arab Bank, Arab African Bank, European-Arab Bank and Alahli Bank of Kuwait.

The credit is said to carry interest of a half-point over the London interbank offered rate for six-month Eurodollars. There are no fees or commissions and the loan is to be repaid in one step at final maturity.

Those who doubt UBAF actually has a final mandate to proceed with the loan note the protracted negotiations between banks in Japan and Peking which still have not resulted in a contract from China to proceed.

However, other bankers say they see some logic in China making its maiden voyage into the international market with a group of banks representing countries who are not at the same time seeking to export goods and services as is the case with the Japanese, West German and U.S. banks.

This gives China greater flexibility in the use of the proceeds and establishes the Chinese credit as currently standing at a very good rate, they say.

'Entrenches Unemployment and Inflation'

World Trade System Said Inadequate

By Bhushan Bahree

LONDON, March 29 (AP-DJ) — The Cambridge Economic Policy Group, known for its usually controversial, and sometimes unacceptable, solutions to economic problems, says international economic rules need to be changed or broken if the world's nations want to resolve their major problems.

The group says today's system of world trade no longer induces adequate economic growth, and proposes the following solutions:

- A sharp reduction in the growth of Japanese exports, either voluntary or enforced.
- A reduction in imports by the United States and some other countries, like Britain. It favors import controls.
- Discrimination in favor of exports of manufactured goods from developing countries by importing countries which have strong trade balances or themselves control imports.

Together, these would provide "a growth-inducing system of trade for the 1980s," the group said.

In their latest annual review, the Cambridge economists say the existing framework of international economic relations "now serve to entrench unemployment and inflation in many countries, including the United States and Britain."

The group discounts two widely feared threats to world trade. It says higher oil prices, and retaliation by other countries against the United States and Britain in the event these two imposed import controls, would not be "particularly harmful to world trade."

What would be harmful is if the United States deflates its economy to eliminate its deficits while Japan's share of world exports continues to grow and European Economic Community countries deflate to avoid having the U.S. deficit passed on to them. "This combination of circumstances would rapidly deepen the world recession," the Cambridge economists believe.

Import Controls

The Cambridge group wants the United States, in particular, and some other countries to continue running deficits, but to control imports, judiciously applying discrimination, but simultaneously expanding internal demand. This would compensate for the surpluses being run by Japan and some EEC countries.

On retaliation in the case import controls are applied, the group says that an assessment shows that in such an event, growth of world trade would be reduced by 0.5 percent annually if the action were directed against the United States, and the growth of U.S. manufactured goods exports would be trimmed by 2 percent.

It adds: "The effect on the United States would be to require tighter restricions on imports of manufactures, but these could still be allowed to increase, although only slowly, from their present level. The likely result in practice is that U.S. import controls would be emulated by certain other countries which have similar problems and that discrimnatory retaliation would be confined to a handful of countries."

The Cambridge economists say that within the EEC, conflicts of interest between member countries have created an impasse which is "just as formidable as that which prevents effective policy coordination in the world system."

It says that one of the dangers is the European monetary system, "which would worsen industrial recession in weaker member countries." It also warns against increases in agricultural prices, which would burden Britain and Italy even more.

The group says that the major problem of unequal industrial performance between EEC members cannot be ignored much longer. It urges Britain to ignore the "industrial Common Market and restrict manufactured imports from other EEC countries and from outside the community."

Japan-EEC Trade Talks Unproductive

By Sam Jameson

TOKYO, March 29 — Three days of talks with Japanese officials have produced "nothing concrete" to alleviate European complaints about obstacles to imports of their goods. Wilhelm Haferkamp, vice president of the Common Market Commission said yesterday.

Japan's response to renewed Common Market requests for action "was not satisfactory," he added. The Common Market's trade deficit with Japan reached $6.4 billion last year.

Mr. Haferkamp said he warned Japan that "in trade as in gambling, it is not possible for any one partner to accumulate so many chips that play becomes eventually impossible." He empahsized in meetings with Japanese officials, "the great importance of close and permanent cooperation between Japan, the United States, and the European community" and suggested that trilateral conversations ought to be lifted to a level above mere trade complaints.

Japan's current-account surplus of $16.6 billion last year, and its continually expanding trade surplus with the Common Market, made such conversations difficult, he added.

Mr. Haferkamp said the Common Market urged Japanese officials to take action to change what he called the nation's export-oriented economy into one more reliant both upon growth at home and upon imports. He added that for the first time the Common Market had been assured that achieving those goals was now government policy in Tokyo.

"What is necessary. . .is that immediate, visible actions be taken. . .to prove that changes have started, that things are moving, and that the trend is changing," he said.

With evidence of change under way, Europe would be prepared to wait for better balance to show up in trade figures over "a longer period of time." But, he added, "if nothing happens, people will not believe changes are happening."

Regarding trade sanctions against Japan, Mr. Haferkamp said that "for the moment, we have nothing planned as counteraction," but added that "pressure is growing to undertake actions," and warned that "if actions and counteractions start, nobody knows where it will stop."

U.S.-Japan Talks Halted

WASHINGTON, March 29 (AP-DJ) — U.S. trade negotiator Robert Strauss abruptly terminated talks with Japan today on government procurement issues.

Mr. Strauss said that the Japanese government had made "wholly inadequate" offers to the United States about opening up the Japanese market to U.S. bidders on contracts placed by Japanese government agencies or government-controlled enterprises.

Because of this, Mr. Strauss said, Japan will be excluded from the benefits of the government procurement code that the United States is signing with other nations as part of the new international trade accord.

Bundesbank Ups Two Key Rates

FRANKFURT, March 29 (AP-DJ) — The Bundesbank's discount rate was raised to 4 percent from 3 percent and the Lombard rate increased to 5 percent from 4 percent by the West German Central Bank Council today in an effort to tighten credit and combat rising inflation.

The increases, effective Friday, were larger than expected in banking circles and exceeded the half-point rise that central bank officials indicated before the regular bi-weekly central bank council meeting.

The council also increased the volume at which banks can rediscount against bills under the discount facility by 5 billion Deutsche marks to 27 billion DM applicable April 1.

SIA Gets Credit In Policy Shift by U.S. Ex-Im Bank

WASHINGTON, March 29 (AP-DJ) — The U.S. Export-Import bank, easing policy restrictions on direct loans to foreign airlines for the purchase of U.S. jetliners, has tentatively approved about $155.2 million in credit to Singapore International Airlines.

Direct credits, which will be subject to congressional review, will include about $65 million to help SIA purchase five Boeing 747 jetliners. A second package of loans is expected to provide about $90.2 million in direct credits for purchase of three McDonnell-Douglas DC-10 jetliners and four Boeing 727 medium-range aircraft.

Ex-Imbank officials yesterday confirmed that the agency has modified its previous policies about financing U.S. jet sales abroad with direct loans rather than guarantees. In the past, the bank has approved some direct credits for 747 airliners, but only when they were in direct sales competition with the European A-300 Airbus.

The Eximbank has decided to broaden that rule to permits direct credits for the long-range jetliners when the borrowers can show that the U.S. aircraft will be in competition with the European Airbus or the British BAC-1-11 on international airline routes.

Meanwhile, Pakistan International Airlines announced has that it will purchase two Boeing 747s and four A-300 European Airbuses.

It negotiated a $160 million loan with consortium of French and German banks for the airbuses, and a $142 million loan for the Boeing 747s though the U.S. Export-Import bank and other British and U.S. banks.

Fed to Maintain Policy Restraint

But Is Watching Inventory Level

By Clyde H. Farnsworth

WASHINGTON, March 29 (NYT) — The Federal Reserve intends to maintain its present degree of monetary restraint but stands ready to consider further tightening if business continues to accumulate inventories while the economy is slowing, Fed chairman William Miller said yesterday.

With strains on the economy from oil-price increases that he said heightens the risk of a further slowing in the growth rate, Mr. Miller insisted that "it would be hard to show that our policy hasn't shown adequate restraint."

He outlined a course of "steady as you go" monetary policy in which pressures are being resisted from those who want the Fed to ease credit reins because of reduced money-supply growth as well as from those who want further tightening because of accelerating inflation.

"For over a year now we've moved into a position where we have reduced growth of money and credit," he said. "We haven't flinched or pulled back from that position."

Commenting on general economic conditions, Mr. Miller also:

- Said that relief from accelerating inflation would probably arrive within two to three months.
- Termed deregulation of crude oil, which the Carter administration is considering, a step in the direction of increasing domestic energy supplies and reducing foreign dependence.
- Predicted that although the economy is slowing, it will still probably be able to avoid a full-scale recession.

Mr. Miller said that new price increases by the oil-producing countries may further retard economic growth because consumers would be spending more on energy and less on other goods and services. But he stressed that the Fed has no intention of easing up on the monetary brakes to compensate for the lost demand.

The big worry now, he added, was the "quite strong" buildup of business inventories that could cause the Fed to intervene and tighten credit another notch. The inventory buildup, he explained, could mean dislocations later because business would have to close plants to reduce inventories. "Therefore, we might be tempted, if that situation were confirmed, to tighten to discourage the accumulation of inventories," he said.

But Mr. Miller quickly added that it was "premature" to make a judgment now, noting that the buildup could represent both a catching up from the depletion of stocks in the fourth quarter and a hedge against possible strikes by Teamsters and rubber workers.

Despite the oil-price increases, Mr. Miller said he was not ready to alter his 1979 inflation forecast of 8 percent. He said the inflation outlook depends a great deal on the changes in economic and energy policy now being contemplated by President Carter, who will announce a program next week both to spur conservation and increase energy supplies.

Mr. Miller said that contrary to some economists, he saw no evidence of overheating of the economy now. He said consumers are showing moderation in spending, housing starts have fallen and the federal government is no longer in a stimulative posture.

Mr. Miller took heart from the current pickup in business capital investment. "We need to increase our investment in order to increase our productivity and insure modernization," he said.

[Regarding the 9.4-percent rise for fourth-quarter profits, Mr. Miller said he believes earnings are moderate in real terms and that the profit picture shows the economy is ready to get back to capital investment policy, Mr. Miller told a breakfast meeting with the National Association of Manufacturers, AP reported.]

NYSE Prices End Higher Amid Moderate Trading

NEW YORK, March 29 (Reuters) — Prices on the New York Stock Exchange rose slightly in moderate trading today, extending the correction that set in yesterday after the big price surge on Tuesday.

Analysts said the action was mostly technical but noted there is usually some caution on Thursdays ahead of the weekly banking statistics.

The Dow Jones industrial average gained 0.52 to 866.77 with advancing issues leading declines 735 to 644. Volume contracted to about 28 million shares from the 39.92 million shares traded yesterday.

Among the losers, IBM slipped ¼ to 317¾, Du Pont 1⅛ to 142⅛, General Electric ⅞ to 48¼, Westinghouse Electric ⅛ to 20¼ and Polaroid 1⅜ to 39.

General Public Utilities, which owns the nuclear power plant that leaked radiation in Pennsylvania, lost ⅜ to 16⅞.

Fairchild Camera was a standout, climbing three to 44½ in active trading. It has periodically been the subject of takeover speculation.

UAL Inc. added ⅞ to 27½. Allied Chemical added 1¼ to 34⅜. Active Pan Am picked up ⅛ to 6⅛. It filed for a 4 percent fuel-related fare increase.

Matsushita Electric lost ½ to 31½. A block of 359,200 shares traded at 31½.

After the market closed, the Federal Reserve reported that the M-1 money supply rose $1.1 billion in the week ended March 21. M-1 plus rose $500 million, while M-2 rose $700 million. M-2's average for the latest four weeks was up 1.4 percent, compared to the 13 weeks previously.

On the Chicago Board of Trade, wheat closed off 3¼ to 8 cents; corn off ½ to 1¼; oats off 1 to 1¼; and soybeans off 3¼ to 9 cents.

Sharply lower silver futures and active farmer selling of soybeans drove futures prices lower. Corn declined on active farmer selling and some spillover influence from soybeans.

U.S. Official Sees Growth of 2% in First Quarter

WASHINGTON, March 29 (AP-DJ) — The inflation-adjusted growth in gross national product in this year's first quarter "may have risen at an annual rate of around 2 percent," Courtenay Slater, the Commerce Department's chief economist, has estimated in a speech to be given tomorrow.

She noted some of the first-quarter growth was accounted for by inventory building. "So the slowdown in the rate of growth for final sales has been even more marked than the slowing of total GNP growth," she said.

The slowdown is "the first effects of policy restraint" designed to reduce inflation. She added however, that "monetary policy is not as tight as the monetary supply statistics suggest. To a major extent, the Fed has been pursuing a policy of increasing the cost of credit rather than of making credit unavailable."

Separately, presidential inflation advisor Alfred Kahn said the Council on Wage and Price Stability will tighten its price standards and plans, among other things, to define more specifically which companies can use the profit margin test for compliance. He did not give the specifics of the changes, however.

Thomson Keeps Bid For Hudson's at $31

TORONTO, March 29 (AP-DJ) — The Thomson Family Companies said today they "don't intend to change" their $Can.31-a-share offer for 51 percent of the stock of Hudson's Bay as a result of a $40-a-share competing bid by George Weston, also for 51 ppercent of Hudson's stock.

However, analysts said the announcement does not rule out an improved bid by Thomson. They noted the Thomson Companies may be initially playing a waiting game in case the Weston bid runs into regulatory or financing problems.

UAL Orders Engines From GE, Snecma

CHICAGO, March 29 (AP-DJ) — United Airlines said today it has placed a $400-million order to re-engine 30 DC-8-61 aircraft with CFM-56 engines to be built by General Electric and Snecma of France.

The engines were selected in competition with engines offered by Pratt & Whitney, a United Technology unit, the UAL Inc. unit said.

Financial Year 1978

SOCIETE GENERALE DE BELGIQUE

The Société Générale de Belgique in 1978

In his address to the Annual General Meeting, held on March 20th, 1979, the Governor of the Société Générale de Belgique emphasized that the year's results were much the same as for 1977, if one excludes exceptional items.

Dividends received by the company show an increase of 76.8 million Belgian francs, or 5.5%, mainly resulting from the activities of companies in the service sector. Dividends from industrial companies, in contrast, remain affected by the crisis which still bears heavily on several sectors, particularly steel and non-ferrous metals.

The balance between receipts other than dividends and financial expenses in the accounts show a slightly larger negative figure than in the previous accounting period, an increased part of the assets being financed by means of borrowed funds.

The profit for the year reached 1,051.5 million Belgian francs, and the proposed dividend is 175 francs, or 140 francs net of withholding tax, per Part de Reserve share. Profit carried forward is further increased by 10.9 million Belgian francs, to reach a total of 137.4 million.

NOTE:

The above information is taken from the Annual Report of the Société Générale de Belgique, which may be obtained on request from the External Relations Department of the company, 30, Rue Royale, 1000 Brussels, Belgium. Tel.: 02/513 38 80, ext. 276.

INTERNATIONAL Herald Tribune

A LETTER FROM THE PUBLISHER

Dear Reader,

Our readers are very important to us. That's why I would like to ask you for a few minutes of your valuable time to complete the questionnaire on the following page.

An accurate profile of our readers has become a critical economic element for us as for every publication, and knowing more about them helps us better serve your interests. Your answers are valuable to us even if you are reading the International Herald Tribune for the first time today.

This questionnaire will appear in the paper on several days during this week, to give all our readers an opportunity to answer it. Please complete only one questionnaire, preferably on the first day that you see it.

As we are surveying readers in more than 100 countries it has not been possible to provide a reply paid questionnaire. However, to show our appreciation for your time and effort, we will make a donation to the charitable organization of your choice of twice the value of the letter post from your country.

All replies will be treated in strictest confidence. Research Services Limited, an independent research company based in London, will receive and analyze the results. If you write in your name to receive the results of the survey, it will not be passed on to us or associated with the findings in any way.

Thank you for your help with this survey.
Yours sincerely.

Robert R. Eckert

The 1979 Readership Survey Questionnaire

The International Herald Tribune undertakes to donate to charity twice the value of all the postage charges incurred by our readers in returning these questionnaires to Research Services. Please indicate below which of the charities you would like to benefit.
The value of these donations will be published in the International Herald Tribune in due course.

☐ UNICEF ☐ International Red Cross ☐ Cancer Research

Reading

Which issues of this newspaper apart from today's have you read or looked at in the last week?

(6) ☐ Mon. ☐ Tue. ☐ Wed. ☐ Thur. ☐ Fri. ☐ Sat./Sun.

Today is

(7) ☐ Mon. ☐ Tue. ☐ Wed. ☐ Thur. ☐ Fri. ☐ Sat./Sun.

☐ I have a personal postal subscription ☐ I have a company/business postal subscription ☐ I am not a subscriber

Who else usually reads or looks at your copy of the paper?

(8) ☐ No one else ☐ Husband/wife ☐ Other member of household ☐ One business colleague ☐ Two or more business colleagues ☐ Other

Which of the following are the main reasons why you read the International Herald Tribune? (check as many as apply)

(9)
- ☐ I like an international rather than national view of the news
- ☐ It is essential business reading
- ☐ I prefer to read an English language newspaper
- ☐ It is widely available
- ☐ It is a reliable source of information
- ☐ It has specialist coverage on areas of interest to me; which areas? _____
- ☐ It has concise coverage of world news
- ☐ I prefer it as my only daily newspaper
- ☐ I prefer it in addition to another daily newspaper
- ☐ I read it when travelling in foreign countries
- ☐ Other (please state): _____

Nationality & Language

A

In which country are you now living (your present home)?

(10) ☐ Belgium/Luxembourg ☐ France ☐ Germany ☐ Italy ☐ Netherlands ☐ Denmark ☐ Norway ☐ Sweden ☐ Spain ☐ Switzerland
(11) ☐ U.K. ☐ U.S.A. ☐ Japan ☐ Other European country (Please state) ☐ Other (Please state)

Of which country are you a citizen?

(12) ☐ Belgium/Luxembourg ☐ France ☐ Germany ☐ Italy ☐ Netherlands ☐ Denmark ☐ Norway ☐ Sweden ☐ Spain ☐ Switzerland
(13) ☐ U.K. ☐ U.S.A. ☐ Japan ☐ Other European country (Please state) ☐ Other (Please state)

How long have you been living in your present country of residence?

(14) ☐ Less than 6 months ☐ 6 - 12 months ☐ Over 1 year but less than 5 years ☐ 5 years or more

Please indicate your familiarity with each of the following languages:

	English	French	German	Italian	Spanish	Japanese	Arabic
Can read	(15) 1	5	9	(16) 1	5	9	(17) 1
Can speak	2	6	0	2	6	0	2
Can conduct business in	3	7	x	3	7	x	3

What is your native language? (Please state) _____ (18)

C

Travel

Approximately how many trips by air have you made during the last 12 months? (Count round trips, not one way flights.)

(19) None ☐ 1-2 ☐ 3-5 ☐ 6-9 ☐ 10-20 ☐ 21+

Of these air trips how many were mainly for business purposes?

(20) None ☐ 1-2 ☐ 3-5 ☐ 6-9 ☐ 10-20 ☐ 21+

How many trips by air have you made to each of the following destinations, mainly for business purposes, in the last 12 months?

	Number of trips: None	1-2	3-5	6-9	10-20	21+	
Western Europe (Excluding your own country of residence if resident in Western Europe)	0	1	2	3	4	5	(21)

	Number of trips: None	1	2	3	4	5	6	7	8	9+	
U.S.A.	0	1	2	3	4	5	6	7	8	9	(22)
Canada	0	1	2	3	4	5	6	7	8	9	(23)
Central & South America	0	1	2	3	4	5	6	7	8	9	(24)
Australia/New Zealand	0	1	2	3	4	5	6	7	8	9	(25)
Japan	0	1	2	3	4	5	6	7	8	9	(26)
Other Far East	0	1	2	3	4	5	6	7	8	9	(27)
Middle East	0	1	2	3	4	5	6	7	8	9	(28)
South Africa/Rhodesia	0	1	2	3	4	5	6	7	8	9	(29)
Other Africa	0	1	2	3	4	5	6	7	8	9	(30)
Eastern Europe	0	1	2	3	4	5	6	7	8	9	(31)
Other	0	1	2	3	4	5	6	7	8	9	(32)

When travelling by air, which class do you normally use:

on business trips within Europe?

(33) ☐ First class ☐ Economy ☐ Other ☐ No business air travel

on business trips to the rest of the world?

☐ First class ☐ Economy ☐ Other ☐ No business air travel

Approximately how many times, if at all, during the last 12 months have you rented a car on business?

(34) ☐ None ☐ 1-2 ☐ 3-6 ☐ 7-10 ☐ 11-20 ☐ 21+

And on how many of those occasions have you rented a car abroad on business?

(35) ☐ None ☐ 1-2 ☐ 3-6 ☐ 7-10 ☐ 11-20 ☐ 21+

From which of the following companies have you rented a car in the last 12 months?

(36) ☐ Avis ☐ Europcar ☐ Hertz ☐ Other: _____ (Please state) ☐ None

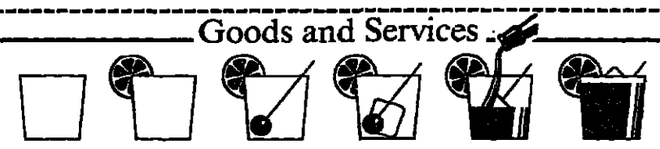
When travelling on business in the last 12 months how often did you spend nights in international hotels like: Hilton, Intercontinental, Marriott, Ramada, Sheraton, Sofitel, Novotel, Meridien, Penta, Trust Houses Forte, Holiday Inn?

(37) ☐ Always/Almost always ☐ Frequently ☐ Occasionally ☐ Never ☐ No business travel

Which of the following do you usually buy at duty-free shops?

(38) ☐ Cigars ☐ Cigarettes/Tobacco ☐ Spirits ☐ Other alcoholic beverages ☐ Perfumes/Toilet waters ☐ Other (Please state) _____

Goods and Services



How many cars are there in your household, including company-owned cars?

(39) ☐ None ☐ 1 ☐ 2 ☐ 3 ☐ 4 or more

If you have more than one car in your household, please answer for each car. What is the make, model cubic capacity of the car(s)?

	Make	Model	1200cc or less	1201-1750cc	1751cc or more
Car 1			(49) 1	2	3
Car 2			5	6	7
Car 3			9	0	x

Which of the following do you smoke, even if only occasionally?

(50) ☐ Filter cigarettes ☐ Non-filter cigarettes ☐ Cigars ☐ Pipe tobacco ☐ None of these

Which of the following do you have in your home at the present time?

(51) ☐ Gin ☐ Brandy / Cognac ☐ Champagne ☐ Vodka ☐ Aperitif / Vermouth ☐ Liqueurs ☐ Scotch Whisky ☐ Canadian Whisky ☐ Bourbon ☐ Rum ☐ Sherry/Port

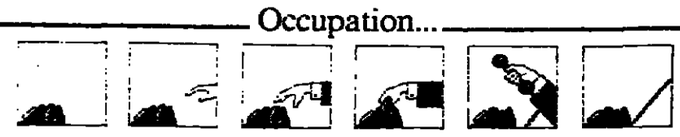
Which credit cards do you use nowadays?

(52) ☐ Eurocard/Access/Mastercharge ☐ American Express ☐ Carte Blanche ☐ Diners Club ☐ VISA/Bankamericard/Barclaycard/Carte Bleue ☐ Universal Air Travel ☐ Hertz ☐ Avis ☐ Europcar ☐ Other ☐ None

Which of the following do you or members of your family own?

(53) ☐ Stocks/shares ☐ Bonds ☐ Commodity futures ☐ Options ☐ Mutual (unit trust) funds ☐ Eurobonds

Occupation...



Are you...

(54) ☐ in full-time employment (30 hrs. or more per week) ☐ in part-time employment (8-29 hrs. per week) ☐ a student ☐ a housewife ☐ retired ☐ other (Please state) _____

Are you the main income earner/provider in your household?

Yes ☐ No ☐

If in employment, please answer questions (I) to (X). If not in employment, go to Classification.

(I) What is the principal activity of the establishment in which you work? (By establishment we mean the whole of the premises under the same ownership or management at a particular address.)

Manufacturing (55)	1	(56) 1	Oil and petroleum industries
Travel & Tourism	2	2	Professions, e.g. medicine, law, etc.
Education	3	3	Banking, finance
Insurance	4	4	Property/real estate
Retail wholesale	5	5	Armed, Police Forces
Construction, mining, agricultural & forestry industries	6	6	Publishing, broadcasting, entertainment, advertising, PR
Export, import/freight, shipping, transport	7	7	Other business services
Central government, Diplomatic Service, EEC, UN, OECD and similar	8	8	Do not work in establishment
Other Public Service	9	9	Other: (Please state) _____

(II) Approximately how many people are there in the establishment in which you work?

(57) ☐ 1-5 ☐ 6-10 ☐ 11-24 ☐ 25-99 ☐ 100-299 ☐ 300-499 ☐ 500-999 ☐ 1,000+

(III) For approximately how many people are you yourself responsible?

(58) ☐ 1-5 ☐ 6-9 ☐ 10-20 ☐ 21-50 ☐ 51-99 ☐ 100+

(IV) Approximately what percentage of your organization's turnover is accounted for by activities outside the country in which you are based?

(59) ☐ None ☐ Less than 25% ☐ 25-50% ☐ 51-75% ☐ 76-100% ☐ Don't know

(V) Which of the following best describes your job position?

Chief Executive (60)	1	(61) 1	Lawyer/other legal
Director/Manager	2	2	Doctor/medical practitioner
Other Executive	3	3	Professor/other academic
Consultant	4	4	Government/Diplomatic/Civil Servant
Financial Specialist (including Accountant, Actuary, etc.)	5	5	Armed/Police Force employee
Scientist/Architect/Engineer/Technologist	6	6	Other: (Please state) _____

(a) Commercial franc. (b) Amounts needed to buy one pound. (c) Amounts needed to buy one dollar. (*) Units of 100. (x) Units of 1,000

ECU : European Currency Unit, as quoted in Brussels.

Closing rates or official fixings for European centers: 2pm EST rates for New York.

Western Areas Gold Mining Company Limited

(Incorporated in the Republic of South Africa)

A Member of the Johannesburg Consolidated Investments Group of Companies

Highlights from the 1978 Annual Report

* Profit after tax increased by R12 139 000 to R26 150 000 largely as a result of the higher average gold price received of U.S. $204 per ounce as compared with U.S. $147 per ounce in 1977. Dividends were increased by R2 821 000 to 20 cents per unit of stock absorbing R8 061 000 (1977 — 13 cents).

* Unit working costs increased by 12,6% to R24,28 per ton milled, while revenue from gold and silver at R31,97 per ton increased by some 29%. Capital expenditure amounted to R14 013 000 as a result of decisions to expedite certain essential capital works.

* Total mill throughput which increased to 4 141 000 tons, averaged 345 000 tons per month as compared with the declared objective of a monthly mill rate of 370 000 tons. The recovery grade which dropped from 6,0 grams per ton in 1977 to 5,6 grams per ton is in accordance with the company's policy of gaining the greatest long-term advantage from increases in the gold price.

* The sinking and equipping of the two new sub-vertical shafts are considered to be of great strategic importance to the mine; the S.V.3 shaft will facilitate the mining of the Upper Elsburgs down to 88 level, while the 4E shaft should overcome the difficulties experienced with the 4E incline between 50 and 55 levels and greatly facilitate the exploitation of the orebody in this area down to 58 level.

* Exploration of the Middle Elsburg Reef horizon confirmed the existence of viable gold and uranium bearing reefs and development from the North Shaft towards these reefs is proceeding. The Nuclear Fuels Corporation of South Africa (Pty) Limited (Nufcor) was requested to seek a long term uranium sales contract on behalf of the company but no positive response to enquiries has yet been received.

P. A. von Wielligh
Chairman

29 March 1979

The Board of Directors of Elsburg Gold Mining Company Limited draws stockholders' attention to the above highlights.

SUMMARY OF OPERATIONS

	Year ended 31 December 1978	1977
Tons milled 000's	4 141	3 579
Recovery — grams per ton	5,60	6,00
Cost — per ton milled	R24,28	R21,56
Profit — per ton milled	R7,84	R4,20
Average price per ounce	U.S. $204	U.S. $147

The annual general meeting of the company will be held in the board room, Consolidated Building, corner of Fox and Harrison Streets, Johannesburg, on Wednesday, 2 May 1979 at 09h15.

Note: Copies of the Annual Report will be sent post-free on application by letter or telephone to:

Sales figures are unofficial
d—New yearly low. u—New Yearly high.
Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split-up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrents. xw—Without warrents. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Yearly highs and lows reflect the previous 52 weeks plus the current week, but not the latest trading day.
Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Japan Yen Aid Put at $3 Billion

From Wire Dispatches

TOKYO, March 29 — The Bank of Japan has sold between $2 billion and $2.5 billion on the Tokyo foreign exchange market this month, Japanese exchange dealers said. The central bank's intervention will probably reach about $3 billion this month if its dollar sales in New York through the Federal Reserve bank are added, they said.

The bank will try hard to keep the yen within 209 to the dollar, said the dealers, noting that unrestrained depreciation of the yen could cause a sharp upturn in Japanese exports to the detriment of U.S.-Japanese economic relations.

Meanwhile, Japan's motor vehicle exports last month totaled 341,293 units, up 5.8 percent from the previous month, but down 12.8 percent from the same month a year earlier, the Japan Automobile Manufacturers' Association said.

Color television exports totaled 256,920 units, up 58.2 percent from the previous month, and up 5 percent from a year earlier. Exports to the United States totaled 71,399 units, up 64.7 percent from the previous month, but down 34.6 percent from the like year-earlier month.

The Japan Chemical Fibers Association, meanwhile, today urged the government to curb U.S. acryl staple exports to Japan. The association said increasing acryl staple imports from the United States are likely to hurt domestic producers.

Wheat Ban Justified, CFTC Says

By Bradley Graham

WASHINGTON, March 29 (WP) — The Commodity Futures Trading Commission, under fire for moving against what looked like an attempt to corner the wheat futures market two weeks ago, yesterday defended its actions before a Congressional committee.

"We determined there was a major disturbance and felt compelled to step in," said Gary Seevers, the CFTC's acting chairman, explaining what prompted the commission on March 15 to suspend trading of March wheat futures. "We feel confident that our action focused attention on a dangerous situation and prevented further price distortions."

But the president of the Chicago Board of Trade, which got a federal judge to block the CFTC order, reiterated his claim that the commission over-reacted.

Professional Speculators

"The Board of Trade did not have then, nor does it have now," board president Robert Wilmouth, told the House Agricultural Committee, "information which shows that there was an actual or attempted manipulation, corner or squeeze of the market or that there was in existence an major market disturbance. . .Furthermore, the CFTC did not present to us then, nor have they presented to us since then, evidence to show that an emergency did exist."

Mr. Seevers said early signs of trouble began to appear in December when two "professional speculators" managed to amass more than 60 percent of the open futures contracts. A similar pattern of concentration surfaced early in March, only this time five traders were involved (IHT, March 19).

Mr. Seevers said the CFTC continually encouraged the CBOT to take steps to remove the chance of a manipulation or squeeze in the market, but Chicago officials insisted they had the situation under control.

Mr. Seevers noted that whether or not an emergency existed was "a judgment call" on the part of the commission. "There's no magic formula" to decide when the government should intervene to prevent manipulation of a commodites market, he said.

At the same time, Chicago Board of Trade officials who have long espoused the free market virtues of self-regulation were themselves somewhat befuddled when pressed by several congressmen to define the board's own guidelines for enforcement actions against traders.

FIELDER'S CHOICE

An Anthology of Baseball Fiction

Edited by Jerome Holtzman. Harcourt Brace Jovanovich. 395 pp. $12.95.

STEALING HOME

By Philip F. O'Connor. Alfred A. Knopf. 307 pp. $8.95.

Reviewed by Christopher Lehmann-Haupt

BASEBALL? "It's full of ... and disorder," says one ... women in Philip F. O'Connor's ... first novel, "Stealing Home." ... credible things can happen ... those nine innings . . . ... tween those foul lines. Ma... and puzzling things. No ga... same and all that." Which ... explains, I guess, why so ... American fiction writers ha... attracted to the game: its ... limitless possibilities for dra... fact that the game is not sh... real chronological time. An... more, to judge from the 2... tions in Jerome Holtzman's ... er's Choice," an anthology ... ball fiction edited by the ... baseball writer for The ... Sun-Times.

For here — in the words ... as Robert Coover, Ring L... Mark Harris, James T... Damon Runyon, Philip Rot... decai Richler and many ot... are folklore and myth and n... and attempts to grasp the ... the American character. Her... anticipating life in Thurb... mous and still amusing story ... Could Look It Up," of the ... ballplayer, Pearl du Monville ... when put into the lineup in ... draw an important base on ... cannot resist swinging at ... pitch and making a game ... out.

Baseball Fantasies

Here are Lardner's "Ali... and Mark Harris' dying third ... catcher, Bruce Pearson, and ... irresistibly dramatic softball ... that opens Chaim Potok's ... Chosen," and Frank Su... cliche expert, Arbuthnot. ... the attempts to create ... mythology of baseball ... strained, particularly in t... cerpts from Philip Roth's ... Great American Novel" an... nard Malamud's "The Na... then we have the gratifica... being reminded, particular... Robert Coover's powerfu... faintly terrifying "The Un... Baseball Association." Fac... baseball's overwhelming po... inhabit our fantasies.

As for O'Connor's "S... Home": Baseball gives more ... first novel than the novel g... baseball. For it is the rags-to... pionship progress of Coach ... min Dunne's Centerville, Ohi... Wee League team. Gray's Cle... that lends pace and shape ... events of the Dunne fa... midlife crisis. But in return for baseball's favor, O'Connor tells a story already familiar from the "Bad News Bears" film series. He forces on his young players several incredible sequences, including a home run turned into an out by a boy conveniently hiding behind the left-field fence. And he describes a middle inning in Gray's game against Watson and Wills Real Estate as "the only inning in which no W. and W. player reaches first base," when five pages before he has written of an earlier inning: "The first two batters . . . strike out, and the third grounds weakly to first."

One might guess from the foregoing that O'Connor simply isn't all that interested in baseball, or at least that baseball is peripheral to the family crisis that unfolds in "Stealing Home," whose evocative title, after all, has more meanings than its baseball one. Yet the author seems out of touch with more than just baseball. Marilyn Dunne's pursuit of her "fantastic new project" of designing pink and green "body disguises" to dance around the front lawn in, is harebrained enough to try the patience of the most feminist of husbands, and Benjamin simply looks like a jerk for putting up so patiently with Marilyn.

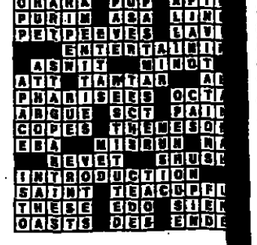
He looks like a jerk, too, for the ponderousness with which he agonizes over whether to put "assistant" or "attitude" at the head of his list of the team's needs. What the problem with "Stealing Home" comes down to is that time and again one gets the feeling that O'Connor has considered his plot needs ahead of his characters, as he does when he gives Benjamin the option at one point of going home and "listening to Marilyn talk about the fabrics she's been working on," as if Marilyn would be idiotic enough to bore her baseball-obsessed husband with such talk, or Benjamin idiotic enough to expose himself to it.

Actually, neither of them is: like so many other details in "Stealing Home," the prospect of Marilyn's talking about her fabrics simply serves as a convenient but ill-considered plot-filler. Why then am I bothering with O'Connor's novel? Because beyond the dark glass of his language and plotting, his characters have lives of their own, and fairly appealing ones at that.

Once you accept Benjamin's mulish obsession with his Pee Wee League baseball team, you can appreciate the relationship he develops with the members of the team. Once you overlook the way that Marilyn channels her urge to give meaning to her life, you can sympathize with her frustration. There is an attractive trusting honesty about almost all the people in "Stealing Home," and O'Connor's ability to create such people may serve him well when, in future books, instead of foisting awkward action on them, he allows them to move on their own.

Christopher Lehmann-Haupt is a book reviewer for The New York Times.

Solution to Previous Puzz...



BRIDGE — By Alan Truscott

In the diagramed deal S... brought home a tricky game ... tract. He arrived in four heart... ter his partner had opened the ... ding and East-West had comp... vigorously in diamonds.

West led the diamond ace ... shifted to the club nine. South ... with the ace in dummy and l... trump to his nine. West won ... the ten and led another club. ... ing out the king. South en... dummy with a spade lead ... faced this position:

	NORTH ♠A K 4 ♡7 6 ♢— ♣J 8 6	
WEST ♠7 ♡K Q ♢10 8 7 3 2 ♣—		EAST ♠J 10 9 ♡— ♢K Q J 9 ♣Q
	SOUTH ♠8 6 ♡A J 8 5 2 ♢— ♣7	

It seems that South was hea... for the loss of a club trick as we... a trump trick. The solution wa... develop a squeeze against Eas... the black suits, but careful prep... tion was required.

If South had played routinel... leading to his trump ace and ... giving West his trump trick, ... contract would have failed. W... would have led his remaining sp... and South would have had no ... venient way to return to his han...

South led a trump from the dum... my and paused to consider whi... East discarded a diamond. He t... ducked, giving West his trump t... immediately and preserving a v... line of communication in the tr... suit. West won and led his last spade, but South was able to ruff in dummy and run all his trumps, squeezing East in the black suits and bringing home the contract.

Analysts will note an alternative play that would have succeeded as the cards lie. If South had cashed exactly one more round of spades in the diagramed position and then played two rounds of trumps, he would have regained the lead in the closed hand since West would have been spadeless.

	NORTH (D) ♠A K Q 4 ♡7 6 3 ♢6 ♣A J 8 6 5	
WEST ♠7 2 ♡K Q 10 ♢A 10 8 7 3 2 ♣9 4		EAST ♠J 10 9 3 ♡9 4 ♢K Q J 9 4 ♣Q 10 2
	SOUTH ♠8 6 5 ♡A J 9 8 5 2 ♢5 ♣K 7 3	

Both sides were vulnerable. The bidding:

North	East	South	West
1♠	1♢	1♡	3♢
Pass	Pass	3♡	Pass
4♡	Pass	Pass	Pass

West led the diamond ace.

Jockeys [illegible]onvicted In Paris [illegible]ace Fix

PARIS, March 29 (AP) — Four[illegible] jockeys have been found guilty [illegible]entenced to prison terms and [illegible] their role in a 1973 race[illegible]andal at the Auteuil race [illegible].

[illegible] verdicts and sentences, [illegible] handed down Tuesday, culm[illegible] nearly six years of in[illegible]estiga[illegible] and legal battles over [illegible]legatio[illegible] that bribed jockeys [illegible] the[illegible] horses in the 1973 Prix de Bride Abattue jumping race.

Robert L[illegible], accused of having been the [illegible] for 13 other jockeys impli[illegible] in the scandal, received the [illegible] sentence — three years in [illegible] and a fine of 30,000 francs ([illegible]).

The other jo[illegible] given suspended senten[illegible] from 6 to [illegible]5 months and [illegible] 3,000 to 15,000 francs. In a[illegible], 40 per[illegible]sons [illegible]ccused of illegal betting acti[illegible] in the race were given sente[illegible] of up to three years in prison and [illegible]es of up to 30,000 francs.

T[illegible] panel of criminal-court judges [illegible] decided that funds that wou[illegible] have been paid on fraudulen[illegible] [illegible]ing tickets — about 5.5 mil[illegible] [fr]ancs, plus about 3 million fra[illegible] accumulated in interest during [illegible] long legal battle — should be [illegible] to the French treasury. Som[illegible] [wi]nning bettors not involved in th[illegible] had hoped that the money wou[illegible] divided among them.

The Prix de Bride Abattue, run on [illegible] 9, 1973, at Auteuil, was chos[illegible] for the Tierce — a form of off-t[illegible] betting supervised by the Pari [M]utuel Urbain, the state-run betting agency.

The PMU noted before the race that heavy Tierce combinations on nine longshots among 24 horses had been played in Marseilles, Toul[on], Bastia and Paris, leading offici[al]s to suspect foul play.

Neither the PMU nor the Societe des Steeple-Chases de France, the group that runs Auteuil, took any action to prevent the running of the race. The nine longshots shook loose from the others during the first half of the race and furnished the winners of the Tierce.

According to testimony from some of the jockeys, Laouira promised them 10,000 to 80,000 francs to pull their horses. They cited intimidation and fear, as well as the money, as their reasons for collaborating in the scheme.

Laouira was said to have paid out 190,000 francs in bribes in the 48 hours before the race. He denied all the charges.

UCLA Appoints Brown as Coach

From Wire Dispatches

LOS ANGELES, March 29 — Larry Brown, a former coach of the Denver Nuggets of the National Basketball Association, was named yesterday as head coach of the UCLA basketball team.

He succeeds Gary Cunningham, who resigned last week following a two-year stint and a 50-8 record. Brown, 38, has no experience as a college coach. He resigned as coach of the Nuggets on Feb. 1, citing health reasons.

In another coaching change, Stan Morrison has been named head basketball coach at the University of Southern California. He succeeds Bob Boyd, who resigned after 13 seasons as the Trojans' coach. Morrison, 39, coached the University of the Pacific to the Pacific Coast Athletic Association title this season.

Buckner: Purple-Heart Hitter

By Mark Heisler

PALM SPRINGS, Calif., March 29 — Bill Buckner hit .323 playing on a sore left ankle last season. This should come as no surprise, because he's had a lot of practice playing on a sore ankle. Like four years. The last guy who ran as badly as Bill Buckner was Long John Silver.

The National League is in a lot of trouble this year because Buckner's ankle is a lot better. So is his heart, which was broken the day they told him it could no longer pump Dodger blue in Los Angeles, that he had become something called a Chicago Cub.

"Betrayal" is not too strong a word for the way he felt that day. "Jubilation" is not too strong for the way he feels about it now.

The day they made the deal was Jan. 11, 1977. Buckner and Ivan DeJesus for Rick Monday and Mike Garman.

A couple of months later, the Cubs' manager, Herman Franks, watched his new left fielder hobble out and was stunned. "Damaged goods" is what Herman called Buckner, loud enough for the Dodgers to hear without picking up a telephone.

"I just felt rotten," Buckner said. "I don't know if that was part of it. All that at once was a lot to handle."

Buckner had jammed his ankle going into a base in 1975, had undergone surgery and had bounced back from a .243 year to a .301 in '76. He drove in 60 runs, stole 28 bases and was always available for comic relief, like the time he grounded out and dug up first base.

After the 1976 season, Buckner underwent a second operation to clean things up but he came out of it limping badly. That was the way he broke in with the Cubs. Limp and all, he hit .284, with 11 homers and 60 RBI.

He also stole an amazing seven bases. "I've got sneaky hands," Buckner said.

His '77 season was fantastic, all anyone could have asked of him. You could ask him. "The first year, I hurt bad enough, I couldn't believe how well I did," Buckner said. "I felt really terrible. Brutal. It's tough enough to play healthy. I really didn't think I'd be able to play anymore."

Then came last season. Buckner went back out with the same limp and hit his .323. He drove in 74 runs in 117 games. He became a team leader. The only way that would have happened on the Dodgers would have been if they'd needed some bases dug up.

"Oh yeah, there was still some pain," Buckner said. "It still bothered me but I'd gotten used to it. Because it hurt less, it was easier to take.

"Everybody has discomforts in life. Very few athletes stay 100 percent. This is the only injury I've ever had. I think if I could handle that, I could handle about everything.

"It made me into a better hitter, helped me concentrate more. I knew I had to lay out some line drives. I couldn't squib anything and beat it out.

"It's worked out great as far as I'm concerned. First base is my best position now. With Steve Garvey at first, that would have been a little difficult. I was voted most popular athlete [in Chicago]. In L.A., people liked me but I was just another player on a good team."

Last winter, Buckner continued a rehabilitation program and the ankle began responding. In a Superstars 100-yard dash, he finished fourth in a field of 14. He no longer limps. He rates his speed at 85 percent of what he had. The last two years, he figures, he was at 65 percent.

He is now being asked, if you played that well on one leg, what can you do on two? "People have been talking batting title, batting title," Buckner said. "I guess that's on my mind. I feel about now like I did in '75, before they did the operation. That was the year I stole 28 bases. Hopefully. . ."

"It wouldn't surprise me, anything he did," Franks said. "He's a dedicated guy. He can play. He can play."

Giants Pick 1st Baseman; McCovey Need Not Apply

From Wire Dispatches

PHOENIX, Ariz., March 29 — Joe Altobelli has finally made official what everyone thought was his decision right from the start: Mike Ivie has beaten out Willie McCovey as starting first baseman for the San Francisco Giants.

"It wasn't that difficult a decision — when you evaluate everything," said Altobelli, the Giants' manager. "It had to be Ivie. He's a potential superstar and he will be our first baseman at least for the start of the season."

But Altobelli also said that he felt that McCovey, who at 41 is 15 years older than Ivie, could make a big contribution this season. And McCovey said that he was willing to accept any role that the manager has in mind for him.

"I've hit well coming off the bench, so I'll fill that job if that's what Joe wants," McCovey said. "I have no doubts I have the ability to play every day. This isn't any earth-shaking news. We're going to win the pennant no matter who plays first base or who starts at first base. . . That's the point."

McCovey, who was the regular first baseman last year until he was injured in August, finished the year with 12 home runs and 64 runs batted in but only a .228 batting average. Ivie played first regularly the last five weeks of the season and finished the year with 11 homers, 55 RBI and a .308 average.

In St. Petersburg, Fla., the St. Louis Cardinals' shortstop, Garry Templeton, issued an apology yesterday for his latest verbal swipe at the team and said that he no longer wanted to be traded.

Templeton, who has been at odds with the Cardinal front office, had said Tuesday: "I'm not going to play hard. I'm not going to do my best here. Hopefully, I'll be traded — if the Cardinals aren't too chicken to trade me."

SEATTLE MARINERS—Purchased the contract of Joe Simpson, outfielder, from the Los Angeles Dodgers. Released Jim Colborn and Tom House, pitchers; Kevin Pasley, catcher; and Bobby Thompson, outfielder. Sold the contract of Lee Stanton, outfielder, to the Hanshin Tigers of the Japanese Central League.

TORONTO BLUE JAYS—Sent Ernie Whitt, catcher, to Syracuse of the International League.

Spectacular Bid in Limelight

The Road to Churchill Downs

By Red Smith

HIALEAH, Fla., March 29 (NYT) — When Ron Franklin rode Spectacular Bid back to the winner's circle at Hialeah Park after the Flamingo Stakes, Buddy Delp, the colt's trainer, asked: "How many times did you have to hit him?"

"Only twicet," the jockey said. Actually, Franklin had rapped the colt six times to keep his attention, twicet right-handed at the top of the homestretch and four times on the left side in the last eighth of a mile, but if his count was slightly confused, that was understandable.

For three weeks he had been under more pressure than most 19-year-olds encounter. He had steered Spectcular Bid into one jam after another in the Florida Derby and for a while there was a real chance that he would lose the mount on the horse considered most likely to succeed in this year's Triple Crown races. Then after Harry and Teresa Meyerhoff, the owners, decided not to penalize the kid, people had been running at him to demand: "How are you going to ride him this time?"

As it turned out, he rode him well in the Flamingo last Saturday, starting from the outside post position, keeping him away from trouble to reach the backstretch, and then letting the horse run away and hide.

"I've always had faith in Ronnie," said Delp, who had called the jockey an idiot after the Florida Derby.

So now horse and trainer and rider will fly to Lexington, Ky., to prepare for the Bluegrass Stakes at Keeneland on April 26. Then it's on to Churchill Downs for the Kentucky Derby, opening event in the Triple Crown series. Barring disaster in the Bluegrass or unpredictable injury, this dark gray colt will go to the post in Louisville as a short-priced favorite, though not necessarily at odds as short as the 1-to-20 he paid in the Flamingo.

Just how good is Spectacular Bid? Up to now, nobody knows for sure. Buddy Delp says this is the best he ever saw, and he saw Secretariat and Kelso and Seattle Slew and Native Dancer and, when the trainer was in his teens, Citation. Buddy says it would take an act of God to beat this colt, but it is a fact of racing life that if you run a horse often enough you'll get him beaten.

Does Spectacular Bid look like a standout merely by contrast with a subpar crop of 3-year-olds? Maybe, but nobody downgraded 2-year-olds like General Assembly and Tim the Tiger and the California champion, Flying Paster, last summer, not even in the fall when Spectacular Bid came along to wallop the first two and everything else in the East.

The gray colt won the Eclipse Award as champion 2-year-old on merit, taking five stakes in a row and seven of his nine races. He had excuses for his two defeats as a rookie (bad track once, bad ride once). He has now won nine consecutive stakes and earned $648,980, a tidy return on an original investment of $37,000.

Twin Blessing

Though he is by Bold Ruler's stakes-winning son, Bold Bidder, and his dam, Spectacular, was a winner, he went for that relatively low price as a yearling because Spectacular is out of a twin. In multiple births, one offspring usually is puny and sometimes both, and horsemen are prejudiced against twins. Even though Go on Green and her sister, Stop on Red, both won and have been successful brood mares, when Stop on Red sent Spectacular Bid to the Keeneland summer sales in 1977, he found no purchaser. When he went back to the fall sales, the bidding was still cool and the Meyerhoffs got him.

The colt wasn't named Spectacular Bid then. After the Meyerhoffs got him they wanted to name him Seven No Trump (a bold bid) but the Jockey Club Registry said no for reasons of its own. Harry Meyerhoff, 49 and whiskery, is a retired land developer from the Baltimore area. He and his wife and his son Tom race under the name of Hawksworth Farm, a spread near Easton on the Eastern Shore of Maryland. For them it is fun.

Delp, a stylish-stout 46, is a Maryland native who has dominated racing in that state and Delaware for years. He has been a second father to Franklin, who started with Delp as a hot walker, rode and won his first race 13 months ago, and in 1978 took an Eclipse Award as the country's outstanding apprentice by riding 262 winners.

Franklin is a shy kid out of Dundalk, Md., an industrial town outside Baltimore. His father, Tony, wanted to be a jockey but became a factory hand instead. When the boy was 16, Tony took him to Delp's barn at Pimlico to find him an outdoors job.

"I didn't," the kid says, "want to be behind no windows."

A Present

Before the Florida Derby, Ronnie bought a gift for Spectacular Bid and himself, a $265 saddle. They used it in that stakes, which the colt won in spite of his rider's errors. Franklin had a mount in the race following the Derby. By the time he had changed silks, his valet had already carried his tack to the saddling enclosure, including the new saddle.

No, the kid protested, no horse could wear that except Sensational Bid, but it was too late. It was the only time up to now that the saddle has been desecrated.

Chances are Spectacular Bid could be ridden without a saddle, he runs that smoothly. "I'm sitting on a Rolls-Royce," Franklin says. It is far too early to compare the colt with top runners of the past, but he proved in the Hutcheson Stakes, the Fountain of Youth, the Florida Derby and the Flamingo that no 3-year-old in Florida could warm him up. Some thought General Assembly might, but Leroy Jolley, who trains that showy son of Secretariat, dissented on the eve of the Flamingo when he shipped him to New York to run third in Sunday's Bay Shore.

Though he couldn't catch Spectacular Bid in the Champagne Stakes last October and was clobbered in the Laurel Futurity, General Assembly may try again later. Flying Paster finished third in the recent San Felipe at Santa Anita, beaten two heads, but that is no reason to believe he won't try the Kentucky Derby. Owned by B.J. Ridder of the Knight-Ridder newspaper chain, Flying Paster (long "a") is named for the device that attaches a new roll of newsprint to the tail of another roll while the presses are running.

The San Felipe winner, Pole Position, has finished first in all nine of his races but was disqualified twice. Then there is Calumet Farm's Riva Ridge gelding, Rivalero, there is Screen King in New York, and there will be others before the first Saturday in May.

Alexander, Borg To Play in Milan

MILAN, March 29 (AP) — John Alexander of Australia reached the quarterfinals of a World Championship Tennis tournament today with a 6-2, 6-3 victory over Gianni Ocleppo of Italy.

Alexander's next opponent will be top-seeded Bjorn Borg of Sweden, who defeated Italy's Tonino Zugarelli, 6-3, 6-1, in a second-round match yesterday.

Earlier yesterday, Rhodesia's Andrew Pattison beat sixth-seeded Ilie Nastase of Romania, 5-7, 6-4, 6-3, in another second-round match.

Letter From Paris

H ppy Birthday

By Nino Lo Bello

PARIS (IHT) — The Eiffel Tower is an Erector Set that made good!

Scheduled to reach its 90th birthday tomorrow, the Iron Lady of Paris — which looks like a big clothespin to some — has also been called the world's greatest lamp post and the tallest flagpole on earth. Whatever it looks like to some people, the Eiffel Tower's strong profile against the Paris skyline makes it, even from far away, the most instantly identifiable tourist sight in the world.

More than 3 million tourists now visit it every year (70 million since it opened in 1889), but how many know about it? Here is a handy list of Eiffel Tower trivia — odd facts about Gustave Eiffel's engineering marvel:

- The tower was to have been torn down in 1909, but the advent of Marconi's wireless saved it when the French Army discovered it could be used as a communication station for army posts hundreds of miles off. During World War I the tower's radio station intercepted several crucial German Army messages, including one regarding a planned move on Paris that led to the famous "taxicab army."
- The Eiffel Tower took 200 men less than 27 months to put it together. So carefully had Eiffel done his homework that no rivet hole had to be rebored nor any steel girder filed down to make it fit. Of the 18,038 girders and 1,050,846 rivets (for which there were 2.5 million matching holes), no girder or bolt has ever had to be replaced.
- The tower does not weigh the same all the time. When it is painted every seven years, the paint increases the tower's weight. It needs 6,000 gallons of paint for the 210,000 square yards of surface — and it takes 60 men four months on the job.
- Gustave Eiffel failed to pass his entrance exam at France's foremost engineering school. Instead he got a degree in chemical engineering before switching to construction engineering. Eiffel not only built the tower but also a railroad bridge across the Douro River in Portugal, a dam in Russia, a church in the Philippines, a factory in Bolivia, a railroad station in Budapest, and he designed the inner frame for the Statue of Liberty.
- Although elevators take tourists up to three levels, there are 1,710 steps to the top. At the top there is a mailbox. Letters mailed in it are cancelled with a special Eiffel Tower postmark.
- The strongest gale ever recorded on the tower was clocked at 93 miles an hour, and it pushed the tower into a 4.7-inch sway.
- A freeze can shrink the tower by 6 inches.
- During the first year of its opening nearly 2 million people paid almost $1.2 million in admissions, paying for three-fourths of the total construction cost.
- More than 400 people have jumped from one of the tower's upper levels.
- Since it also draws all kinds of screwballs, the tower has been used for all kinds of publicity stunts. People have climbed it on their hands, on stilts, piggyback, naked and backwards. An elephant was once hoisted to the first platform. An aviator tried flying through the arches, but was killed. A Hungarian tailor leaped off to demonstrate a combination raincoat and parachute. He, too, was killed. One swindler sold the Eiffel Tower twice as scrap iron. Mountain climbers have scaled it, trapeze artists have swung from it, and the mayor of Montmartre once went down the tower on a bike.
- Among those who signed petitions against the tower when it was proposed were the younger Alexander Dumas, Guy de Maupassant and Charles Gounod. The tower has been a subject for paintings by Utrillo, Chagall, Dufy, Rousseau and Sisley. Its "autobiography" was written by a French duchess, it has been the subject of more than a dozen films and the setting of a ballet.

Itsik *and* Pinky

Violin Summitry

By Sam Allis

NEW YORK (WP) — Itzhak Perlman sought refuge in his favorite cuisine. "I always go back to food," he explained. "When you cook Chinese food, you put salt and sugar in the same dishes. What could be more different, yet they blend together beautifully. That's how Pinky and I play."

Fine. But there is still something of a contradiction here. World-renowned violin virtuosos don't make a habit of playing duets together. As a group, they are supposed to be tight with the limelight. But there is this mutual admiration society in full bloom between two of them. They even live in the same building on the Upper West Side of Manhattan.

"They're both very secure men who have no need to compete," Eugenia Zukerman offered. "Each thinks that he is the greatest, and they don't worry about it."

That helps explain some of it. Perhaps the fact they both survived the perils of being child prodigies and were born a few miles from each other in Tel Aviv has something to do with it all, too.

But it's a losing battle, really, this search for the bond between Itzhak Perlman and Pinchas Zukerman, because it ultimately is defined in musical terms to which almost none of us is privy.

Borscht-Belt Humor

We can listen to their outrageous borscht-belt humor offstage, we can marvel at their energies, and we can appreciate their warmth. But when Perlman picks up his Stradivarius and Zukerman his Guarneri del Gesu, the two retreat into a world where the rest of us simply can't speak the language.

Perlman and Zukerman brought their music to the South Lawn of the White House Monday for the signing of the Israeli-Egyptian peace treaty. This performance was, in a way, a sparkling coda to the triumphant 11-city U.S. tour they recently completed together, which got the same raves their European tour did in 1976.

By sheer luck, both artists were free for a few days when the White House contacted them last week. When you consider that each man is booked through 1982, this is remarkable.

"Itsik" and "Pinky" viewed their attendance at the treaty signing ceremony and their performance at the celebration as a splendid opportunity to be part of history and to share in the joy of the occasion. They are not in the business of making political statements, however, and Monday was no exception.

"I'm a musician, not a politician," Zukerman said before the concert. "I've never wanted to influence anyone because of my violin. This is simply a great occasion to play music, a wonderful time for humanity."

"I'll leave the politics to the politicians," Perlman echoed. "But I do look at this as much more of a giant step for mankind than the one on the moon, though."

Neither man can drop it there.

"I want to tell Sadat that he should set up a recording studio in the pyramids," Zukerman said in his stentorian voice, followed by his ubiquitous belly laugh.

"I'd like to play a concert on top of the pyramids," Perlman deadpanned. "Say, I heard a rumor that someone from Disneyland is trying to put up a Plexiglass pyramid next to the real ones. Can you imagine that?"

"They're hysterically funny together," said Eugenia Zukerman, herself a first-rate flutist who performs with her husband. "But they do things like imitate apes at airports. It can get very embarrassing."

It may be a key to their sanity that they often sound as if they toss out one-liners for a living in the Catskills. The tours that take them away from their families for up to eight months a year are numbing, particularly for Perlman, who has contended with the crippling affects of polio since he was 4. They can never stop practicing. They can never put their instruments away.

"There is no such thing as leaving the fiddle," Zukerman explained. "You play every day even when you're on vacation. If you don't, it just hurts more when you get back. You can hear the difference."

Zukerman, who is now 30, picked up a violin at 7 and first learned to play from his father after an abortive experience with the clarinet ("I could never breathe"). He was discovered by Isaac Stern and Pablo Casals when he was 13, and largely through their efforts, he left his family in Israel and came to New York to study under the legendary Ivan Galamian at the Juilliard School of Music.

The separation from his family at that age was hard on him, and music provided the only substance in his life until he met Eugenia at Juilliard and married her before he was 20. He now dotes on her and their two daughters, whom he calls "the Zukettes."

His music had been blossoming along with his romance. At 18, he won the 25th Leventritt International Competition at Carnegie Hall, which cemented his stature as a young giant among performers. He has played the violin and the viola all over the world since then and is now an established veteran on the international circuit.

On Sullivan Show

Perlman, now 33, paved the way, in many respects, for the odyssey Zukerman would later make from Israel to Juilliard and on to the rarified air beyond.

It was Ed Sullivan, of all people, who was responsible for first bringing Perlman to the United States. At 13, he played on Sullivan's Sunday night television show along with a number of other Israeli artists invited to perfrom in this country.

A protege of Isaac Stern, Perlman later returned with his family from Israel expressly to study under Galamian and Dorothy Delay at Juilliard. He won the Leventritt Competition in 1964 and was hailed by many as the leading violinist of his generation. He met his wife at Juilliard and settled on the Upper West Side, where he lives today six floors above Zukerman in an apartment once occupied by Babe Ruth.

If he has an interest outside of music and his family, it is the fight to improve the facilities for the handicapped in the artistic world. "I am familiar with the freight elevators in every concert hall in the United States and Europe," he said. "I want to make the architects more aware of the problems of the handicapped."

Violinists Perlman and Zukerman: "A great occasion to play music."

PEOPLE

Karen Ann Quinlan, [illegible] Turns 25

Karen Ann Quinlan, the [illegible] sey woman whose case set of[illegible] tional debate on the use of e[illegible] dinary measures to keep [illegible] alive, turned 25 yesterday. S[illegible] is in a coma in a Morris [illegible] N.J., nursing home, although [illegible] three years since she was [illegible] nected from the respirator th[illegible] believed to have been the [illegible] thing keeping her alive. Her [illegible] has stabilized at 70 pounds, a[illegible] is fed through a tube in her [illegible] with antibiotics administered [illegible] to ward off infection.

* * *

A woman has been named [illegible] in-chief of the European edi[illegible] of The Stars and Stripes. Col[illegible] Stauber, 50, a 28-year Army v[illegible] an, will take over in midsum[illegible] the first woman boss of th[illegible] Armed Forces newspap[illegible] 110,000-circulation daily ba[illegible] Darmstadt, West Germany, [illegible] newspaper will mark its 37th [illegible] versary on April 18. There is [illegible] separate Pacific edition pub[illegible] in Tokyo. Col. Stauber was [illegible] missioned in 1952 after gradu[illegible] from Southwest Missouri [illegible] College. She earned a master's de[illegible] gree in journalism at the Univ[illegible] of Missouri and has taken other graduate courses at the University of Wisconsin and Northwestern University. During the last two years, she has helped supervise the editorial and business policy of the newspaper from the U.S. European Command's headquarters in Stuttgart. In recent years she served as a U.S. Army information officer in Vietnam, at Fort McClellan, Ala., and at V Corps in Frankfurt.

* * *

For Irene Powell and Ian Mortimer, it was a week to remember. They got engaged, celebrated her 20th birthday and hit the jackpot. The couple — she's unemployed and he's a 23-year-old diesel fitter — split the cost of a 90-cent entry in the London soccer pool, and won. The payoff — $1.7 million. The prospective bridegroom says his good fortune won't change his lifestyle — he'll go right on working because "I am much too young to have nothing to do."

Marvella Bayh, who has become much more than a senator's wife by writing and speaking about her struggle with inoperable cancer, did not attend the White House "peace" dinner Monday night. "She wanted to conserve her strength for this ceremony," President Carter said as he presented the American Cancer Society's "courage award" to 23-year-old Te[illegible] Andrus. Miss Andrus, daughter of Secretary of the Interior Cecil Andrus, has Hodgkins' disease, a form of cancer. Mrs. Bayh, the [illegible] year old wife of Sen. Birch [illegible] Indiana, was scheduled to [illegible] the Hubert Humphrey [illegible] Award at another ceremo[illegible] yielding to her doctors' [illegible] friends said — she ente[illegible] tal "in very weak co[illegible] cording to the senator[illegible]

* * *

A question, [illegible] jokes, please: [illegible] West's bed be[illegible] piece of fu[illegible] described, fo[illegible] It is 9 feet [illegible] feet [illegible] done up in [illegible] of [illegible] ter of par[illegible] of a [illegible] Suppose[illegible] $30,00[illegible] build. [illegible] on of th[illegible] used b[illegible] mbol in he[illegible] film. [illegible] Him Wron[illegible] was made [illegible] her latest [illegible] "Sextette," which never [illegible] er, mattress. Phone call[illegible] Francisco turned up the fac[illegible] the bed was donated to Go[illegible] Industries by Dan Briggs, th[illegible] ducer of "Sextette." It went [illegible] auction block at a garage sa[illegible] charity, but commanded [illegible] piddling $800. "It was," a Go[illegible] spokesman aknowledged, [illegible] thing of a disappointment. [illegible] purchasers were a couple who [illegible] to display the bed in a taver[illegible] own, but Goodwill wouldn't [illegible] fy them, so we can't even say [illegible] to come up and see it sometim[illegible]

* * *

Radio commentator Paul H[illegible] and Orson Welles were ind[illegible] into the National Associat[illegible] Broadcasters Hall of Fame in [illegible] las, and Harvey — introduced burr under the saddle of the A[illegible] can conscience" — responde[illegible] typically upbeat fashion. Deplo[illegible] the pessimism he says has infe[illegible] the nation because of energy pr[illegible] lems and inflation, he said. "A [illegible] losophy of less is not like [illegible] count our chickens before the[illegible] hatched. We crossed bridges be[illegible] they were there and that's wh[illegible] put [illegible] the moon." We[illegible] best [illegible] for his "Wa[illegible] the W[illegible] broadcast th[illegible] icked the [illegible] 1938, wasn't hand.

Jockeys [illegible]nvicted In Paris [illegible]ace Fix

PARIS, March 29 (AP) — Fourteen jockeys have been found guilty and sentenced to prison terms and fines for their role in a 1973 race-fixing scandal at the Auteuil race course here.

The verdicts and sentences, which were handed down Tuesday, culminated nearly six years of investigations and legal battles over allegations that bribed jockeys pulled their horses in the 1973 Prix de Bride Abattue jumping race.

Robert Laouira, accused of having been the liaison for 13 other jockeys implicated in the scandal, received the stiffest sentence — three years in prison and a fine of 30,000 francs (about $7,000).

The other jockeys were given suspended sentences ranging from 6 to 15 months and were fined 3,000 to 15,000 francs. In addition, 40 per-sons [illegible] accused of illegal betting activities in the race were given sentences of up to three years in prison and fines of up to 30,000 francs.

[illegible] panel of criminal-court judges [illegible] decided that funds that [illegible]ve been paid on fraudulent betting tickets — about 5.5 [illegible]ancs, plus about 3 million [illegible] accumulated in interest during [illegible] long legal battle — should be [illegible] to the French treasury. Some [illegible] aning bettors not involved in the [illegible] had hoped that the money would [illegible] be divided among them.

The Prix de Bride Abattue, run on [illegible] 9, 1973, at Auteuil, was chosen for the Tierce — a form of off-track betting supervised by the Pari Mutuel Urbain, the state-run betting agency.

The PMU noted before the race that heavy Tierce combinations on nine longshots among 24 horses had been played in Marseilles, Toulon, Bastia and Paris, leading officials to suspect foul play.

Neither the PMU nor the Societe des Steeple-Chases de France, the group that runs Auteuil, took any action to prevent the running of the race. The nine longshots shook loose from the others during the first half of the race and furnished the winners of the Tierce.

According to testimony from some of the jockeys, Laouira promised them 10,000 to 80,000 francs to pull their horses. They cited intimidation and fear, as well as the money, as their reasons for collaborating in the scheme.

Laouira was said to have paid out 190,000 francs in bribes in the [illegible] hours before the race. He denied all the charges.

UCLA Appoints Brown as Coach

From Wire Dispatches

LOS ANGELES, March 29 — Larry Brown, a former coach of the Denver Nuggets of the National Basketball Association, was named yesterday as head coach of the UCLA basketball team.

He succeeds Gary Cunningham, who resigned last week following a two-year stint and a 50-8 record. Brown, 38, has no experience as a college coach. He resigned as coach of the Nuggets on Feb. 1, citing health reasons.

In another coaching change, Stan Morrison has been named head basketball coach at the University of Southern California. He succeeds Bob Boyd, who resigned after 13 seasons as the Trojans' coach. Morrison, 39, coached the University of the Pacific to the Pacific Coast Athletic Association title this season.

Buckner: Purple-Heart Hitter

By Mark Heisler

PALM SPRINGS, Calif., March 29 — Bill Buckner hit .323 playing on a sore left ankle last season. This should come as no surprise, because he's had a lot of practice playing on a sore ankle. Like four years. The last guy who ran as badly as Bill Buckner was Long John Silver.

The National League is in a lot of trouble this year because Buckner's ankle is a lot better. So is his heart, which was broken the day they told him it could no longer pump Dodger blue in Los Angeles, that he had become something called a Chicago Cub.

"Betrayal" is not too strong a word for the way he felt that day. "Jubilation" is not too strong for the way he feels about it now.

The day they made the deal was Jan. 11, 1977. Buckner and Ivan DeJesus for Rick Monday and Mike Garman.

A couple of months later, the Cubs' manager, Herman Franks, watched his new left fielder hobble out and was stunned. "Damaged goods" is what Herman called Buckner, loud enough for the Dodgers to hear without picking up a telephone.

"I just felt rotten," Buckner said. "I don't know if that was part of it. All that at once was a lot to handle."

Buckner had jammed his ankle going into a base in 1975, had undergone surgery and had bounced back from a .243 year to a .301 in '76. He drove in 60 runs, stole 28 bases and was always available for comic relief, like the time he grounded out and dug up first base.

After the 1976 season, Buckner underwent a second operation to clean things up but he came out of it limping badly. That was the way he broke in with the Cubs. Limp and all, he hit .284, with 11 homers and 60 RBI.

He also stole an amazing seven bases. "I've got sneaky hands," Buckner said.

His '77 season was fantastic, all anyone could have asked of him. You could ask him. "The first year, I hurt bad enough, I couldn't believe how well I did," Buckner said. "I felt really terrible. Brutal. It's tough enough to play healthy. I really didn't think I'd be able to play anymore."

Then came last season. Buckner went back out with the same limp and hit his .323. He drove in 74 runs in 117 games. He became a team leader. The only way that would have happened on the Dodgers would have been if they'd needed some bases dug up.

"Oh yeah, there was still some pain," Buckner said. "It still bothered me but I'd gotten used to it. Because it hurt less, it was easier to take.

"Everybody has discomforts in life. Very few athletes stay 100 percent. This is the only injury I've ever had. I think if I could handle that, I could handle about everything.

"It made me into a better hitter, helped me concentrate more. I knew I had to lay out some line drives. I couldn't squib anything and beat it out.

"It's worked out great as far as I'm concerned. First base is my best position now. With Steve Garvey at first, that would have been a little difficult. I was voted most popular athlete [in Chicago]. In L.A., people liked me but I was just another player on a good team."

Last winter, Buckner continued a rehabilitation program and the ankle began responding. In a Superstars 100-yard dash, he finished fourth in a field of 14. He no longer limps. He rates his speed at 85 percent of what he had. The last two years, he figures, he was at 65 percent.

He is now being asked, if you played that well on one leg, what can you do on two? "People have been talking batting title, batting title," Buckner said. "I guess that's on my mind. I feel about now like I did in '75, before they did the operation. That was the year I stole 28 bases. Hopefully."

"It wouldn't surprise me, anything he did," Franks said. "He's a dedicated guy. He can play. He can play."

Spectacular Bid in Limelight

The Road to Churchill Downs

By Red Smith

HIALEAH, Fla., March 29 (NYT) — When Ron Franklin rode Spectacular Bid back to the winner's circle at Hialeah Park after the Flamingo Stakes, Buddy Delp, the colt's trainer, asked: "How many times did you have to hit him?"

"Only twice," the jockey said. Actually, Franklin had rapped the colt six times to keep his attention, twice right-handed at the top of the homestretch and four times on the left side in the last eighth of a mile, but if his count was slightly confused, that was understandable.

For three weeks he had been under more pressure than most 19-year-olds encounter. He had steered Spectacular Bid into one jam after another in the Florida Derby and for a while there was a real chance that he would lose the mount on the horse considered most likely to succeed in this year's Triple Crown races. Then after Harry and Teresa Meyerhoff, the owners, decided not to penalize the kid, people had been running at him to demand: "How are you going to ride him this time?"

As it turned out, he rode him well in the Flamingo last Saturday, starting from the outside post position, keeping him away from trouble to reach the backstretch, and then letting the horse run away and hide.

"I've always had faith in Ronnie," said Delp, who had called the jockey an idiot after the Florida Derby.

So now horse and trainer and rider will fly to Lexington, Ky., to prepare for the Bluegrass Stakes at Keeneland on April 26. Then it's on to Churchill Downs for the Kentucky Derby, opening event in the Triple Crown series. Barring disaster in the Bluegrass or unpredictable injury, this dark gray colt will go to the post in Louisville as a short-priced favorite, though not necessarily at odds as short as the 1-to-20 he paid in the Flamingo.

Just how good is Spectacular Bid? Up to now, nobody knows for sure. Buddy Delp says this is the best he ever saw, and he saw Secretariat and Kelso and Seattle Slew and Native Dancer and, when the trainer was in his teens, Citation. Buddy says it would take an act of God to beat this colt, but it is a fact of racing life that if you run a horse often enough you'll get him beaten.

Does Spectacular Bid look like a standout merely by contrast with a subpar crop of 3-year-olds? Maybe, but nobody downgraded 2-year-olds like General Assembly and Tim the Tiger and the California champion, Flying Paster, last summer, not even in the fall when Spectacular Bid came along to wallop the first two and everything else in the East.

The gray colt won the Eclipse Award as champion 2-year-old on merit, taking five stakes in a row and seven of his nine races. He had excuses for his two defeats as a rookie (bad track once, bad ride once). He has now won nine consecutive stakes and earned $648,980, a tidy return on an original investment of $37,000.

Twin Blessing

Though he is by Bold Ruler's stakes-winning son, Bold Bidder, and his dam, Spectacular, was a winner, he went for that relatively low price as a yearling because Spectacular is out of a twin. In multiple births, one offspring usually is puny and sometimes both, and horsemen are prejudiced against twins. Even though Go on Green and her sister, Stop on Red, both won and have been successful brood mares, when Stop on Red sent Spectacular Bid to the Keeneland summer sales in 1977, he found no purchaser. When he went back to the fall sales, the bidding was still cool and the Meyerhoffs got him.

The colt wasn't named Spectacular Bid then. After the Meyerhoffs got him they wanted to name him Seven No Trump (a bold bid) but the Jockey Club Registry said no for reasons of its own. Harry Meyerhoff, 49 and whiskery, is a retired land developer from the Baltimore area. He and his wife and his son Tom race under the name of Hawksworth Farm, a spread near Easton on the Eastern Shore of Maryland. For them it is fun.

Delp, a stylish-stout 46, is a Maryland native who has dominated racing in that state and Delaware for years. He has been a second father to Franklin, who started with Delp as a hot walker, rode and won his first race 13 months ago, and in 1978 took an Eclipse Award as the country's outstanding apprentice by riding 262 winners.

Franklin is a shy kid out of Dundalk, Md., an industrial town outside Baltimore. His father, Tony, wanted to be a jockey but became a factory hand instead. When the boy was 16, Tony took him to Delp's barn at Pimlico to find him an outdoors job.

"I didn't," the kid says, "want to be behind no windows."

A Present

Before the Florida Derby, Ronnie bought a gift for Spectacular Bid and himself, a $265 saddle. They used it in that stakes, which the colt won in spite of his rider's errors. Franklin had a mount in the race following the Derby. By the time he had changed silks, his valet had already carried his tack to the saddling enclosure, including the new saddle.

No, the kid protested, no horse could wear that except Sensational Bid, but it was too late. It was the only time up to now that the saddle has been desecrated.

Chances are Spectacular Bid could be ridden without a saddle, he runs that smoothly. "I'm sitting on a Rolls-Royce," Franklin says. It is far too early to compare the colt with top runners of the past, but he proved in the Hutcheson Stakes, the Fountain of Youth, the Florida Derby and the Flamingo that no 3-year-old in Florida could warm him up. Some thought General Assembly might, but Leroy Jolley, who trains that showy son of Secretariat, dissented on the eve of the Flamingo when he shipped him to New York to run third in Sunday's Bay Shore.

Though he couldn't catch Spectacular Bid in the Champagne Stakes last October and was clobbered in the Laurel Futurity, General Assembly may try again later. Flying Paster finished third in the recent San Felipe at Santa Anita, beaten two heads, but that is no reason to believe he won't try the Kentucky Derby. Owned by B.J. Ridder of the Knight-Ridder newspaper chain, Flying Paster (long "a") is named for the device that attaches a new roll of newsprint to the tail of another roll while the presses are running.

The San Felipe winner, Pole Position, has finished first in all nine of his races but was disqualified twice. Then there is Calumet Farm's Riva Ridge gelding, Rivalero, there is Screen King in New York, and there will be others before the first Saturday in May.

Giants Pick 1st Baseman; McCovey Need Not Apply

From Wire Dispatches

PHOENIX, Ariz., March 29 — Joe Altobelli has finally made official what everyone thought was his decision right from the start: Mike Ivie has beaten out Willie McCovey as starting first baseman for the San Francisco Giants.

"It wasn't that difficult a decision when you evaluate everything," said Altobelli, the Giants' manager. "It had to be Ivie. He's a potential superstar and he will be our first baseman at least for the start of the season."

But Altobelli also said that he felt that McCovey, who at 41 is 15 years older than Ivie, could make a big contribution this season. And McCovey said that he was willing to accept any role that the manager has in mind for him.

"I've hit well coming off the bench, so I'll fill that job if that's what Joe wants," McCovey said. "I have no doubts I have the ability to play every day. This isn't any earth-shaking news. We're going to win the pennant no matter who plays first base or who starts at first base. . . . That's the point."

McCovey, who was the regular first baseman last year until he was injured in August, finished the year with 12 home runs and 64 runs batted in but only a .228 batting average. Ivie played first regularly the last five weeks of the season and finished the year with 11 homers, 55 RBI and a .308 average.

In St. Petersburg, Fla., the St. Louis Cardinals' shortstop, Garry Templeton, issued an apology yesterday for his latest verbal swipe at the team and said that he no longer wanted to be traded.

Templeton, who has been at odds with the Cardinal front office, had said Tuesday: "I'm not going to play hard. I'm not going to do my best here. Hopefully, I'll be traded — if the Cardinals aren't too chicken to trade me."

Transactions

BASEBALL
American League

BALTIMORE ORIOLES—Waived Elrod Hendricks, catcher, and named him a full-time coach.

MILWAUKEE BREWERS—Traded Gary Beare, pitcher, to the Philadelphia Phillies for Don Bollano, pitcher.

NEW YORK YANKEES—Sent Damaso Garcia, shortstop; Brad Gulden, catcher; Roy Staiger, third baseman; and Mike Griffin, Bob Kammeyer and Chris Welsh, pitchers, to Columbus of the International League.

SEATTLE MARINERS—Purchased the contract of Joe Simpson, outfielder, from the Los Angeles Dodgers. Released Jim Colborn and Tom House, pitchers; Kevin Pasley, catcher; and Bobby Thompson, outfielder. Sold the contract of Lee Stanton, outfielder, to the Hanshin Tigers of the Japanese Central League.

TORONTO BLUE JAYS—Sent Ernie Whitt, catcher, to Syracuse of the International League.

Alexander, Borg To Play in Milan

MILAN, March 29 (AP) — John Alexander of Australia reached the quarterfinals of a World Championship Tennis tournament today with a 6-2, 6-3 victory over Gianni Ocleppo of Italy.

Alexander's next opponent will be top-seeded Bjorn Borg of [illegible]den, who defeated Italy's [illegible] Zugarelli, 6-3, 6-1, in a second-round match yesterday.

Earlier yesterday, Rhodesia's Andrew Pattison beat sixth-seeded Ilie Nastase of Romania, 5-7, 6-4, 6-3, in another second-round match.
